by Patrick CuvIELlo, MS, MT

Laboratory professionals will use these reference manuals as concise sources of information. They offer a concentrated review of the most pertinent basic materials. Those preparing to take the certification exam will find the manuals a valuable resource for review and brushing up on their technology studies.

## Topics covered in Volume I include:

- Microscopy
- Hematology
- Urinalysis
- Parasitology
- Serology
- Bacteriology

## Topics covered in Volume II include:

- Clinical Chemistry
- Quality Control
- Immunohematology
- A number of current articles

To write the manuals, the author has drawn upon his experiences as an educator, practicing medical technologist and laboratory director. The manuals cover basic-to-intermediate knowledge. The topics presented are most central to the knowledge areas, without the excess verbiage found in many textbooks.

Both volumes contain several hundred questions and answers found at the end of each topic.

CuvIELlo's reference manuals have been approved for AMTIC continuing education. Each volume is assigned 35 clock hours.
