## **Curious Bones Mary Anning And The Birth Of Paleontology Great Scientists:**

**Curious Bones** Thomas W. Goodhue, 2002 Recounts the life and work of Mary Anning who collected fossils throughout her life and made major discoveries in paleontology when that branch of science was first emerging **Geologists** William B. Rice, 2008-07 People have been interested in Earth for nearly as long as they've lived on it Early scientists wanted to find out how old Earth was how land formations were made and what they were made of Others were interested in fossils rocks and minerals These studies helped teach people what Earth looked like millions of years ago and what it might look like in the future For more information on geology and geologists read *Rocks and Minerals* another book in the Mission Science series **The Fossil Hunter** Shelley Emling, 2009-10-13 At a time when women were excluded from science a young girl made a discovery that marked the birth of paleontology and continues to feed the debate about evolution to this day Mary Anning was only twelve years old when in 1811 she discovered the first dinosaur skeleton of an ichthyosaur while fossil hunting on the cliffs of Lyme Regis England Until Mary's incredible discovery it was widely believed that animals did not become extinct The child of a poor family Mary became a fossil hunter inspiring the tongue twister *She Sells Sea Shells by the Seashore* She attracted the attention of fossil collectors and eventually the scientific world Once news of the fossils reached the halls of academia it became impossible to ignore the truth Mary's peculiar finds helped lay the groundwork for Charles Darwin's theory of evolution laid out in his *On the Origin of Species* Darwin drew on Mary's fossilized creatures as irrefutable evidence that life in the past was nothing like life in the present A story worthy of Dickens *The Fossil Hunter* chronicles the life of this young girl with dirt under her fingernails and not a shilling to buy dinner who became a world renowned paleontologist Dickens himself said of Mary The carpenter's daughter has won a name for herself and deserved to win it Here at last Shelley Emling returns Mary Anning of whom Stephen J Gould remarked is probably the most important unsung or inadequately sung collecting force in the history of paleontology to her deserved place in history [Dinosaurs and Other Extinct Saurians](#) Richard Moody, 2010 The discovery of dinosaurs and other large extinct saurians a term under which the Victorians commonly lumped ichthyosaurs plesiosaurs pterosaurs and their kin makes exciting reading and has caught the attention of palaeontologists historians of science and the general public alike The papers in this collection go beyond the familiar tales about famous fossil hunters and focus on relatively little known episodes in the discovery and interpretation from both a scientific and an artistic point of view of dinosaurs and other inhabitants of the Mesozoic world They cover a long time span from the beginnings of modern scientific palaeontology in the 1700s to the present and deal with many parts of the world from the Yorkshire coast to Central India from Bavaria to the Sahara The characters in these stories include professional palaeontologists and geologists some of them well known others quite obscure explorers amateur fossil collectors and artists linked together by their interest in Mesozoic creatures *Rebels, Scholars, Explorers* Annalisa Berta, Susan Turner, 2020-10-27 Unearthing the amazing hidden stories of women who changed paleontology forever For

centuries women have played key roles in defining and developing the field of vertebrate paleontology Yet very little is known about these important paleontologists and the true impacts of their contributions have remained obscure In *Rebels Scholars Explorers* Annalisa Berta and Susan Turner celebrate the history of women bone hunters delving into their fascinating lives and work At the same time they explore how the discipline has shaped our understanding of the history of life on Earth Berta and Turner begin by presenting readers with a review of the emergence of vertebrate paleontology as a science emphasizing the contributions of women to research topics and employment This is followed by brief biographical sketches and explanations of early discoveries by women around the world over the past 200 years including those who held roles as researchers educators curators artists and preparators Forging new territory Berta and Turner highlight the barriers and challenges faced by women paleontologists describing how some managed to overcome those obstacles in order to build careers in the field Finally drawing on interviews with a diverse group of contemporary paleontologists who share their experiences and offer recommendations to aspiring fossil hunters they provide perspectives on what work still needs to be done in order to ensure that women's contributions to the field are encouraged and celebrated Uncovering and relating lost stories about the pivotal contributions of women in vertebrate paleontology doesn't just make for enthralling storytelling but also helps ensure a richer and more diverse future for this vibrant field Illuminating the discoveries collections and studies of fossil vertebrates conducted by women in vertebrate paleontology *Rebels Scholars Explorers* will be on every paleontologist's most wanted list and should find a broader audience in the burgeoning sector of readers from all backgrounds eager to learn about women in the sciences

**A to Z of Women in Science and Math** Lisa Yount, 2007 From ancient times to the present day scientifically inclined women in many cultures have had to battle against the traditional belief that men are more cognitively adept than women At times throughout history women were persecuted for their attempts to break down traditional gender barriers Today women scientists and mathematicians must continue to defend the quality of their work and demand the respect they deserve in the mathematical and scientific communities *A to Z of Women in Science and Math* Revised Edition profiles 195 women who fought against these stereotypes throughout history and all over the world to forge new discoveries and theories that would eventually change the way we view science This thoroughly revised book updates the story of each individual to the present day and features 38 new profiles Among the profiles included are those of chemists astronomers geologists environmental scientists and a range of other professions and careers In addition new photographs have been added and the bibliography has been updated Subject indexes allow the reader to search by such professions as microbiology and paleontology Additional subject indexes organize individuals by country of birth country of major scientific activity and year of birth

**Contradiction Studies - Exploring the Field** Gisela Febel, Kerstin Knopf, Martin Nonhoff, 2023-04-05 Contradiction is a core concept in the humanities and the social sciences Beside the classical ideas of logical or dialectical contradiction instances of lived contradiction and strategies of coping with it are objects of this study

Contradiction Studies discuss the many ways in which explicit or implicit contradictions are negotiated in different political or cultural settings This volume collects articles that tackle the concept of contradiction practices of contradicting and lived contradictions from a number of relevant perspectives and assembles contributions from linguistics literary studies philosophy political science and media studies

**The Hummingbird Cabinet** Judith Pascoe, 2006 This book is a romantic history of romantic collecting It takes seriously and by necessity shares the tendency of romantic histories to dwell upon their own fragmentariness on the impossibility of capturing an intact history It traces the particular ways in which objects stepped into the lives of romantic collectors and also the ways in which the objects moved on from the Introduction In the late eighteenth and early nineteenth centuries the activity of collecting became democratized and popularized allowing all kinds of people to become caught up in the collecting obsessions of the period birds books Napoleonic relics botanical specimens Egyptiana and fossils Judith Pascoe invites readers to contemplate the ongoing allure of romantic collections Pascoe maintains that romanticism as a literary movement played a crucial supporting role in varied attempts by collectors of this era to fashion identities for themselves through collecting She links the collecting craze during the period with the subsequent fetishization of romantic poets and their possessions revealing the extent to which an ongoing fascination with material objects with Keats's hair and Shelley's guitar for example helped to produce an enduring image of these poets as spiritual emissaries of a less materialistic age In language both witty and idiosyncratic Pascoe makes the case that the romantic period stands out as a distinct moment in collecting history a transition between the flourishing of the Renaissance wonder cabinet and the rise of the Victorian museum

**School Library Journal**, 2007-05 *Discoveries and Inventions in Literature for Youth* Joy L. Lowe, Kathryn I. Matthew, 2004-03-03 A compilation of books and other resources that are appropriate for students in kindergarten through twelfth grade

**Readings in Science Methods, K-8** Eric Brunzell, 2008 If you're teaching an introductory science education course in a college or university *Readings in Science Methods K-8* with its blend of theory research and examples of best practices can serve as your only text your primary text or a supplemental text

**The Horn Book Guide to Children's and Young Adult Books**, 2003 [Dictionary Of Nineteenth-Century of British Scientists](#) Bernard Lightman, 2004 This dictionary contains 1200 entries on figures who had an impact on British science in the 19th century By examining how the theories and practices of scientists were shaped by Victorian beliefs about religion gender imperialism and politics it examines the development of science

[To Her Credit](#) Kaitlin Culmo, Emily McDermott, 2023-08-01 There's history as it's told and then there's history as it actually happened You may think you know the stories behind the world's most well-known groundbreaking achievements but *To Her Credit* is here to make you reevaluate our collective story as it has been written This book celebrates the stories of women from ancient times until the 1990s whose contributions have been overwritten and far too often accredited to men The pattern of female achievements being stolen overwritten or straight up ignored is as old as time Authors Kaitlin Culmo and Emily McDermott with stunning

art by Kezia Gabriella reclaim the work of these deserving heroines and offer reminders of what we lose when we don't question history as it has been written. We're often told that Cervantes invented fiction with the novel *Don Quixote* in 17th century Europe but what about Lady Murasaki's *The Tale of Genji* in 11th century Japan? Elvis Presley is widely considered as The King and for all intents and purposes the inventor of rock and roll music. But what about Sister Rosetta Tharpe who was the first to engineer the rock and roll sound or Big Mama Thornton for whom the song *Hound Dog* was explicitly written? Albert Einstein is a household name and so too is his famed equation  $E=mc^2$ . But what about his first wife Mileva Mari who not only helped with the Nobel Prize winning discovery but also collaborated with Albert throughout the pivotal early years of his career? This book tells the stories of women who have been left out of history's accolades. It's time to talk about the thousands of years worth of art, inventions, innovations, and world-changing achievements made by women that have been ascribed to men.

**Fossil Hunter** Thomas W. Goodhue, 2004 Description: This is the first modern biography of Mary Anning of Lyme Regis, England, the first woman and one of the very first professional paleontologists. Goodhue's research fills in the personal and professional accomplishments of this eminent Victorian.

**The Advent of Electricity (1800 - 1900)** Charlie Samuels, 2010-08-01 This book covers the scientific developments of the 19th century, the great age of the machine when factory chimneys rose above industrial towns. Manufacturers constantly improved technology to get a commercial advantage. Meanwhile, other scientists began to explore fundamental questions about the nature of humans and their ancestors. Fun features such as sidebars and timelines allow for multiple learning opportunities.

**Earth Sciences History**, 2003

**Children's Books in Print, 2007**, 2006

**Foreign Bodies: Poems** Kimiko Hahn, 2020-03-03 A striking shapeshifting volume from one of the most fascinating female poets of our time. *BOMB* Inspired by her encounter with Dr. Chevalier Jackson's collection of ingested curiosities at Philadelphia's Mutter Museum, Kimiko Hahn's tenth collection investigates the grip that seemingly insignificant objects exert on our lives. Itself a cabinet of curiosities, the collection provokes the same surprise, wonder, and pangs of recognition Hahn felt upon opening drawer after drawer of these swallowed and retrieved objects: a radiator key, a child's perfect attendance pin, a mother of pearl button. The speaker of these moving poems sees reflections of these items in the heartbreaking detritus of her family home and in her long dead mother's Japanese jewelry. As Hahn remakes the lyric sequence in chains reminiscent of the Japanese tanka, the foreign bodies of the title expand to include the immigrant woman's trafficked body, fossilized remains, a grandmother's Japanese body. She explores the relationship between our innermost selves and the relics of our vanished past, making room for meditation on grief and the ephemeral nature of the material world for the account of a nineteenth-century female fossil hunter and for a celebration of the nautilus. *Foreign Bodies* investigates the power of possession, replete with Hahn's electric originality and thrilling mastery of ever-changing forms.
