in Early Modern Spain Bjørn Okholm Skaarup, 2016-03-09 Taking the Vesalian anatomical revolution as its point of departure this volume charts the apparent rise and fall of anatomy studies within universities in sixteenth century Spain focussing particularly on primary sources from 1550 to 1600 In doing so it both clarifies the Spanish contribution to the field of anatomy and disentangles the distorted political and historiographical viewpoints emerging from previous research Studies of early modern Iberian science have only been carried out coherently and collaboratively in the last few decades even though fierce debates on the subject have dominated Spanish historiography for more than two centuries In the field of anatomy studies many uninformed and biased readings of archival sources have resulted in a very confused picture of the practice of dissection and the teaching of anatomy in the Iberian Peninsula in which the highly complex conditions of anatomical research within Spain's national context are often oversimplified The new empirical evidence that this book brings to light suggests a far more multifaceted narrative of Iberian Renaissance anatomy than has been presented to date

Latin American and Iberian Perspectives on Literature and Medicine Patricia Novillo-Corvalán, 2015-06-05 This is the first study to examine the representation of illness, disability and cultural pathologies in modern and contemporary Iberian and Latin American literature. Innovative and interdisciplinary, the collection situates medicine as an important and largely overlooked discourse in these literatures while also considering the social, political, religious, symbolic and metaphysical dimensions underpinning illness. Investigating how Hispanic and Lusophone writers have reflected on the personal and cultural effects of illness, it raises central questions about how medical discourses, cultural pathologies and the art of healing in general are represented. Essays pay particular attention to the ways in which these interdisciplinary dialogues chart new directions in the study of Hispanic and Lusophone cultures and emerging disciplines such as the medical humanities. Addressing a wide range of themes and subjects including bioethics, neuroscience, psychosurgery, medical technologies, Darwinian evolution, indigenous herbal medicine, the rising genre of the pathography and the illness as metaphor trope, the collection engages with the discourses of cultural studies, gender studies, disability studies, comparative literature and the medical humanities. This book enriches and stimulates scholarship in these areas by showing how much we still have to gain from interdisciplinary studies working at the intersections between the humanities and the sciences.

sus decisiones su propósito no era sino alcanzar la libertad y utilizar el cosmos a su favor sino hacer algo de lo cual tal vez esto depende siendo por ende algo más importante debiendo ser así su objetivo real y fundamental el que en el intento de cumplirlo no deben fallar y es el del autocontrol y del dominio de sí mismos siendo tal vez ésta la mejor de las pruebas de un buen conocimiento de sí mismo Quiz también sea esa la fórmula de la felicidad por la cual el huérfano y el desterrado tanto habrán de luchar pero luego de su pica llena de dolor sacrificios y de su lucha existencialista y utópica la conseguirán

Franco's Famine Miguel Ángel del Arco Blanco, Peter Anderson, 2021-09-09 At least 200 000 people died from hunger or malnutrition related diseases in Spain during the 1940s This book provides a political explanation for the famine and brings together a broad range of academics based in Spain the United Kingdom the United States and Australia to achieve this Topics include the political causes of the famine the physical and social consequences the ways Spaniards tried to survive the regime's reluctance to accept international relief the politics of cooking at a time of famine and the memory of the famine The volume challenges the silence and misrepresentation that still surround the famine It reveals the reality of how people perished in Spain because the Francoist authorities instituted a policy of food self sufficiency or autarky a system of price regulation which placed restrictions on transport as well as food sales The contributors trace the massive decline in food production which followed the hoarding which took place on an enormous scale and the vast and deeply iniquitous black market that subsequently flourished at a time when salaries plunged to 50% below their levels in 1936 all contributing factors in the large scale atrocity explored fully here for the first time **Foreign Commerce Weekly**, 1944 **Making Waves Anniversary Volume** Ann Davies, Parvathi Kumaraswami, Claire Williams, 2021-02-10 Gender and women's studies have formed part of the academic landscape for many years but while the field is now established enough to have developed in depth and perspectives there remain many areas of significance yet to be explored most significantly much of the work carried out has remained rooted in the Anglo American context Those working outside this context are increasingly aware of the need to understand women in different cultural contexts in order to determine whether to what extent and how representations of women and cultural contexts are interactive and dynamic concepts The current volume contributes to the growing interest in the field of women and culture in the Hispanic and Lusophone worlds and shows how women writers researchers teachers and students have always made waves to counteract the complacency prejudice and tradition that threatens to ignore or subsume them The volume draws on literary study the starting point for much of the early work on gender in Spain the Lusophone world and Latin America but also goes beyond it to discuss women's interaction not only with literature but also with art and language itself in the Hispanic and Lusophone contexts It acts as a showcase for contemporary scholarship undertaken in Hispanic and Lusophone gender studies developing earlier insights and forging new ones to refine the debate continuing in the subject The contributors include both established scholars with a proven track record and promising newcomers to the field The volume arises from the individual research projects and sustained

discussions of Women in Spanish Portuguese and Latin American Studies WiSPs an organisation that exists to promote scholarship by and about women in the field of Iberian Lusophone and Latin American Studies This volume celebrates the first seven years of WiSPs s life and presents some of the research presented under its auspices at annual conferences and study days *Proceedings of the eighth American scientific congress held in Washington May 10-18, 1940* Paul Henry Oehser,1941
