undocumented immigrants but also offer them hope for societal inclusion Some eleven million undocumented immigrants reside in the United States carving out lives amid a growing web of surveillance that threatens their and their families societal presence Engage and Evade examines how undocumented immigrants navigate complex dynamics of surveillance and punishment providing an extraordinary portrait of fear and hope on the margins Asad L Asad brings together a wealth of research from intimate interviews and detailed surveys with Latino immigrants and their families to up close observations of immigration officials to offer a rare perspective on the surveillance that undocumented immigrants encounter daily He describes how and why these immigrants engage with various institutions for example by registering with the IRS or enrolling their kids in public health insurance programs that the government can use to monitor them This institutional surveillance feels both necessary and coercive with undocumented immigrants worrying that evasion will give the government cause to deport them Even so they hope their record of engagement will one day help them prove to immigration officials that they deserve societal membership Asad uncovers how these efforts do not always meet immigration officials high expectations and how surveillance is as much about the threat of exclusion as the promise of inclusion Calling attention to the fraught lives of undocumented immigrants and their families this superbly written and compassionately argued book proposes wide ranging actionable reforms to achieve societal inclusion for all *Congressional Record* United States.

Politics In An Age Of Economic Limits Bruce Shefrin,2019-07-18 This study of the future of U S

politics begins with an in depth examination of the political social and economic dynamics of the present Dr Shefrin demonstrates that economic growth has been a key element in maintaining political stability by diverting the attention of materially deprived groups away from disruptive political activity Examining the interaction of technological and political forces in the physical and social environment he argues that an expectation of economic limits is reasonable and perhaps undeniable and focuses on the changes in the political system that can be anticipated in a no growth or slow growth society Dr Shefrin employs a nondeterministic social choice approach to reach the conclusion that because the shape of the future is

of major political significance it will be the focus of intense political conflict The four scenarios he presents reflect the major alternative directions possible for U S society according to current social theory Dr Shefrin feels that the conflict among supporters of these alternatives will constitute the politics of the future **The Pursuit of Happiness** John P.
