MEN MACHINES AND TOMORROW S BATTLEFIELDS War is planned violence or at least it starts out that way And even if plans go awry the violence is indispensable Today s soldiers have far more firepower on a per man basis than the doughboys of a century ago and there is no reason to believe that this trend will not extend into the future Imagine a revival of suits of armor but with structural strength undreamed of by medieval knights and powered by built in motors giving each soldier the invulnerability of a tank but even more mobility and mechanical muscle strong enough to carry light artillery rocket launchers laser cannon and weapons not even on the drawing boards yet Add on the ability to fly or at least jump for a kilometer at a time using

rocket boosters or even powerful leg motors or a combination of both The stuff that superheroes are made of hanging in every fighting man or woman s closet ready to wear If it s possible history teaches us it will be done But don t expect a nation or planet possessing such battalions of super powered soldiers to not worry about attack by an enemy there s no reason why the enemy won t have its own armored infantry Keep the midnight oil burning and the R D rolling In the meantime here s a sneak peek by expert dreamers putting the battle hardened reader at the sharp end of tomorrow At the publisher s request this title is sold without DRM Digital Rights Management Praise for anthologies edited by Hank Davis and David Afsharirad This intriguing anthology explores the human race s violent potential but also bends toward exploration and the triumph of the human spirit with brave tales that take the reader on a fascinating thoughtprovoking enjoyable journey Publishers Weekly on The Year s Best Military SF and Space Opera starred review
