PLTW Gateway - Curriculum

DEVELOP AND ENCOURAGE STUDENTS' CONTINUED EXCITEMENT
IN STEM

Through topics like coding and robotics, flight and space, and DNA and crime scene analysis, middle school students engage their natural curiosity and imagination in creative problem solving. PLTW Gateway is a strong foundation for further STEM learning in high school and beyond, challenging students to solve real-world challenges, such as cleaning oil spills and designing sustainable housing solutions. Using the same advanced software and tools as those used by the world's leading companies, students learn how to apply math, science, technology, and engineering to their everyday lives.

PLTW Gateway is divided into independent units, assuming a 45-minute class period. PLTW Gateway is designed to be taught in conjunction with a rigorous academic curriculum. Schools that offer the program implement both foundation units and may add any combination of the specialization units.
