information after a cybercrime *Deep Sciences for Computing and Communications* Annie Uthra R.,Kottilingam Kottursamy,Gunasekaran Raja,Ali Kashif Bashir,Utku Kose,Revathi Appavoo,Vimaladevi Madhivanan,2024-09-28 This two volume set CCIS 2176 2177 constitutes the proceedings from the Second International Conference on Deep Sciences for Computing and Communications IconDeepCom 2023 held in Chennai India in April 2023 The 74 full papers and 8 short papers presented here were thoroughly reviewed and selected from 252 submissions The papers presented in these two volumes are organized in the following topical sections Part I Applications of Block chain for Digital Landscape Deep Learning approaches for Multipotent Application Machine Learning Techniques for Intelligent Applications Industrial use cases of IOT NLP for Linguistic Support Convolution Neural Network for Vision Applications Part II Optimized Wireless Sensor Network Protocols Cryptography Applications for Enhanced Security Implications of Networking on Society Deep Learning Model for Health informatics Web Application for Connected Communities Intelligent Insights using Image Processing Precision Flood Prediction Models **Intelligent Data Analytics for Terror Threat Prediction** Subhendu Kumar Pani,Sanjay Kumar Singh,Lalit Garg,Ram Bilas Pachori,Xiaobo Zhang,2021-01-12 Intelligent data analytics for terror threat prediction is an emerging field of research at the intersection of information science and computer science bringing with it a new era of tremendous opportunities and challenges due to plenty of easily available criminal data for further analysis This book provides innovative insights that will help obtain interventions to undertake emerging dynamic scenarios of criminal activities Furthermore it presents emerging issues challenges and management strategies in public safety and crime control development across various domains The book will play a vital role in improvising human life to a great extent Researchers and practitioners working in the fields of data mining machine learning and artificial intelligence will greatly benefit from this book which will be a good addition to the state of the art approaches collected for intelligent data analytics It will also be very beneficial for those who are new to the field and need to quickly become acquainted with the best performing methods With this book they will be able to compare different approaches and carry forward their research in the most important areas of this field which has a direct impact on the betterment of human life by maintaining the security of our society No other book is currently on the market which provides such a good collection of state of the art methods for intelligent data analytics based models for terror threat prediction as intelligent data analytics is a newly emerging field and research in data mining and machine learning is still in the early stage of development **GCSE ICT for Edexcel** Ken Slee,Jenny Johnson,2001 This title covers Edexcel s GCSE ICT specification It is designed in double page spreads clearly set out and written in a style and language appropriate for students at this level Each spread covers a whole topic providing just the right amount of information to hold students attention Cyber Crime and Forensic Computing Gulshan Shrivastava,Deepak Gupta,Kavita Sharma,2021-09-07 This book presents a comprehensive study of different tools and techniques available to perform network forensics Also various aspects of network forensics are reviewed as well as related

technologies and their limitations This helps security practitioners and researchers in better understanding of the problem current solution space and future research scope to detect and investigate various network intrusions against such attacks efficiently Forensic computing is rapidly gaining importance since the amount of crime involving digital systems is steadily increasing Furthermore the area is still underdeveloped and poses many technical and legal challenges The rapid development of the Internet over the past decade appeared to have facilitated an increase in the incidents of online attacks There are many reasons which are motivating the attackers to be fearless in carrying out the attacks For example the speed with which an attack can be carried out the anonymity provided by the medium nature of medium where digital information is stolen without actually removing it increased availability of potential victims and the global impact of the attacks are some of the aspects Forensic analysis is performed at two different levels Computer Forensics and Network Forensics Computer forensics deals with the collection and analysis of data from computer systems networks communication streams and storage media in a manner admissible in a court of law Network forensics deals with the capture recording or analysis of network events in order to discover evidential information about the source of security attacks in a court of law Network forensics is not another term for network security It is an extended phase of network security as the data for forensic analysis are collected from security products like firewalls and intrusion detection systems The results of this data analysis are utilized for investigating the attacks Network forensics generally refers to the collection and analysis of network data such as network traffic firewall logs IDS logs etc Technically it is a member of the already existing and expanding the field of digital forensics Analogously network forensics is defined as The use of scientifically proved techniques to collect fuses identifies examine correlate analyze and document digital evidence from multiple actively processing and transmitting digital sources for the purpose of uncovering facts related to the planned intent or measured success of unauthorized activities meant to disrupt corrupt and or compromise system components as well as providing information to assist in response to or recovery from these activities Network forensics plays a significant role in the security of today s organizations On the one hand it helps to learn the details of external attacks ensuring similar future attacks are thwarted Additionally network forensics is essential for investigating insiders abuses that constitute the second costliest type of attack within organizations Finally law enforcement requires network forensics for crimes in which a computer or digital system is either being the target of a crime or being used as a tool in carrying a crime Network security protects the system against attack while network forensics focuses on recording evidence of the attack Network security products are generalized and look for possible harmful behaviors This monitoring is a continuous process and is performed all through the day However network forensics involves post mortem investigation of the attack and is initiated after crime notification There are many tools which assist in capturing data transferred over the networks so that an attack or the malicious intent of the intrusions may be investigated Similarly various network forensic frameworks are proposed in the literature

Utilizing Generative AI for Cyber Defense Strategies

Jhanjhi, Noor Zaman, 2024-09-12 As cyber threats become increasingly sophisticated the need for innovative defense strategies becomes urgent Generative artificial intelligence AI offers a revolutionary approach to enhance cybersecurity By utilizing advanced algorithms data analysis and machine learning generative AI can simulate complex attack scenarios identify vulnerabilities and develop proactive defense mechanisms while adapting to modern day cyber attacks AI strengthens current organizational security while offering quick effective responses to emerging threats Decisive strategies are needed to integrate generative AI into businesses defense strategies and protect organizations from attacks secure digital data and ensure safe business processes Utilizing Generative AI for Cyber Defense Strategies explores the utilization of generative AI tools in organizational cyber security and defense Strategies for effective threat detection and mitigation are presented with an emphasis on deep learning artificial intelligence and Internet of Things IoT technology This book covers topics such as cyber security threat intelligence and behavior analysis and is a useful resource for computer engineers security professionals business owners government officials data analysts academicians scientists and researchers

Proceedings of the International Conference on Computational Innovations and Emerging Trends (ICCIET 2024) K. Reddy Madhavi, P. Subba Rao, J. Avanija, I.
