By John Russell** Germany,1825 **A Tour in Germany, and Some of the Southern Provinces of the Austrian Empire** John Russell,2015-07-08 Excerpt from *A Tour in Germany and Some of the Southern Provinces of the Austrian Empire* In the Years 1820 1821 1822 The prejudices

of English travellers in favour of their own country are now proverbial and have often exposed them to ridicule sometimes to reproach But if even the gaieties and novelties of Paris fail to remove this feeling of national superiority every one is entitled to a plenary indulgence for railing who has made a long journey in winter through the east of France From Paris to Strasburgh even the professed hunter of curiosities would find little to reward his pursuit and the mere passing traveller who is hastening to a certain point finds nothing at all The tame banks of the Marne which the road accompanies in long stiff stretches as far as Chalons give no relief to the dreariness of the scene the fortifications of Metz are Interesting only to the engineer and in the open country the difference between a French and an English landscape is felt at once About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works

The British and German Worlds in an Age of Divergence (1600-1850) Niels Grüne, Stefan Ehrenpreis, 2024-07-22 The question of whether Britain is apart from or a part of Europe D Abulafia has gained significance in recent years This book reassesses an underexplored field of early modern transnational history the variety of ways in which connections between Britain and German speaking Europe shaped developments After a comprehensive introduction this book is divided into three parts cross border transfers and appropriations of knowledge coping with alterity in intergovernmental contacts

and ideologising the cultural nation The topics range from the exchange of religious and political ideas over court life diplomacy and espionage to literary and philosophical debates Particular attention is paid to the media processes involved and to the practical value of knowledge about the other in different historical contexts The picture emerging from the case studies reveals an intriguing dynamic Mutual interest and ambiguous entanglements deepened precisely at a time when the British and German worlds diverged evermore from each other in terms of social and political structures This fascinating volume sheds new light on Anglo German relations and will be essential reading for students of early modern European history

Inventing the German Nation in Travel Literature, 1738-1839 Karin Baumgartner, 2025 Far into the nineteenth century Germany was not yet a nation state but a conglomeration of principalities The causes and consequences of its belatedness compared to other European countries such as England and France have been much debated The present book breaks new ground by identifying travel literature as an important factor in the forging of a distinct and cohesive German identity well before political unification in 1871 First foreign travelers accounts travelogues guidebooks referred to and treated Germany as a distinct place even though it was still politically divided thus enabling German readers to imagine their fragmented nation as a conceptual whole Second Germans themselves began to explore their homeland and write travelogues that solidified the nascent sense of national identity Ethnographic descriptions from places and peoples far away further aided this process as Germans learned to view themselves through this particular lens Surveying a large corpus of German and some British and French travelogues travel handbooks and popular geographic texts and bringing to bear discourses of nationalism and geography including Edward Soja s seminal concept of Thirdspace Karin Baumgartner reveals what travel writing can tell us about conceptual changes in geographic paradigms and national identity in Germany in the

eighteenth and nineteenth centuries
