Multi-dimensional Collaborative Governance of Urban Sharing Platforms Jiachen Li, 2023-09-01 This book gives a brief review of current development models and governance of urban sharing platforms and looks into the economic efficiency of a novel market transaction model of sharing economy which has been accelerated by high density urban population and the Internet technology. With an aim to solve current problems featuring excessive competition, waste of resources, security risks, and unfair competition, this book delves into the two governance models in accommodation sharing platforms and bike and car sharing platforms and puts forward a multi-dimensional collaborative governance model that involves the participation of enterprises, the government, and the community. Under such a model, the platforms may utilize their own key technologies to implement supervision and solicit feedback; the government may resort to tax regulation and reallocating shared space to mitigate the negative externality effect and promote fair competition; and the community as the basic unit of a city may play its part through on-site participation and real-time feedback.

Sharing Our Stories of Survival Sarah Deer, Bonnie Clairmont, Carrie A. Martell, Maureen L. White Eagle, 2007-10-15 A general introduction to the social and legal issues involved in acts of violence against Native women, this book's contributors are lawyers, social workers, social scientists, writers, poets, and victims. In the U.S., Native women are more likely than women from any other group to suffer violence from rape and battery to more subtle forms of abuse. *Sharing Our Stories of Survival* explores the causes and consequences of such behavior. The stories and case studies presented here are often painful and raw, and the statistics are overwhelmingly grim, but a countervailing theme also runs through this extremely informative volume. Many of the women who appear in these pages are survivors, often strengthened by their travails, and the violence examined here is human violence, meaning that it can be changed if only with much effort and education. The first step is to

Eating Traditional Food Brigitte Sebastia, 2016-11-18 Due to its centrality in human activities food is a meaningful object that necessarily participates in any cultural social and ideological construction and its qualification as traditional is a politically laden value This book demonstrates that

traditionality as attributed to foods goes beyond the notions of heritage and authenticity under which it is commonly formulated Through a series of case studies from a global range of cultural and geographical areas the book explores a variety of contexts to reveal the complexity behind the attribution of the term traditional to food In particular the volume demonstrates that the definitions put forward by programmes such as TRUEFOOD and EuroFIR and subsequently adopted by organisations including FAO which have analysed the perception of traditional foods by individuals do not adequately reflect this complexity The concept of tradition being deeply ingrained culturally socially politically and ideologically traditional foods resist any single definition Chapters analyse the processes of valorisation instrumentalisation and reinvention at stake in the construction and representation of a food as traditional Overall the book offers fresh perspectives on topics including definition and regulation nationalism and identity and health and nutrition and will be of interest to students and researchers of many disciplines including anthropology sociology politics and cultural studies
