Contemporary Issues in Branding Pantea Foroudi,Maria Palazzo,2019-12-06 This book provides students and academics with a comprehensive analysis of the theory and practice of branding The challenge to explore new and effective ways of harnessing the power of communication to engage with company stakeholders in interactive immediate and innovative ways is ever present in the digital era Digital marketing and social media create

opportunities for managers to communicate their brand's identity to their consumers and stakeholders. Yet limited empirical research exists to elucidate these issues and less still that assists our understanding of branding issues at an international level. Recognising the complexity and plurality at the heart of the branding discipline, this text explores the relationship between brand identity and stakeholders. Working through building, designing and maintaining a brand, the authors consider such aspects as strategic planning and campaign management, research and measurement, media relations, employee communication, leadership and change communication and crisis branding. Critically differing methods and approaches applied to branding and communication research design are assessed, including both qualitative and quantitative methods. Proposing a mixture of theory and practice with international case studies, this book is an invaluable companion for advanced undergraduate and postgraduate students, academics of marketing and strategic brand management as well as managers and decision makers globally.

Hot Stamping of Ultra High-Strength Steels Eren Billur, 2018-10-05. Providing a comprehensive overview of hot stamping, also known as press hardening, this book examines all essential aspects of this innovative metal forming method and explores its various uses. It investigates hot stamping from both technological and business perspectives and outlines potential future developments. Individual chapters explore topics such as the history of hot stamping, the state of the art materials and processes employed, and how hot stamping is currently being used in the automotive industry to create ultra high strength steel components. Drawing on experience and expertise gathered from academia and industry worldwide, the book offers an accessible resource for a broad readership, including students, researchers, vehicle manufacturers and metal forming companies.

Power Through James Longley, 2025-04-10. Going to prison changed one man's life. It helped him become a multi-millionaire. James Longley grew up in a working class family in the East Midlands. He dreamed of becoming a professional footballer and had trials with Leicester City and Scunthorpe United, but an injury put an end to that. He drifted from job to job, then joined the RAF. After a night's drinking in 2002, he got into an argument with a taxi driver and ended up hitting him. He was convicted of a racist assault and given an eight-month prison sentence. Upon his release, he borrowed some money and set up a taxi company. A customer he picked up one evening persuaded James to join him in an energy switching business he had just started. The business grew quickly and within ten years employed seventy people. James eventually bought his benefactor out and in 2018 sold the business for GBP15 million. He has now set up a charity to help prisoners and ex-prisoners learn entrepreneurship skills and to break the cycle of reoffending. His inspiring story shows that if you hit rock bottom in life, it's not the end of everything. You can still achieve success and then pay it forward.
