Water for Food Security, Nutrition and Social Justice Lyla Mehta, Theib Oweis, Claudia Ringler, Barbara Schreiner, Shiny Varghese, 2019-09-19 This book is the first comprehensive effort to bring together Water Food Security and Nutrition FSN in a way that goes beyond the traditional focus on irrigated agriculture Apart from looking at the role of water and sanitation for human well being it proposes alternative and more locally appropriate ways to address complex water management and governance challenges from the local to global levels against a backdrop of growing

uncertainties The authors challenge mainstream supply oriented and neo Malthusian visions that argue for the need to increase the land area under irrigation in order to feed the world s growing population Instead they argue for a reframing of the debate concerning production processes waste food consumption and dietary patterns whilst proposing alternative strategies to improve water and land productivity putting the interests of marginalized and disenfranchized groups upfront The book highlights how accessing water for FSN can be challenging for small holders vulnerable and marginalized women and men and how water allocation systems and reform processes can negatively affect local people s informal rights The book argues for the need to improve policy coherence across water land and food and is original in making a case for strengthening the relationship between the human rights to water and food especially for marginalized women and men It will be of great interest to practitioners students and researchers working on water and food issues **Securing Health**

Suzanne Hindmarch,2016-04-28 This book offers a critical inquiry into the framing of health and disease as a security issue In particular the book examines what happens in the United Nations when the ostensibly low politics of global health meet the high politics of security and when the logic of security comes to shape global health initiatives It offers a critical re assessment of efforts in the United Nations system to position HIV as a security threat with the hope that this would attract greater attention and resources for the global HIV response The book advances securitization theory by presenting a new framework for studying HIV as a policy process uniting several theoretical strands into a single powerful model for empirical application It uses this model to draw attention to important understudied aspects of HIV securitization including the role played by discourses about Africa and the evolution of ideas about HIV and security as actors learned over time On the basis of this empirically grounded assessment of how securitization works as a theory and a political strategy the book suggests that securitization is inherently limited and perhaps dangerous as a strategy for securing social change This book will be of much interest to students of critical security studies global health development studies and IR in general Securitization

Revisited Michael J. Butler,2019-07-23 This book seeks to interrogate how contemporary policy issues become securitized and furthermore what the implications of this process are A generation after the introduction of the concept of securitization to the security studies field this book engages with how securitization and desecuritization works within and across a wide range of security domains including terrorism and counter terrorism climate change sexual and gender based violence inter state and intra state conflict identity and memory in various geographic and social contexts Blending theory and application the contributors to this volume drawn from different disciplinary ontological and geographic spaces orient their investigations around three common analytical objectives revealing deficiencies in and through application s of securitization considering securitization through speech acts and discourse as well as other mechanisms and exposing latent orthodoxies embedded in securitization research The volume demonstrates the dynamic and elastic quality of securitization and desecuritization as concepts that bear explanatory fruit when applied across a wide range of security issues actors and

audiences It also reveals the deficiencies in restricting securitization research to an overly narrow set of issues actors and mechanisms This volume will be of great interest to scholars of critical security studies international security and International Relations Chapter 6 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

Affectedness And Participation In International Institutions Jan Sändig, Jochen von Bernstorff, Andreas Hasenclever, 2020-06-09 Affectedness and Participation in International Institutions looks at the growing involvement of affected persons in global politics such as young climate activists indigenous movements and persons affected by HIV/AIDS Since the early 2000s international organisations within various policy areas have increasingly recognised and involved affected persons organisations This has promised to address long standing legitimacy and democracy deficits of international policy making and norm setting Yet the powerful do not easily cede the terrain Some major states classic NGOs and intergovernmental organisations seek to curtail the influence of the newcomers The authors within this collection study these contestations from an interdisciplinary political science and international law perspective Based on evidence from a broad range of policy areas we address some of the crucial questions What does it mean to be affected How can affected groups meaningfully participate in international negotiations Whose voices do still remain excluded Ultimately the authors chart whether the rising involvement of the most affected will reshape global politics and social struggles on the ground Taking a dual political science and international law perspective Affectedness and Participation in International Institutions will be of great interest to scholars of civil society in global governance international law and international institutions This book was originally published as a special issue of Third World Thematics

Multistakeholder Governance and Democracy Harris Gleckman, 2018-09-18 Multistakeholder governance is proposed as the way forward in global governance For some leaders in civil society and government who are frustrated with the lack of power of the UN system and multilateralism it is seen as an attractive alternative others particularly in the corporate world see multistakeholder governance as offering a more direct hand and potentially a legitimate role in national and global governance This book examines how the development of multistakeholderism poses a challenge to multilateralism and democracy Using a theoretical historical perspective it describes how the debate on global governance evolved and what working principles of multilateralism are under threat From a sociological perspective the book identifies the organizational beliefs of multistakeholder groups and the likely change in the roles that leaders in government civil society and the private sector will face as they evolve into potential global governors From a practical perspective the book addresses the governance issues which organizations and individuals should assess before deciding to participate in or support a particular multistakeholder group Given the current emphasis on the participation of multiple actors in the Sustainable Development Goals this book will have wide appeal across policy making and professional sectors involved in negotiations and governance at all levels It will also be essential reading for

students studying applied governance **Environmental Security in the Anthropocene** Judith Nora Hardt, 2017-09-22

This book provides a critical assessment of the theories and practice of environmental security in the context of the Anthropocene. The work analyses the intellectual foundations, the evolution and different interpretations, strengths and potential of the link between environment and security but also its weaknesses, incoherencies and distortions. To do so it employs a critical environmental security studies analytical framework and uniquely places this analysis within the context of the Anthropocene. Furthermore, the book examines the practice theory divide and the political implementation of the environmental security concept in response to global environmental change and in relation to different actors. It pays significant attention to the Environment and Security Initiative ENVSEC which is led by different programs of the United Nations, the OSCE and until recently by the North Atlantic Treaty Organization NATO among others and has largely been overlooked in the academic literature to date. The goal is to study how environmental security practice could inform and shape the environmental security theory and also to explore how conversely new theoretical insights could contribute to the enhancement of environmental security activities. This book will be of great interest to students and academic scholars of Environmental Security, Critical Security Studies, Green Political Theory, Global Governance and International Relations in general. *Power and Resistance, 7th ed.* Jessica Antony, Wayne Antony, 2022-06-30T00:00:00Z

Power and Resistance debunks the dominant neoliberal hyper individualist approach to society's problems that sees poverty as a result of laziness, environmental crises as a result of market demands for products that pollute and Indigenous Peoples' struggles as a result of not assimilating. We argue that it is social inequality and oppression that are the underlying causes of social problems. In a society like ours, powerful groups make choices that benefit them and force those choices onto others, creating life problems for others and society as a whole. The powerful also have influence over what is and is not called a social problem. Solving social problems requires changing the structures of inequality and oppression. For example, industrial corporate agriculture has created huge profits for a few gigantic food corporations but left much of the world hungry. But farmers and their allies are pushing back through agroecology, an agriculture based on local small scale ecologically sustainable farming that brings eaters and growers closer to one another. The seventh edition of *Power and Resistance* includes new chapters on anti Black racism in schools, Indigenous people and mental health, food security and sovereignty and work in the gig economy. **Rural**

Transformations and Agro-Food Systems Ben M. McKay, Ruth Hall, Juan Liu, 2018-10-05. The economic and political rise of the BRICS (Brazil, Russia, India, China and South Africa) and Middle Income Countries (MICs) have important implications for global agrarian transformation. These emerging economies are undergoing profound changes as key sites of the production, circulation and consumption of agricultural commodities, hosts to abundant cheap labour and natural resources and home to growing numbers of both poor but also increasingly affluent consumers. Separately and together, these countries are shaping international development agendas both as partners in and potential alternatives to the development paradigms promoted by

the established hubs of global capital in the North Atlantic and by dominant international financial institutions Collectively the chapters in this book show the significance of BRICS countries in reshaping agro food systems at the national and regional level as well as their global significance As they export their own farming and production systems across different contexts though the outcomes are contingent and success is not assured At the same time BRICS may represent a continuation rather than an alternative to the development paradigms of the Global North The chapters were originally published in a special issue of Third World Thematics A TWQ Journal

Food Jennifer Clapp, 2020-04-20 We all need food to survive and forty percent of the world's population relies on agriculture for their livelihood Yet control over food is concentrated in relatively few hands Turmoil in the world food economy in recent decades has highlighted a number of vulnerabilities and contradictions inherent in the way we currently organize this vital sector Extremes of both undernourishment and overnourishment affect a significant proportion of humanity And attempts to increase production through the spread of an industrial model of agriculture has resulted in serious ecological consequences The fully revised and expanded third edition of this popular book explores how the rise of industrial agriculture corporate control inequitable agricultural trade rules and the financialization of food have each enabled powerful actors to gain fundamental influence over the practices that dominate the world food economy and result in uneven consequences for both people and planet A variety of movements have emerged that are making important progress in establishing alternative food systems but as Clapp's penetrating analysis ably shows significant challenges remain

and Critical Security Studies **Transforming food systems** Dr Dave Watson, 2024-07-09 Sets out the historical context for understanding the current challenges facing food production Gives a unique overview of the range of reformist progressive and radical solutions to reforming the global food system Provides a framework for comparing the relative strengths and weaknesses of different solutions *The Oxford Handbook of Land Politics* Saturnino M. Borras, Jennifer C. Franco, 2025-08-29 The Oxford Handbook of Land Politics brings together key theoretical perspectives on the politics of land as well as strategic thematic studies on land and social life namely food politics climate change labor regimes nation states and citizenship and geopolitics The contributors to this volume address the basic but complex questions of who gets to have access to land why how what kind of land and how much where and for how long for what purposes and with what implications as to who wins and who loses These questions are grounded in social relations that are in turn rooted in class and other social group formations that are enacted within the inseparable spheres of state and society Fundamental to this collection is its treatment of land in the context of production and social reproduction where social reproduction is interpreted in a broad sense to include socio ecological socio cultural and socio political reproduction The definition of land used in this Handbook encompasses soil farmland grazing land home lots landscapes socio agroecological zones territory and homeland Individually and together the chapters show that making sense of the dynamics of global social life requires a fundamental understanding of the politics of land and a grasp of land politics requires a comprehension of broader social life For instance land politics plays a key role in causing climate change and at the same time it is centrally located in the competing solutions to the climate crisis Understanding climate change politics necessarily requires a deep grasp of land politics All contributing authors are critical of capitalism and of theories that justify and celebrate it While most contributions focus on dynamics of social change in and in relation to the rural world these are cast in the context of rural urban agriculture industry national global continuums The Handbook is organically embedded in several disciplines and fields of study political economy political ecology sociology political science economics anthropology legal studies development studies anthropology environmental studies and social movements It is a critical resource for scholars and students who seek to understand the complex interactions between these various disciplines and land politics **Peasants Negotiating a Global Policy Space** Ingeborg Gaarde, 2017-02-24 Being the public voice of over 180 member organisations across nearly 90 countries La V a Campesina the global peasant movement has planted itself firmly on the international scene This book explores the internationalisation of the movement with a specific focus on the engagement of peasants in the processes of the Committee on World Food Security CFS Since the reform of the CFS in 2009 civil society actors engage in the policy processes of this UN Committee from a self designed and autonomous global Civil Society Mechanism The author sheds light on the strategies tensions debates and reconfigurations arising from rural actors moving between every day struggles in the fields and those of the UN arena Whereas most theories in the dominant literature on social movements expect them to

either disappear or institutionalise in a predetermined pattern the book presents empirical evidence that La V a Campesina is building a much more sophisticated model The direct participation of representatives of peasant organisations in the CFS is highlighted as a pioneering example of building a more complex inclusive and democratic foundation for global policy making Foreword by Olivier De Schutter United Nations Special Rapporteur on the Right to Food 2008 2014 [The Politics of Food Provisioning in Colombia](#) Felipe Roa-Clavijo, 2021-10-27 This book explores food provisioning in Colombia by examining the role and impact of the agrarian negotiations which took place in the aftermath of the 2013 2014 national strikes Most of the research in the field of agrarian studies in Colombia has focused on inequalities in land distribution the impacts of violent conflict and most recently the first phase of the peace agreement implementation This book links and complements these literatures by critically engaging with an original framework that uncovers the conflicts and politics of food provisioning who produces what and where and with what socio economic effects This analytical lens is used to explain the re emergence of national agrarian movements their contestation of the dominant development narratives and their engagement in discussions about food sovereignty with the state The analysis incorporates a wide range of voices from high level government representatives and leaders from national agrarian movements Their narratives of food provisioning and the broader role of the food industry are reviewed and the key findings show an underlying conflict within food provisioning based on the struggle of marginalised smallholders to develop alternative agri food systems that can be included in the local and domestic food markets in the context of a state dominated by an export and import approach Overall the book argues that the battle ground of agrarian conflicts has moved to the field of food provisioning and using this approach has the potential to reframe the debate about the future of food and agriculture in Colombia and beyond This book will be of great interest to students and scholars of food and agriculture rural development peasant studies and Latin American Studies **Political Ecology, Food Regimes, and Food Sovereignty** Mark Tilzey, 2017-10-20 This book asks how we are to understand the relationship between capitalism and the environment capitalism and food and capitalism and social resistance These questions come together to form a study of food regimes and the means by which capitalism organises both the environment and people to provision its distinctive system of ever expanding consumption with food Political Ecology Food Regimes and Food Sovereignty explores whether there are environmental limits to capitalism and its economic growth by addressing the ongoing and inter linked crises of food fossil fuels and finance It also considers its political limits as the globally burgeoning precariat peasants and indigenous people resist the further commodification of their livelihoods This book draws from the field of Political Ecology to approach new ways of analysing capitalism the environment and resistance and also to propose new solutions to the current agro ecological economic crisis It will be of particular interest to students and academics of Environmental Sociology Human Geography and Environmental Geography *Voice and Participation in Global Food Politics* Alana Mann, 2019-04-05 As awareness of the commodification of food for profit at the expense of our health and the

planet grows this book foregrounds the communicative dimensions of resistance by food movements Voice and participation are argued by the author to be the means through which rural and urban communities can and in many cases do resist the capture of value by corporate actors and work to democratise their foodscapes Her critical analysis of meaning making under neo liberalism suggests that agroecology as a socially activating form of agriculture within a food sovereignty framework provides an example of social learning relevant across rural urban and North South divides Embracing indigenous knowledge gender equity and postcolonial theory this approach mobilises growers and eaters to contest the power structures that shape their food environments and also to focus on social and economic justice within their communities particularly in the context of climate change Participatory ecologies that incorporate these forms of social learning encourage the co creation of inclusive foodscapes and politicise food justice Such a positive framing of resistance through horizontal pedagogy participation communication and social learning processes contrasts with the vertical dissemination structure of the corporatised food regime and takes vital steps towards a more democratic food system Voice and Participation in Global Food Politics will be of interest to scholars of agri food transdisciplinary food studies and political economy of food systems It will also be of relevance to NGOs and policymakers
