

Chapitre 3 - L'intégration par les mécanismes de marché

L'approfondissement de l'intégration européenne par des mécanismes de marché concerne le marché interne communautaire et les rapports extérieurs avec les partenaires extra-communautaires. Deux politiques essentielles : la politique de la concurrence et la politique commerciale extérieure commune. La 1ère concerne la régulation des marchés domestiques, en particulier aujourd'hui l'activité des grandes entreprises. La 2ème organise le libre-échange avec les pays tiers, tout en prévoyant un dispositif de protection des activités sensibles.

De L'intégration Des Marchés:

Intégration des marchés des transports terrestres européens European Conference of Ministers of Transport, 2000-07-25 L'intégration des marchés intérieurs européens est une question d'actualité qui a suscité de nombreuses actions au cours des dernières années. C'est également la condition sine qua non pour que les relations commerciales et l'activité économique se Intégration des marchés de gros et transmission des prix des agrumes au Maroc: cas des petits fruits Maatala, N., Bekkar, Y., Taha Lahrech, M., Abderrafik, M. M., Fadlaoui, A., Tomatis, F., Pereira, L., 2022-06-29 Les marchés de gros des fruits et légumes jouent un rôle fondamental dans le cadre de la mise en marché des produits mettant en relation producteurs et consommateurs et bénéficiant l'ensemble des acteurs du système alimentaire. Ils permettent notamment d'assurer une aggrégation et une distribution efficaces des produits en tant que centre logistique créant des synergies et des économies d'échelle entre opérateurs contribuant à une meilleure compétitivité des filières tout en diminuant l'asymétrie d'information sur les prix et les coûts de transaction. Grâce à ce lieu de rencontre de l'offre et de la demande des produits agricoles promouvant la concurrence et la transparence des transactions, les prix d'équilibre se forment selon les lois du marché. Par conséquent, le marché de gros est un lieu essentiel de coordination de la chaîne de valeur des produits agricoles participant à une formation transparente des prix et permettant une meilleure transmission des prix et standards au sein des différentes filières.

Rapport 2024-2025 sur l'investissement - Résumé analytique

Banque européenne d'investissement, 2025-07-01

L'Union européenne doit consolider sa position de chef de file mondial dans le domaine de la technologie de l'innovation et de l'énergie propre. Si elle remplit certaines difficultés majeures et tire parti de ses points forts actuels, l'Europe peut renforcer sa compétitivité en encourageant la croissance économique et montrant au monde comment mener bien la transition vers l'énergie verte. En bref, l'Europe doit promouvoir une meilleure intégration du marché unique européen et en simplifier l'accès. La fragmentation du marché due à des divergences réglementaires et structurelles entrave la capacité des entreprises à profiter du marché européen dans toute son étendue. Cela est particulièrement vrai pour les entreprises innovantes, 74 % d'entre elles considèrent les incohérences réglementaires comme un obstacle à l'expansion de leurs activités.

Simplifier les règles pour la conformité réglementaire pourrait réduire les coûts. Ces règles représentent aujourd'hui environ 18 % du chiffre d'affaires des entreprises et 25 % pour les PME. Canaliser les investissements vers les jeunes entreprises innovantes et la transformation numérique au sens large. L'Europe dispose d'un tissu industriel et d'une base de recherche solides, mais les entreprises innovantes peinent souvent à trouver les financements nécessaires pour développer leurs activités.

Par ailleurs, l'intégration de l'analyse des mégadonnées et de l'intelligence artificielle dans la production et les services des entreprises européennes a moins progressé dans l'UE que la proportion des entreprises utilisant ces services est inférieure de 6 points de pourcentage à celle observée aux États-Unis. Une amélioration dans ce domaine pourrait induire des gains de productivité considérables pour les entreprises européennes, faisant avancer la transition écologique.

L'Europe doit assortir ses ambitieux objectifs climatiques d'une feuille de route réaliste et pragmatique qui permette aux entreprises de saisir les possibilités offertes par la transition écologique. La révolution énergétique bat son plein. En 2024, les énergies renouvelables ont fourni près de la moitié (48 %) de l'électricité consommée en Europe, tandis que les missions provenant de la production d'électricité ont reculé de 13 %. Le leadership de l'Europe en matière d'action pour le climat porte également ses fruits sur le plan économique, les entreprises européennes profitant de la croissance des exportations de technologies à faible intensité carbone.

Ces exportations ont augmenté de 65 % depuis 2017 contre 79 % pour la Chine et seulement 22 % pour les États-Unis. Une collaboration plus poussée des investissements cibles et un cadre réglementaire cohérent permettront à l'Europe de tirer parti de ses atouts pour favoriser une croissance durable et renforcer sa préférence technologique et sa résilience économique dans un

It is an indispensable work of reference for anyone dealing with these institutions which have become so numerous and varied that no one can possibly memorise all their acronyms or functions. The European Yearbook provides aids for finding one's way through the labyrinth of these organisations which coordinate a variety of activities in over 20 countries. One of the aids is an organisation chart at the beginning of the documentary section giving a clear picture of the general situation. A perusal of the many contributions in the volume organisation by organisation shows the full diversity of the activities which Europe is gradually taking over from national governments with their consent and financial support. Written in both of the Council of Europe's official languages English and French the European Yearbook also contains a general index by subject and name which constitutes a very valuable list of articles and provides direct access to the work's subject matter regardless of the particular organisation concerned offering a kind of cross section of the
