Curable Love Limitless Potential Homeopathy:

Homeopathy Jay W. Shelton, 2010-10-29 The popularity of homeopathy has been increasing dramatically both in America and worldwide Annual world sales of homeopathic remedies are approaching two billion dollars In this thorough examination of homeopathy physicist Jay W Shelton analyzes the history the remedies the logical inconsistencies and the effectiveness of this popular alternative medicine Invented by German physician Samuel Hahnemann 1755 1843 homeopathy is based on two key principles 1 the law of similars symptoms induced in healthy volunteers after ingestion of a substance are the same symptoms in sick people that this substance will cure and 2 the concept of potentization the most diluted remedies have the greatest curative power Shelton clearly shows that although these principles may have had the ring of science in the early 19th century they are not well supported by today's science And yet most patients who visit homeopaths are better afterwards Homeopaths assume the remedies are the cause Shelton finds explanations based on known science to be better supported by the evidence Unassisted natural healing changes in lifestyle urged by the homeopath the placebo effect and cessation of harmful treatments are more probable causes of improved health This being the case he pursues the question why so many people continue to believe that the remedies themselves are responsible Among the contributing factors Shelton notes the plausible sounding explanations of homeopathic theory a fundamental misunderstanding among homeopaths of science and its methods and ultimately the poor quality of education in critical thinking and science This reasoned balanced and in depth assessment will interest both homeopaths and conventional medical practitioners as well as consumers curious about a well known and much publicized alternative medicine [Tours and Cures of a Lightsoldier](#)
