## **Forgetting Myths Perils And Compensations:**

**Forgetting** D. Draaisma, 2015-01-01 Does forgetting signal a failing mind What can be done to ward off forgetfulness Is there an upside to forgetting In his highly praised book *The Nostalgia Factory* renowned memory scholar Douwe Draaisma explored the puzzling logic of memory in later life with humor and deep insight In this compelling new book he turns to the miracle of forgetting Far from being a defect that may indicate Alzheimer's or another form of dementia Draaisma claims forgetting is one of memory's crucial capacities In fact forgetting is essential Weaving together an engaging array of literary historical and scientific sources the author considers forgetting from every angle He pierces false clichés and asks important questions Is a forgotten memory lost forever What makes a colleague remember an idea but forget that it was yours Draaisma explores first memories of young children how experiences are translated into memory the controversies over repression and recovered memories and weird examples of memory dysfunction He movingly examines the impact on personal memories when a hidden truth comes to light In a persuasive conclusion the author advocates the undervalued practice of the art of forgetting a set of techniques that assist in erasing memories thereby preserving valuable relationships and encouraging personal contentment

**Forgetful Remembrance** Guy Beiner, 2018-11-10 *Forgetful Remembrance* examines the paradoxes of what actually happens when communities persistently endeavour to forget inconvenient events The question of how a society attempts to obscure problematic historical episodes is addressed through a detailed case study grounded in the north eastern counties of the Irish province of Ulster where loyalist and unionist Protestants and in particular Presbyterians repeatedly tried to repress over two centuries discomfiting recollections of participation alongside Catholics in a republican rebellion in 1798 By exploring a rich variety of sources Beiner makes it possible to closely follow the dynamics of social forgetting His particular focus on vernacular historiography rarely noted in official histories reveals the tensions between professed oblivion in public and more subtle rituals of remembrance that facilitated muted traditions of forgetful remembrance which were masked by a local culture of reticence and silencing Throughout *Forgetful Remembrance* comparative references demonstrate the wider relevance of the study of social forgetting in Northern Ireland to numerous other cases where troublesome memories have been concealed behind a veil of supposed oblivion

**Shakespeare and Forgetting** Peter Holland, 2021-06-03 What does it signify when a Shakespearean character forgets something or when Hamlet determines to wipe away all trivial fond records How might forgetting be an act to be performed or be linked to forgiveness such as when in *The Winter's Tale* Cleomenes encourages Leontes to forget your evil With them forgive yourself And what do we as readers and audiences forget of Shakespeare's works and of the performances we watch This is the first book devoted to a broad consideration of how Shakespeare explores the concept of forgetting and how forgetting functions in performance A wide ranging study of how Shakespeare dramatizes forgetting it offers close readings of Shakespeare's plays considering what Shakespeare forgot and what we forget about Shakespeare The book touches on an equally broad range of

forgetting theory from antiquity through to the present day of forgetting in recent novels and films and of creative ways of making sense of how our world constructs the cultural meaning of and anxiety about forgetting Drawing on dozens of productions across the history of Shakespeare on stage and film the book explores Shakespeare's dramaturgy from characters who forget what they were about to say to characters who leave the stage never to return from real forgetting to performed forgetting from the mad to the powerful from playgoers to Shakespeare himself Spectral Memories of Post-crash Iceland Vera Knútsdóttir, 2023-12-04 How does the spectre appear in Icelandic literature and visual art created in the aftermath of the economic crash in Iceland in 2008 Why does it emerge at that specific point in time and what can it tell us about repressed collective memories in Iceland The book explores how the crash becomes an implicit background setting in novels that address the silences and gaps of the family archive and how crime fiction employs generic features of horror to explicitly tackle the ghosts residing in the lost homes of the financial crash Spectral space is an apparent theme of cultural memories produced in times of crisis and the book explores how this is made apparent in visual art of the period

**Traumatised Witnesses in International Criminal Trials** Suzanne Schot, 2024-02-13 This book focuses on the testimonial evidence of traumatised witnesses in trials of international crimes which deal with acts of genocide war crimes and crimes against humanity Such trials often involve the testimonies of those who experienced or witnessed extremely traumatic events which can make it hard for these witnesses to recall specific details Testifying during trial may in itself also pose challenges to their well being Yet the legal process of determining whether someone can be held criminally responsible for the alleged crimes needs to be fair in accordance with the right to a fair trial of the accused and the facts need to be determined as accurately as possible This book argues that to ensure fair and accurate fact finding when in particular traumatised witnesses testify a balance needs to be struck between the needs of witnesses who testify about traumatic experiences the fair trial rights of the accused and the objective of the court to establish as accurately as possible the responsibility of the accused This is crucial throughout the stages of selecting preparing presenting and assessing the testimonial evidence of traumatised witnesses The methodology involves an analysis of transcripts of proceedings and case law of the International Criminal Tribunal for the former Yugoslavia the International Criminal Court and Dutch courts prosecuting international crimes The research demonstrates that it is often difficult to strike a balance between the competing objectives during proceedings when traumatised witnesses testify due to the current lack of regulations and guidelines applicable during investigations and prosecutions This book shows that this balance can and should be achieved when traumatised witnesses testify during criminal proceedings for international crimes The work is an invaluable resource for researchers academics and practitioners in criminal law criminology legal psychology legal psychiatry social anthropology and forensic sciences **Memory on My Doorstep** Sarah Gensburger, 2019-03-11 In depth case study of memorialisation processes after the November 2015 Paris attacks On November 13 2015 three gunmen opened fire in the Bataclan concert

hall at 50 Boulevard Voltaire in Paris and subsequently held the venue under a three hour siege This was the largest in a series of coordinated terrorist attacks that eventually killed 130 people and injured 500 During the aftermath of these attacks expressions of mourning and trauma marked and invariably transformed the urban landscape Sarah Gensburger a sociologist working on social memory and its localisation lives with her family on the Boulevard Voltaire and has been studying the city of Paris as her primary field site for several years This time memorialisation was taking place on her doorstep Both a diary and an academic work this book is a chronicle of this grassroots memorialisation process and an in depth analysis of the way it has been embedded in the everyday lives of the author neighbours other Parisians and tourists **On Dangerous**

**Ground** Diane O'Donoghue, 2018-10-18 Winner of the 2019 Robert S Liebert Award established jointly by the Association for Psychoanalytic Medicine and the Columbia University Center for Psychoanalytic Training and Research In the final years of the 19th century Sigmund Freud began to construct evidence for the workings of an unconscious On Dangerous Ground offers an innovative assessment of the complex role that his encounters with visual cultures architecture objects from earlier cultural epochs antiquities paintings and illustrated books played in that process Diane O Donoghue introduces often using unpublished archival sources the ways in which material phenomena profoundly informed Freud's decisions about what would and would not constitute the workings of an inner life By returning to view content that Freud treated as forgettable as distinct from repressed O Donoghue shows us a realm of experiences that Freud wished to remove from psychical meaning These erasures form an amnesic core within Freud's psychoanalytic project an absence that includes difficult aspects of his life narrative beginning with the dislocations of his early childhood that he declared not worth remembering What is made visible here is far from the inconsequential surface of experience rather we are shown a dangerous ground that exceeds the limits of what Freud wished to include within his early model of mind In Freud's relation to visual cultures we find clues to what he attempted in crafting his unconscious to remove from sight The Godman and the Sea Michael J. Thate, 2019-10-04 If scholars no longer necessarily find the essence and origins of what came to be known as Christianity in the personality of a historical figure known as Jesus of Nazareth it nevertheless remains the case that the study of early Christianity is dominated by an assumption of the force of Jesus's personality on divergent communities In The Godman and the Sea Michael J Thate shifts the terms of this study by focusing on the Gospel of Mark which ends when Mary Magdalene Mary the mother of James and Salome discover a few days after the crucifixion that Jesus's tomb has been opened but the corpse is not there Unlike the other gospels Mark does not include the resurrection portraying instead loss puzzlement and despair in the face of the empty tomb Reading Mark's Gospel as an exemplary text Thate examines what he considers to be retellings of other traumatic experiences the stories of Jesus's exorcising demons out of a man and into a herd of swine his stilling of the storm and his walking on the water Drawing widely on a diverse set of resources that include the canon of western fiction classical literature the psychological study of trauma phenomenological philosophy the new materialism

psychoanalytic theory poststructural philosophy and Hebrew Bible scholarship as well as the expected catalog of New Testament tools of biblical criticism in general and Markan scholarship in particular The Godman and the Sea is an experimental reading of the Gospel of Mark and the social force of the sea within its traumatized world More fundamentally however it attempts to position this reading as a story of trauma ecstasy and what has become through the ruins of past pain

**The Discovery of Mind** Ardi Roelofs, 2024-10-18 This book presents a concise history of the scientific discovery of the mind Although people have speculated about the nature and functioning of their minds for thousands of years it was only about 200 years ago that they replaced the philosophical armchair with the laboratory and began to investigate the mind scientifically Surprisingly the work of one of the founders of scientific psychology Wilhelm Wundt 1832 1920 has been largely forgotten despite its relevance to current psychology Taking a fresh look at history this book discusses important empirical and theoretical discoveries made in the few decades before and in the 150 years after the publication of Wundt's groundbreaking monograph *Grundz ge der physiologischen Psychologie* in 1874 Crucial evidence from past behavioral and patient studies to recent neuroimaging is synthesized to support a thought provoking account of key aspects of the human mind

**Memory and Remembering in Early Irish Literature** Sarah Künzler, 2023-12-04 Ireland possesses an early and exceptionally rich medieval vernacular tradition in which memory plays a key role What attitudes to remembering and forgetting are expressed in secular early Irish texts How do the texts conceptualise the past and what does this conceptualisation tell us about the present and future Who mediates and validates different versions of the past and how is future remembrance guaranteed This study approaches such questions through close readings of individual texts It centres on three major aspects of medieval Irish memory culture places and landscapes the provision of information about the past by miraculously old eye witnesses and the personal social and cultural impact of forgetting The discussions shed light on the relationship between memory and forgetting and explore the connections between the past present and future This shows the fascinating spatio temporal identity constructions in medieval Ireland and links the Irish texts to the broader European world The monograph makes this rich literary sources available to an interdisciplinary audience and is of interest to both a general medievalist audience and those working in Cultural Memory Studies

**The Last Ocean** Nicci Gerrard, 2019 From the award winning journalist and author a lyrical raw and humane investigation of dementia that explores both the journeys of the people who live with the condition and those of their loved ones After a diagnosis of dementia Nicci Gerrard's father John continued to live life on his own terms alongside the disease But when an isolating hospital stay precipitated a dramatic turn for the worse Gerrard an award winning journalist and author recognized that it was not just the disease but misguided protocol and harmful practices that cause such pain at the end of life Gerrard was inspired to seek a better course for all who suffer because of the disease The Last Ocean is Gerrard's investigation into what dementia does to both the person who lives with the condition and to their caregivers Dementia is now one of the leading causes of death in the West and this necessary

book will offer both comfort and a map to those walking through it While she begins with her father s long slip into forgetting Gerrard expands to examine dementia writ large Gerrard gives raw but literary shape both to the unimaginable loss of one s own faculties as well as to the pain of their loved ones Her lens is unflinching but Gerrard honors her subjects and finds the beauty and the humanity in their seemingly diminished states In so doing she examines the philosophy of what it means to have a self as well as how we can offer dignity and peace to those who suffer with this terrible disease Not only will it aid those walking with dementia patients The Last Ocean will prompt all of us to think on the nature of a life well lived

Evolutionary Bioinformatics Donald R. Forsdyke, 2016-04-27 Now in its third edition and supplemented with more online material this book aims to make the new information based rather than gene based bioinformatics intelligible both to the bio people and the info people Books on bioinformatics have traditionally served gene hunters and biologists who wish to construct family trees showing tidy lines of descent While dealing extensively with the exciting topics of gene discovery and database searching such books have hardly considered genomes as information channels through which multiple forms and levels of information have passed through the generations This new bioinformatics contrasts with the old gene based bioinformatics that so preoccupies previous texts Forms of information that we are familiar with mental textual are related to forms with which we are less familiar hereditary The book extends a line of evolutionary thought that leads from the nineteenth century Darwin Butler Romanes Bateson through the twentieth Goldschmidt White and into the twenty first the final works of the late Stephen Jay Gould Long an area of controversy diverging views may now be reconciled

**The Things We Live With** Gemma Nisbet, 2023-10-03 A meditation on the burden and joy of inheritance and the strange power of the objects and keepsakes that connect us This is how I became interested in things In their strange pull and power in the ways they hold on to us and we to them After her father dies of cancer Gemma Nisbet is inundated with keepsakes connected to his life by family and friends As she becomes attuned to the ways certain items can evoke specific memories or moments she begins to ask questions about the relationships between objects and people Why is it so difficult to discard some artefacts and not others Does the power exerted by precious things influence the ways we remember the past and perceive the future As Nisbet considers her father s life and begins to connect his experiences of mental illness with her own she wonders whether hanging on to stuff is ultimately a source of comfort or concern Intimate and wide ranging The Things We Live With is a collection of essays about how we learn to live with the things handed down in families which we carry throughout our lives not only material objects but also grief memory anxiety and depression It s about notions of home and restlessness inheritance and belonging and above all the ways we tell our stories to ourselves and other people The Things We Live With is a tender cartography of grief and familial legacy in which Gemma Nisbet elegantly explores how the maps we make whether by story memory art or artefact inevitably fall shy of the territory Josephine Rowe What are we to make of all these things around us And what are they to make of us Delicately as if unpacking a box of fragile treasures Nisbet cups in her

hands and presents us with a series of relationships with old loved things with her family and her own crushable centre They are all it turns out well kept in the same box Nisbet wraps her meditations in soft words and firm intelligence and in this wonderful digressive and intently considered work she uncovers the tender meaning of possessions and what it is to be possessed by them too As a devoted keeper of objects I read this book with recognition and envy and anyone who inherits hoards abhors or adores the relics of their lives will appreciate Nisbet's candour and contemplations Kate Holden Wise profound and with tender humour The Things We Live With expands our thinking about the power of objects to shape our sense of self anchor our memories and reflect our place in the world In these superb engrossing essays Gemma Nisbet draws us in close as she examines what we hold onto what we let go and the complex relationships between the tangible and intangible A moving portrayal of grief love and legacy this is a collection to treasure Vanessa Berry
