The Eclipse of Liberal Protestantism in the Netherlands Tom-Eric Krijger, 2019-09-16 In *The Eclipse of Liberal Protestantism in the Netherlands* Tom Eric Krijger is the first to offer a synthesis of the development of the Protestant modernist movement in Dutch religious social cultural and political life between 1870 and 1940 In historiography the liberal Protestant community is said to have lost appeal and influence in these decades due to a lack of theological clarity inner harmony and organisation Analysing liberal Protestants self perception vis vis Christian orthodoxy self understanding as a faith community attitude towards other alternatives to orthodoxy class consciousness literary criticism political commitment and involvement with foreign mission Krijger challenges this view Making an international comparison he argues that the Dutch modernist movement failed to make headway primarily due to liberal Protestant expectations and discourse

Selected List of Dutch Books Recommended for Libraries Martinus Nijhoff Publishers, 1913

Industrial Retardation in the Netherlands 1830-1850 Richard Griffiths, 2013-03-09 Much modern Le post 1750 economic history is concerned with success in that a vast body of literature focuses its attention upon the experience of industrialisation and economic growth or upon relative differences in performance once the growth process is underway The explanations advanced frequently hinge on those supply and demand factors perceptible during the growth period itself which may have helped or hindered economic progress The problem which arises with this approach is whether those forces attributed with having pulled a country forward were the same as those which in their absence had held it back For example the growth of international demand may be seen as a major stimulus in the economic development of a particular country but its effectiveness as a stimulant may have been contingent upon the prior removal of quite different obstacles to growth In these circumstances it would be quite wrong to attribute lack of earlier development to the absence of international demand Thus the study of a period preceeding discernible growth in a

sector of the economy may tell historians as much about the reasons for subsequent growth as a study of the growth period itself This was my initial reason for choosing to research into the industrial development in the Netherlands in the first half of the nineteenth century that it was an interval in economic history usually interpreted as one of stagnation of missed opportunities and even of economic decline

At Home on the World Markets Joost Jonker, Keetie

Sluyterman, 2001-03-01 The Dutch economy has relied on trade for centuries During the seventeenth century the Netherlands experienced a Golden Age built largely on commercial enterprise and trade continues to be the golden link in the supply chain from producers to consumers Yet we know very little about the business of trade and the people involved in it What was the nature of their work and how did it evolve through the ages In the lavishly illustrated *At Home on the World Markets* Joost Jonker and Keetie Sluyterman look at mercantile dynasties such as the Trips and the Van Eeghens and companies such as the famous Dutch East Indian Company VOC and the modern trading company Hagemeyer that have been largely unstudied They describe the evolution of a unique economic sector that occupies a key position in the supply chain from producers to consumers
