Handbook of Evolutionary Thinking in the Sciences Thomas Heams, Philippe Huneman, Guillaume Lecointre, Marc Silberstein, 2014-11-23 The Darwinian theory of evolution is itself evolving and this book presents the details of the core of modern Darwinism and its latest developmental directions The authors present current scientific work addressing theoretical problems and challenges in four sections beginning with the concepts of evolution theory its processes of variation heredity selection adaptation and function and its patterns of character species descent and life The second part of this book scrutinizes Darwinism in the philosophy of science and its usefulness in understanding ecosystems whilst the third section deals with its application in disciplines beyond the biological sciences including evolutionary psychology and evolutionary economics Darwinian morality and phylolinguistics The final section addresses anti-Darwinism the creationist view and issues around teaching evolution in secondary schools The reader learns how current experimental biology is opening important perspectives on the sources of variation and thus of the very power of natural selection This work examines numerous examples of the extension of the principle of natural selection and provides the opportunity to critically reflect on a rich theory on the methodological rigour that presides in its extensions and exportations and on the necessity to measure its advantages and also its limits Scholars interested in modern Darwinism and scientific research its concepts research programs and controversies will find this book an excellent read and those considering how Darwinism might evolve how it can apply to the human sciences and other disciplines beyond its origins will find it particularly valuable Originally produced in French *Les Mondes Darwiniens* the scope and usefulness of the book have led to the production of this English text to reach a wider audience This book is a milestone in the impressive penetration by Francophone scholars into the world of Darwinian science its historiography and philosophy over the last two decades Alex Rosenberg R Taylor Cole Professor of Philosophy Duke University Until now this useful and comprehensive handbook has only been available to francophones

Thanks to this invaluable new translation this collection of insightful and original essays can reach the global audience it deserves Tim Lewens University of Cambridge *The Compact Compendium of Experimental Philosophy* Alexander Max Bauer, Stephan Kornmesser, 2023-11-20 The relatively new movement of Experimental Philosophy applies different systematic experimental methods to further illuminate classical philosophical issues This book brings together experts from the field to give the reader a compact yet extensive overview offering a ready at hand introduction to the state of the art **Bound** Shaun Nichols, 2015-01-08 The problem of free will arises from ordinary commonsense reflection Shaun Nichols examines these ordinary attitudes from a naturalistic perspective He offers a psychological account of the origins of the problem of free will According to his account the problem arises because of two naturally emerging ways of thinking about ourselves and the world one of which makes determinism plausible while the other makes determinism implausible Although contemporary cognitive science does not settle whether choices are determined Nichols argues that our belief in indeterminist choice is grounded in faulty inference and should be regarded as unjustified However even if our belief in indeterminist choice is false it is a further substantive question whether that means that free will doesn't exist Nichols argues that because of the flexibility of reference there is no single answer to whether free will exists In some contexts it will be true to say free will exists in other contexts it will be false to say that With this substantive background in place Bound promotes a pragmatic approach to prescriptive issues In some contexts the prevailing practical considerations suggest that we should deny the existence of free will and moral responsibility in other contexts the practical considerations suggest that we should affirm free will and moral responsibility This allows for the possibility that in some contexts it is morally apt to exact retributive punishment in other contexts it can be apt to take up the exonerating attitude of hard incompatibilism
