Formal Techniques for Networked and Distributed Systems - FORTE 2005 Farn Wang, 2005-09-26 This book constitutes the refereed proceedings of the 25th IFIP WG 6.1 International Conference on Formal Techniques for Networked and Distributed Systems FORTE 2005 held in Taipei Taiwan in October 2005. The 33 revised full papers and 6 short papers presented together with 3 keynote speeches were carefully reviewed and selected from 88 submissions. The papers cover all current aspects of formal methods for distributed systems and communication protocols such as formal description techniques, MSC, UML, Use cases, semantic foundations, model checking, SAT based techniques, process algebras, abstractions, protocol testing, protocol verification, network synthesis, security system analysis, network robustness, embedded systems, communication protocols, and several promising new techniques.

The Bloomsbury Handbook of the Anthropology of Sound Holger Schulze, 2020-12-10 The Bloomsbury Handbook of the Anthropology of Sound presents the key subjects and approaches of anthropological research into sound cultures. What are the common characteristics as well as the inconsistencies of living with and around sound in everyday life? This question drives research in this interdisciplinary area of sound studies. It propels each main chapter of this handbook into a thoroughly different world of listening, experiencing, receiving, sensing, dreaming, naming, desiring, and crafting sound. This handbook is composed of six sections: sonic artifacts, sounds and the body, habitat and sound, sonic desires, sounds and machines, and overarching sensologies. The individual chapters explore exemplary research objects and put them in the context of methodological approaches, historical predecessors, research practices, and contemporary research gaps. This volume offers therefore one of the broadest, most detailed, and instructive overviews on current research in this area of sensory anthropology.

Handbook of Natural Fibres Ryszard M. Kozłowski, 2012-09-21 Growing awareness of environmental issues has led to increasing demand for goods produced from natural products including natural fibres. The two volume Handbook of natural fibres is an indispensable tool in understanding the diverse properties and applications of these important materials. Volume 2: Processing and applications focuses on key processing techniques for the improvement and broader application of natural fibres. Part one reviews processing techniques for natural fibres. Silk production and the future of natural silk manufacture are discussed as well as techniques to improve the flame retardancy of natural fibres and chemical treatments to improve natural fibre properties. Ultraviolet blocking properties, enzymatic treatment, and electrokinetic properties are also discussed. Part two goes on to investigate applications of natural fibres including automotive applications, geotextiles, paper and packaging, and natural fibre composites. NFCs for the construction and automotive industries. The use of flax and hemp textiles made from jute and coir, antimicrobial natural fibres, and biomimetic textile materials are also considered before a final discussion of enhancing consumer demand for natural textile fibres. With its distinguished editor and international team of expert contributors, the two volumes of the Handbook of natural fibres are essential texts for professionals and academics in textile science and
