## De Electronentheorie:

, *The Scientific Correspondence of H.A. Lorentz* A.J. Kox, 2018-07-27 This is the second and final volume of Dutch physicist Hendrik Antoon Lorentz's scientific correspondence with Dutch colleagues including Pieter Zeeman and Paul Ehrenfest. These 294 letters cover multiple subjects ranging from pure mathematics to magneto optics and wave mechanics. They reveal much about their author including Lorentz's surprisingly active involvement in experimental matters in the first decades of his career. Letters are also devoted to general relativity. Lorentz's 1908 lecture on radiation theory and his receipt of the Nobel Prize along with Zeeman in 1902. The letters are presented in their original language. Dutch originals are accompanied by English translations. A concise biography of Lorentz is also included. *Bulletin of the American Mathematical Society*, 1905 **Euclides**, 1926 *On the Covariant Derivation of Macroscopic Electrodynamics from Electron Theory* Leendert Gerrit Suttrop, 1968 *International Catalogue of Scientific Literature*, 1902 *Constructing Quantum Mechanics* Anthony Duncan, Michel Janssen, 2019-08-29 *Constructing Quantum Mechanics* is the first of two volumes on the genesis of quantum mechanics. This volume traces the early contributions by Planck, Einstein, and Bohr, all showing the need for drastic changes to the physics of their day. It examines the efforts by Sommerfeld and others to develop a new theory, now known as the old quantum theory. After some striking successes, this theory ran into serious difficulties and ended up serving as the scaffold on which the arch of modern quantum mechanics was built. This volume breaks new ground both in its treatment of the work of Sommerfeld and his associates and by offering new perspectives on classic papers by Planck, Einstein, Bohr, and others. Paying close attention to both primary and secondary sources, *Constructing Quantum Mechanics* provides an in-depth analysis of the heroic struggle to come to terms with the wealth of mostly spectroscopic data that eventually gave us modern quantum mechanics. *Revue Semestrielle Des Publications Mathématiques*, 1903

***International Catalogue of Scientific Literature, 1901-1914***, 1904 ***Bulletin (new Series) of the American Mathematical Society***, 1906 ***Collected Papers*** H. A. Lorentz, 2012-12-06 With the present ninth volume we bring to a conclusion the edition of the *Collected Papers* of Professor H. A. Lorentz. It contains the evidence of his constant activity to promote the interest in science of a larger public in particular of his countrymen by addresses on several occasions by articles in magazines and newspapers and other wise. In a certain way in this part of his work he belongs more particularly to his country; therefore we reproduce it in the original language with the exception of his inaugural address as Leiden professor early in 1878 which readers abroad might be interested in. The sketch of Ludwig Boltzmann in the German language contains a most powerful and deep going survey of the scientific work of this genius. In several places the character of the man's personality rather than that of the scientist reveals itself: his attitude towards various problems and his personal views. In his first address he refers to the value of mathematics; we hear his dislike for too vivid visual speculations and crude hypotheses; his taste for the soberness of mathematical formulae where he argues that the fundamental principles must needs

escape further explanation On page 54 we read what he said about determinism and on page 181 he expresses himself on the relation of matter and mind His intimate feelings on space and time and the aether are touched upon on pages 240 261 274
