## Strain Elastography

Examples

Esaote Real-time tissue elastography ElaXio™  
Siemens eSie Touch™  
Samsung ElastoScan™

Mechanism

A stress is applied by repeated compression. Commonly reported parameters include a strain ratio between two B/Ms or a fat-fracture ratio.

# Shear Wave Elastography

## Transient Elastography

Echosens, FibroScan®

An acoustic impulse induces shear waves which travel perpendicular to the compressive wave. The tissue or particle motion induced by these shear waves is detected by the ultrasound probe and permits estimation of liver stiffness.

New Technologies in Urology Prokar Dasgupta,John M. Fitzpatrick,Roger Kirby,Inderbir S. Gill,2010-01-13 Technology seems to be an integral part of modern living Urologists have over the years embraced new technological advances for patient benefit On some occasions however the initial enthusiasm in something new has failed to endure rigorous scientific scrutiny Thus while being technological leaders we urologists know better than most other surgical specialties that what is new is not necessarily good This textbook is aimed at urologists and surgeons at all levels and has contributions from international experts The topics vary from robotics to lasers to single port laparoscopy The comprehensive chapters should be of equal interest to uro oncologists and those involved in treating benign urological diseases While the contents are meant to bring the reader up to date with technological advances the authors have attempted to balance their enthusiasm with basic science translational research and clinical outcomes It will be obvious that some of the subjects mentioned here such as nanotechnology are still evolving and it will be a while before they undergo clinical trials that establish their position in clinical medicine We hope you enjoy reading this book as much as we have enjoyed creating it London UK Prof Prokar
