## **Foreign Policy Puzzle Interests Threats:**

*The Foreign Policy Puzzle* Keith L. Shimko, 2017 Keith Shimko's *The Foreign Policy Puzzle Interests Threats and Tools* provides a unique framework for students to think critically about issues in American foreign policy concentrating on the dilemmas that face policy makers today

**American Dove** Zachary Shirkey, 2020-11-16 Zachary C Shirkey argues that the United States is overly reliant on the active use of force and should employ more peaceful foreign policy tools Force often fails to achieve its desired ends for both tactical and strategic reasons and is relatively inflexible making it an inappropriate tool for many US foreign policy goals Rather than relying on loose analogies or common sense as many books on US grand strategy do American Dove bases its argument directly on an eclectic mix of academic literature including realist liberal and constructivist theory as well as psychology Shirkey also argues against retrenchment strategies such as offshore balancing and strategic restraint as lacking a moral component that leaves them vulnerable to hawkish policies that employ moral arguments in favor of action US withdrawal would weaken the existing liberal international security economic and legal orders orders that benefit the United States Rather the book argues the United States needs an energetic foreign policy that employs passive uses of force such as deterrence and nonmilitary tools such as economic statecraft international institutions international law and soft power Such a policy leaves room for a moral component which is necessary for mobilizing the American public and would uphold the existing international order Last Shirkey argues that to be successful doves must frame their arguments in terms of strategy rather than in terms of costs and must show that dovish policies are consistent with national honor and a broad range of American values American Dove offers a framework for US grand strategy and a plan for persuading the public to adopt it

**Reassessing the Revolution in Military Affairs** Andrew Futter, Jeffrey Collins, 2015-10-12 A generation after the First Gulf War and in the wake of a decade of counterinsurgency operations and irregular warfare this book explores how the concept of the Revolution in Military Affairs continues to shape the way modern militaries across the globe think about plan and fight wars

**Planning to Fail** James H. Lebovic, 2019-03-07 The United States national security establishment is vast yet the United States has failed to meet its initial objectives in almost every one of its major post World War II conflicts Of these troubled efforts the US wars in Vietnam 1965-73 Iraq 2003-11 and Afghanistan 2001- present stand out for their endurance resource investment human cost and miscalculated decisions Because overarching policy goals are distant and open to interpretation policymakers ground their decisions in the immediate world of short term objectives salient tasks policy constraints and fixed time schedules As a consequence they exaggerate the benefits of their preferred policies ignore the accompanying costs and requirements and underappreciate the benefits of alternatives In *Planning to Fail* James H. Lebovic argues that a profound myopia helps explain US decision making failures In each of the wars explored in this book he identifies four stages of intervention First and foremost policymakers chose unwisely to go to war After the fighting began they inadvisably sought to extend or expand the mission Next they pursued the mission in abbreviated form to suboptimal effect Finally they adapted the mission to exit from the conflict Lebovic argues that US leaders were effectively planning to fail whatever their hopes and thoughts were at the time the intervention began Decision makers struggled less than they should have even when conditions allowed for good choices Then when conditions on the ground left them with only bad choices they struggled furiously and more than could ever matter Policymakers allowed these wars to sap available capabilities push US forces to the breaking point and exhaust public support They finally settled for terms of departure that they or their predecessors would have rejected at the start of these conflicts Offering a far ranging and detailed analysis this book identifies an unmistakable pattern of failure and highlights lessons we can learn from it

**Is China a Global Power?** Francisco José Leandro, 2025-05-02 This book offers a thorough geopolitical analysis of modern China through the lens of defensive realism It uniquely scrutinizes China's globalness within the taxonomy of great powers challenging the common narrative of China as a global power In doing so the book presents an empirical qualitative model to assess China's global power status encompassing four dimensions 1 The Great Wall of Technology and Economic Access Material Power 2 The Great Wall of Cultural and Intangible Access Intangible Power 3 The Great Wall of Political Access and Global Governance Governance Power and 4 an analysis of China's comprehensive power Drawing from firsthand observations the book examines China's ascent in the international order emphasizing its strengths and vulnerabilities With this it concludes that China has a global vision and ambition positioning itself as a quasi global power Essential for scholars policymakers and global politics enthusiasts this book is a valuable contribution to existing

international relations scholarship      **International Relations Theory and the End of the Cold War** Richard Ned Lebow, Thomas Risse-Kappen, 1995 This controversial set of essays evaluates and extends international relations theory in light of the revolutionary events of past years The contributors demonstrate how theoretical constructs did not anticipate Soviet foreign policies that led to the end of the Cold War      Donald Trump's Digital Diplomacy and Its Impact on US Foreign Policy towards the Middle East Ahmed Y. Zohny, 2023-05-04 In Donald Trump's Digital Diplomacy and Its Impact on US Foreign Policy Towards the Middle East Ahmed Y Zohny develops a well blended mix of history and political science supplemented by content analysis and critical discourse analysis of Trump's statements and tweets Americans are primarily interested in the domestic implications of Trump's presidency whereas people around the globe are more interested in his foreign policy's implications Both remain puzzled by Trump's mixed messaging his tendency to change his mind and make decisions on the impulse of the moment The findings indicate that by scuttling US adherence to the Iran Accord Trump has guaranteed its collapse and contributed to an already volatile Middle East Trump recognition of Jerusalem as the capital of Israel brought an international crisis Under international law and countless decisions by the UN the final status of Jerusalem should be decided by negotiation not unilateral action by the United States or Israel The Abraham Peace Accord with the four normalizing relations agreements which were signed between Israel and the United Arab Emirates Bahrain Sudan and Morocco mark a new and important shift in the Middle East geopolitics it can be considered as a success for Trump's foreign policy      **Preponderance in U.S. Foreign Policy** Graham Slater, 2018-12-12 Preponderance in US Foreign Policy examines the factors that contribute to the presence and severity of blunders in US foreign policy focusing primarily on ideational variables inherent in the American identity It presents a theory for their recurrence in accordance with those variables and the pursuit of the grand strategy of preponderance      *Worldviews of Aspiring Powers* Henry R. Nau, Deepa M. Ollapally, 2012-10-03 *Worldviews of Aspiring Powers* provides a serious study of the domestic foreign policy debates in five world powers who have gained more influence as the US's has waned China Japan India Russia and Iran Featuring a leading regional scholar for each essay each essay identifies the most important domestic schools of thought nationalists realists globalists idealists exceptionalists and connects them to the historical and institutional sources that fuel each nation's foreign policy experience While scholars have applied this approach to US foreign policy this book is the first to track the competing schools of foreign policy thought within five of the world's most important rising powers Concise and systematic *Worldviews of Aspiring Powers* will serve as both an essential resource for foreign policy scholars trying to understand international power transitions and as a text for courses that focus on the same      **Turkish Foreign Policy and Turkish Identity** Yucel Bozdaglioglu, 2004-06 Annotation By using the core insights of the constructivist approach in international relations this book analyses the foreign policy behaviour of Turkey The author argues that Turkey's Western identity has influenced its foreign policy formulation and implementation since the War of Independence      Bulletin ,1992      **EU Foreign Policy and Crisis**

**Management Operations** Benjamin Pohl, 2014-03-21 This book explores the drivers of the EU's recent forays into peace and state building operations. Since the Union's European Union Common Security and Defence Policy (ESDP) became operational in 2003, the EU has conducted more than 20 civilian and military operations that broadly served to either deter aggression in host countries and/or to build or strengthen the rule of law. This sudden burst of EU activity in the realm of external security is interesting from both a scholarly and a policy perspective. On one hand, institutionalised cooperation in the field of foreign security and defence policy challenges the mainstream in IR theory which holds that in such sovereignty sensitive areas cooperation would necessarily be limited. On the other hand, the sheer quantity of operations suggests that the ESDP may represent a potentially significant feature of global governance. In order to understand the drivers behind CSDP, EU Foreign Policy and Crisis Management Operations analyses the policy output in this area, including the operations conducted in the CSDP framework. Up until now, many studies inferred the logic behind CSDP from express intentions, institutional developments and the potential of pooled capabilities. By mining the rich data that CSDP operations represent in terms of the motives and ambitions of EU governments for the CSDP, this book advances our understanding of the framework at large. This book will be of much interest to students of European Security, EU policy, peacebuilding, statebuilding and IR.

**Perils of Plenty** Jonathan N. Markowitz, 2020 Among scholars who focus on the politics of natural resources, conventional wisdom asserts that resource scarce states have the strongest interest in securing control over resources. Counterintuitively, however, in *Perils of Plenty* Jonathan N. Markowitz finds that the opposite is true. In actuality, what states make influences what they want to take. Specifically, Markowitz argues that the more economically dependent states are on resource extraction rents for income, the stronger their preferences will be to secure control over resources. He tests the theory with a set of case studies that analyze how states reacted to the 2007 exogenous climate shock that exposed energy resources in the Arctic. Given the dangerous potential for conflict escalation in the Middle East and the South China Sea and the continued shrinkage of the polar ice cap, this book speaks to a genuinely important development in world politics that will have implications for understanding the political effects of climate change for many years to come.

**US Foreign Policy in Action** Jeffrey S. Lantis, 2012-10-25 This innovative teaching text on United States foreign policy interprets the foreign policy decision making process through the lens of political debate and exchange. It introduces historical developments and theories of U.S. foreign policy and engages students in the politics of the foreign policy process through innovative learning exercises. Features critical analysis of contemporary trends in U.S. foreign policy, including debates in the Obama administration, foreign policy and the 2012 presidential election, and reaction to the Arab Spring. Written by an award-winning teacher-scholar in international relations with extensive experience in both policy making and pedagogy. Views foreign policy decision making through the lens of political debate. Offers fresh perspectives on historical developments as well as surveying prominent foreign policy theories. Includes new and innovative participatory learning exercises exploring a range of themes, including

executive legislature conflict Contains extensive teaching and learning applications including discussion questions document templates worksheets suggested readings and links to web resources throughout

**Power, Perception and Foreign Policymaking** Scott Brown, 2017-11-13 This book examines the changing dynamics of power in the international arena since the end of the Cold War Brown engages in analysis of how the United States and the European Union have responded to the so called rise of China through an examination of how policymakers perceptions of China have changed over time and influenced their policy choices This study undertakes rigorous analysis of how these perceptions have evolved between 1989 and 2009 2016 offering a comparative perspective on the similarities and differences between the policy discourse and behaviour within these two Western powers Brown argues that China's rise is a contested notion with varied perceptions of how the implications of China's ascendancy have shaped policy preferences in ways that are inconsistent with concerns over the threat of an impending power transition Combining concepts and methods derived from IR and FPA the book examines the linkages between great power politics and policymakers competing interpretations of key international actors and their influence upon foreign policies The main objective of the study is to illuminate the different ways in which the US and the EU have responded to the rise of China through a close analysis of their decision making processes and outcomes across a series of key encounters and events including the transatlantic debate over the EU's proposal to lift its China arms embargo 2003 2005 Undertaking qualitative analysis of the development of American and European policymakers perceptions of China this book will be of interest to graduates and scholars of post Cold War international politics Foreign Policy Analysis policymaking US China relations and EU China relations

*Theorising NATO* Mark Webber, Adrian Hyde-Price, 2015-11-19 Scholarship on NATO is often preoccupied with key episodes in the development of the organisation and so for the most part has remained inattentive to theory This book addresses that gap in the literature It provides a comprehensive analysis of NATO through a range of theoretical perspectives that includes realism liberalism and constructivism and lesser known approaches centred on learning public goods securitisation and risk Focusing on NATO's post Cold War development it considers the conceptualisation purpose and future of the Alliance This book will be of interest to students and scholars of international organisation international relations security and European Politics

*Great Powers' Foreign Policy*, 2022-12-19 By comparing the great powers foreign policy this book investigates the global competition and revisionist attempts to dismantle the Western liberal order Since February 2022 the international system has been challenged by the Russian invasion in Ukraine and its profound multiple consequences Putin's War has reinvented the West But still this is not the end of history To illustrate that tensions between democratic and autocratic great powers are nowadays at their peak since the end of the Cold War one should consider President Biden's words in Warsaw referring to President Putin For God's sake this man cannot remain in power

*American Foreign Policy and Political Ambition* James Lee Ray, 2013-08-20 In his eagerly awaited second edition of *American Foreign Policy and Political Ambition* James Ray revisits his deceptively simple premise that the highest

priority of leaders is to stay in power Looking at how political ambition and domestic pressures impact foreign policymaking is the key to understanding how and why foreign policy decisions are made The text begins by using this analytic approach to look at the history of foreign policymaking and then examines how various parties inside and outside government influence decision making In a unique third section the book takes a regional approach not only covering trends other books tend to miss but giving students the opportunity to think comprehensively about how issues intersect around the globe from human security and democratization to globalization and pollution Guided by input from adopters and reviewers Ray has thoroughly re organized the book and streamlined some coverage to better consolidate the historical institutional regional and topical chapters and focus the thematic lens of the book Ray has also brought the book fully up to date addressing the latest events in American foreign policy including the wars in Afghanistan and Iraq the killing of Bin Laden the WikiLeaks scandal and its aftermath the impact of social media on foreign policy and world affairs nuclear proliferation developments in U S Russian relations climate change and more
