Clark, 2016-06-27 Both comprehensive and accessible this is an ideal resource for anyone who plans to teach or practice integrated cost effective healthcare in the 21st century Currently there is no coordinated system for training health profession students to address the needs of patients with complex illnesses nor is there a coordinated system for effectively delivering care to these patients This book explores both sides of the problem bringing interprofessional practice and education together to show how they are complementary and how they can be integrated to provide better care In many respects this book is a personal account of the authors experience with interprofessional teamwork and education over the past 40 years It discusses what works and what doesn t and includes interviews examples and case studies that illustrate the perspectives of healthcare professionals patients and caregivers This second edition illuminates ways in which today s business model has changed interprofessional healthcare team practice and education and it examines the needs of patients relative to healthcare teams and practitioner education An entire chapter is devoted to the patient s position as both teacher and learner in relation to the team The theoretical foundations of practice and education are highlighted but the book also shares models that can be used for the practical development of programs **The Encyclopedia of Aging** George L.
