Current Issues In Chinese Linguistics:

Current Issues in Chinese Linguistics Hooi Ling Soh, Liang Tao, Yun Xiao, 2011-07-12 Chinese is the most commonly spoken language in the world and one of the very few contemporary languages whose history is documented in an unbroken tradition extending back to the second millennium. Compared with Western languages, Chinese has a typology with distinguished features in sound system, syntax and discourse that have a strong impact on Chinese linguistics studies and language learning. Drawing on theoretical models from formal and functional linguistics, discourse analysis, computer-assisted corpus studies, language socialization and second language acquisition, this volume presents new advances and addresses a broad range of current issues in the study of Chinese linguistics with research studies that originated from the proceedings of the 21st North American Conference on Chinese Linguistics (NACCL 21). As globalization presses on, more and more people are interested in Chinese, its history, structure, research and new developments. This volume aims to be instrumental. Written in a coherent and structured style, each section is concentrated on a particular linguistic area and each chapter is self-contained with a clear focus and theoretical framework. It will be valuable to linguists, educators, administrators, specialists, teachers and students of Chinese as a native, second, heritage or foreign language.

Current Studies in Chinese Language and Discourse Yun Xiao, Linda Tsung, 2019-04-15 This volume features a discourse-empirical orientation from diverse perspectives and various methodologies in which narratives, interviews, surveys and large-scale databases or self-created written and spoken corpora are employed and analyzed to gain a better understanding of new developments and changes in Chinese language and discourse. Authors employ updated approaches from a variety of fields including applied linguistics, functional linguistics, corpus linguistics and sociolinguistics to describe the structure of Chinese language and discourse and to examine its critical issues, many focusing on globalization-induced language developments and changes. With an empirically based discourse-socio-cultural approach, this collection makes valuable contributions to research on Chinese language and discourse and serves as a sound reference for Chinese researchers and educators in diverse fields such as Chinese language and discourse, Chinese linguistics and language education, Chinese multiculturalism and more.

New Horizons in Chinese Linguistics C-T James Huang, Audrey Li Yen Hui, 2012-12-06 The past decade and a half has witnessed a great deal of renewed interest in the study of Chinese linguistics, not only in the traditional areas of philological studies and in theoretically oriented areas of synchronic grammar and language change, but also in the cultivation of new frontiers in related areas of the cognitive sciences. There is a significant increase in the number of students studying one area or another of the linguistic structure of Chinese in various linguistic programs in the United States, Europe, Australia and in China, Hong Kong, Singapore, Taiwan and other parts of Asia. Several new academic departments devoted to the study of linguistics have been established in Taiwan and Hong Kong in the past few years. The increasing research and study activities have also resulted in a number of national and international conferences, including the North American Conference on Chinese

New Perspectives on Chinese Syntax Waltraud Paul, 2014-12-12 Mandarin Chinese has become indispensable for crosslinguistic comparison and syntactic theorizing It is nevertheless still difficult to obtain comprehensive answers to research questions because Chinese is often presented as an exotic language defying the analytical tools standardly used for other languages This book sets out to demystify Chinese It places controversial issues in the context of current syntactic theories and offers precise analyses based on a large array of representative data Although the focus is on Modern Mandarin earlier stages of Chinese are occasionally referred to in order to highlight striking continuities in its history VO order is one such constant factor thus invalidating the idea that Chinese went through a major word order change from OV to VO and back to OV Another claim often made for Chinese as an isolating language viz the existence of an impoverished inventory of parts of speech is likewise refuted Other long debated issues addressed here include the relevance of the dichotomy topic vs subject prominence and the role of Chinese as a recurring exception to crosscategorical harmonies posited in typological studies
