which take panpsychism seriously Brentano's Philosophical System Uriah Kriegel, 2018 Uriah Kriegel presents a rich exploration of the systematic thought of the great 19th century philosopher Franz Brentano and its importance to the subsequent development of philosophy Kriegel sets out Brentano's unified theories of the true, the good and the beautiful in an accessible way

The Mystery of Rationality Gérald Bronner, Francesco Di Iorio, 2018-07-12 This book contributes to the developing dialogue between cognitive science and social sciences. It focuses on a central issue in both fields: i.e. the nature and the limitations of the rationality of beliefs and action. The development of cognitive science is one of the most important and fascinating intellectual advances of recent decades and social scientists are paying increasing attention to the findings of this new branch of science that forces us to consider many classical issues related to epistemology and philosophy of action in a new light. Analysis of the concept of rationality is a leitmotiv in the history of the social sciences and has involved endless disputes. Since it is difficult to give a precise definition of this concept and there is a lack of agreement about its meaning, it is possible to say that there is a mystery of rationality. What is it to be rational? Is rationality merely instrumental or does it also involve the endorsement of values, i.e. the choice of goals? Should we consider rationality to be a normative principle or a descriptive one? Can rationality be only Cartesian or can it also be argumentative? Is rationality a conscious skill or a partly tacit one? This book, which has been written by an outstanding collection of authors including both philosophers and social scientists, tries to make a useful contribution to the debates on these problems and shed some light on the mystery of rationality. The target audience primarily comprises researchers and experts in the field.

The Relational View of Perception Farid Masrour, Ori Beck, 2025-02-28 Relationalism is the view in philosophy of mind that particulars in our environment are constituents of conscious perception. It is an important theory of perceptual experience offering explanations of perception's phenomenal character and its epistemic and semantic role. However, it has also been criticised for a lack of empirical grounding. In this outstanding collection, an international team of contributors examine relationalism and consider its role in philosophy of mind and perception across four key areas: The significance of empirical evidence to the theory of relationalism; Dependence of experience on the subject's internal makeup; Hallucinations and the unity of perceptual experience; Relationalism and empirical knowledge. *The Relational View of Perception: New Philosophical Essays* will be of great interest to advanced students and scholars in philosophy of mind. Contributors: Dominic Alford, Duguid Rami Ali, Ori Beck, Alex Byrne, Elijah Chudnoff, Peter Epstein, Craig French, E. J. Green, Roberta Locatelli, Heather Logue, Farid Masrour, Alva Noë, Adam Pautz, Ian Phillips, Thomas Raleigh, Susanna Schellenberg, Umrao Sethi, Matthew Soteriou, and Lisa Titus.

Consciousness Rocco J. Gennaro, 2016-10-04 Consciousness is arguably the most important interdisciplinary area in contemporary philosophy of mind, with an explosion of research over the past thirty years from philosophers, psychologists and scientists. It is also perhaps the most puzzling aspect of the world despite the fact that it is familiar to each of us. Consciousness also seems resistant to any straightforward physical explanation. This book introduces readers to the

contemporary problem of consciousness providing a clear introduction to the overall landscape and a fair minded critical survey of various theories of consciousness Beginning with essential historical background to the problem of consciousness Rocco Gennaro explores the following key topics and debates the metaphysical problem of consciousness including varieties of dualism and materialism consciousness and neuroscience particularly the question of whether consciousness can be reduced to brain activity or attentional mechanisms representational and cognitive theories of consciousness consciousness and psychopathology animals machines and consciousness Extensive use is made of interesting phenomena throughout the book ranging from blindsight synaesthesia and change blindness to phantom limb syndrome split brain cases and dissociative identity disorder DID The inclusion of chapter summaries annotated further reading and a glossary make this book essential reading for anyone seeking a clear and informative overview of the problem of consciousness not only in philosophy but related fields such as psychology and cognitive science
