*Trading on the Edge* Guido J. Deboeck, 1994-04-18

Experts from the world's major financial institutions contributed to this work and have already used the newest technologies. Gives proven strategies for using neural networks algorithms fuzzy logic and nonlinear data analysis techniques to enhance profitability. The latest analytical breakthroughs the impact on modern finance theory and practice including the best ways for profitably applying them to any trading and portfolio management system are all covered. Forecasting Financial Markets Tony Plummer, 1998. The ability to make money in financial markets depends most critically on an individual's ability to make decisions independent of the crowd. This work shows traders how by being aware of the forces at work in the financial markets they can use them to their own advantage. It focuses on the way that the crowd influence creates specific price movements and patterns rhythmic oscillations and mathematically related price movements the design of trading systems knowing when to enter a position or exit a position how market price movements trigger negative and self-defeating behaviour patterns how best to recognize these patterns and override them and how to enhance confidence in one's ability to succeed.
