*Dishonest to God* Mary Warnock, 2010-02-09 Here is a pugnacious book by a philosopher who often hits the headlines The book reflects on the nature of religion and how it relates or ought to relate to the rest of life Many people today are totally indifferent to religion but religion is far from dead Indeed religions are intensely defended and aggressively pursued Religion is a cause for dissension and death This is beyond dispute Mary Warnock is concerned with Christianity She argues that to value religion as the essential foundation of morality is a profound and probably dangerous mistake Warnock's overriding purpose is to prise apart religion and morality Judges for example are constantly being asked to pass judgement on moral issues in court Because of The Human Rights Act the law perforce is involved Morality is therefore increasingly a public and not just a private matter This book attempts to clarify the foundation of morality in a society largely indifferent to and ignorant of religion Religion nevertheless emerges as a source of deep and unique imaginative experience **The Eclipse**

**of God** Gerard M. Verschuuren, 2018-05-20 This book was specifically written for all those who feel lost in a world dominated by ideologies that obscure God It is hard to pinpoint one particular cause of how we feel in such Godforsaken times and places but science is likely one of the main perpetrators as some scientists use their scientific authority to churn out with the speed of light books that promote opinions and views that go far beyond their scientific expertise and that rob people of any religious beliefs they might have These prolific writers are inundating the book market magazines and the internet with their message that a state of conflict exists between science and religion and that science is on the winning hand They loudly broadcast through the megaphones of our society their anti religious propaganda 1 Since there was a Big Bang there is no creation 2 Because there is only matter there can be no spirit 3 There is no purpose in life for randomness is all there is 4 There is no God only a god gene 5 Neurons are in complete charge so the mind is an illusion 6 Everything is relative for objective truth just does not exist 7 Morality is only a matter of personal opinions and preferences 8 All in all God is dead If you wonder how you and your religious faith could ever survive in such an environment this is the right book for you Can

We Be Good Without God Buckman, Rob, 2004 Where do our beliefs come from During prayer or meditation are we communicating with God Or does the concept of God originate in our own minds In this wide ranging book Dr Robert Buckman takes us on a journey through the history of human belief combining philosophy theology and new scientific research to discover the origins of religious faith and explore the dilemmas and contradictions of religion in the modern world Buckman also examines the relationship between beliefs and ethics Many of us use rules set by our religion to guide our behavior yet now more than ever religious doctrine can seem out of alignment with our sense of ethical conduct If you don't believe in God can you still behave decently and ethically This revised and updated edition helps us understand not just why we believe but how our beliefs affect our actions and how a code of ethics can exist without a deity at its center **Can We be Good Without God?** Buckman, Rob, 2001 **Taking Leave of God** Don Cupitt, 1980 This is the book which first

generated international celebrity and notoriety for its author and which fire started a debate about the supernatural claims of Christianity Rejecting Christian doctrines and metaphysics in favour of the religious consciousness which characterises human identity Cupitt takes leave of God by abandoning objectivity theism Whatever one thinks of the author's views and of the non-realist beliefs he has been seen to champion Taking Leave of God remains an essential work and one of the most controversial theological interventions of its age
