**Civility and Its Development** David C. Schak, 2018-09-04 This is the first book length study of the development of civility in Chinese societies Although some social scientists and political philosophers have discussed civility none has defined it as an analytical tool to systematically measure attitudes and behavior and few have applied it to a non Western society By comparing the development of civility in mainland China and Taiwan Civility and Its Development The Experiences of China and Taiwan analyzes the social conditions needed for civility to become established in a society Schak argues that the attempts to impose civility top down from the state are ineffective Civility appeared in Taiwan only after state efforts to impose it ceased at the end of the 1980s when Taiwan began to democratize and the PRC government civility campaigns have so far had only limited success The book concludes with an examination of various differences between Taiwan and the PRC relevant to Taiwan s having become a society with civility while the PRC still encounters difficulties in doing so The essential factor in developing civility in Taiwan Schak contends was its evolution from a place composed of myriad small inward looking communities to a society in which everyone shares a strong identity and civic consciousness and people consider others as fellow members not anonymous strangers This book represents the most thorough review of what social scientists once called the civilizing process in Chinese society David C Schak builds on the earlier studies on this issue and goes well beyond the established literature James Watson Fairbank Professor of Chinese Society and Professor of Anthropology Emeritus Harvard University This is a topic that people talk about all the time and David C Schak draws a lot of material together in a systematic and comprehensive way that can stimulate important discussions beyond the academy Thomas Gold Professor of Sociology University of California Berkeley

Research in the Social Scientific Study of Religion, Volume 28 Andrew Village,Ralph W. Hood,2017-07-10 This volume of Research in the Social Scientific Study of Religion includes a wide range of papers from a social science perspective The special section gives a unique insight into the rapidly growing field of psychological studies of religion in China It draws on experts from China and the USA who met for a conference at Fuller Theological Seminary and have together compiled a collection of original research and reviews that helps to locate the current state of the discipline from a specifically Chinese perspective Other papers in the volume examine intergenerational religious transmission and religious problem solving styles in the USA *Thinking through China* Jerusha McCormack,John G. Blair,2015-08-01 In this innovative book Jerusha McCormack and John G Blair introduce China on its own terms By explaining ten key concepts that frame the way most Chinese people think about the world they compare these terms which don t translate readily into English with the ways most of us as Westerners think The book then poses four questions that Westerners routinely ask about China But rather than answer with Western assumptions the authors respond using these ten Chinese key words Not surprisingly the answers differ in startling ways from standard Western responses This intensive bridging work allows those without deep knowledge of China to understand the very different perspectives to be gained by looking at the world through Chinese eyes As each of the ten words maps out new territory the premises of a very dissimilar but equally coherent world view gradually emerge Creating a cultural cartography through both text and image the authors provide readers with a vivid sense of what is uniquely Chinese about China Occupational Hazards Elanah Uretsky,2016-02-24 Doing business in China can be hazardous to your health Occupational Hazards follows a group of Chinese businessmen and government officials as they conduct business in Beijing and western Yunnan Province exposing webs of informal networks that help businessmen access political favors These networks are built over liquor cigarettes food and sex turning risky behaviors into occupational hazards Elanah Uretsky s ethnography follows these powerful men and their vulnerabilities to China s burgeoning epidemics of sexually transmitted infections STIs and HIV AIDS Examining the relationship between elite masculine networking practices and vulnerability to HIV infection Occupational Hazards includes the stories of countless government officials and businessmen who regularly visit commercial sex workers but resist HIV testing for fear of threatening their economic and political status Their fate is further complicated by a political system that cannot publicly acknowledge such risk and by authoritative international paradigms that limit the reach of public health interventions Ultimately Uretsky offers insights into how complex socio cultural and politico economic negotiations affect the development and administration of China s HIV epidemic **Everyday Masculinities in 21st-Century China** Magdalena Wong,2020-05-04 Everyday Masculinities in 21st Century China The Making of Able Responsible Men argues that a moral dimension in Chinese masculinity is of growing significance in fast changing China Able responsible men those who can create wealth and shoulder responsibilities have

replaced the moneyed elite of the earlier reform and opening up era as the dominant male ideal. With vivid and highly readable case studies, Wong presents a compelling account of the forces that coerce men to live up to the able responsible standard. She demonstrates the impact this pressure has on the lives of not only boys and men but also on women and shows how it invites both complicit and resistant reactions. The book lays bare the socio-political context that nurtures the cultural expressions of hegemonic masculinity under the rule of Xi Jinping. The president himself has emerged in public consciousness as the embodiment of the ideal able responsible man. Based on anthropological fieldwork in Nanchong, Sichuan, the book provides new perspectives on many topical issues that China faces. These include urbanization, labour migration, the one-child policy, love and marriage, gender and intergenerational dynamics, hierarchical male relationships, and the rise of mass displays of nationalism. In this richly informative book, Dr Wong gives us an intimate picture of masculinities in a contemporary Chinese city. She explores the role of wealth in definitions of masculinity, the moral dimension in gender imagery, the changing desires of women, and the role of the state, including a striking account of the gender strategies of President Xi. More than a local study, this book provides valuable ideas for understanding gender, men, and masculinities in the contemporary world.

Raewyn Connell, University of Sydney  
Magdalena Wong asks wonderful original questions. Her study might be one of the most pioneering investigations into Chinese family relations I have read. The strength of her book lies in its insight into kinship and cultural continuities and changes. The rich, nuanced case studies can make her book become an important addition to our ongoing studies on Chinese family.

It has fostered new dialogue between anthropology and philosophy, psychology, and theology and seen a wealth of theoretical innovation and influential ethnographic studies. This book brings together a global team of established and emerging leaders in the field and makes the results of this fast-growing body of diverse research available in one volume. Topics covered include the philosophical and other intellectual sources of the ethical turn, interdisciplinary dialogues, emerging conceptualizations of core aspects of ethical agency such as freedom, responsibility, and affect, and the diverse ways in which ethical thought and practice are institutionalized in social life, both intimate and institutional. Authoritative and cutting edge, it is essential reading for researchers and students in anthropology, philosophy, psychology, and theology and will set the agenda for future research in the field.
