GAIA LEGACY Rico Paganini, 2021-08-20 Rico Paganini one of the leading megalithic geomantic and spiritual researchers has visited all the Earth's major power points. In this book we travel along with him. And we are able to share in his stirring experiences in sensitive discoveries and the wondrous insights that he was able to gain. He has not compiled them for himself but for us all. Perhaps he could only manage his adventures; travels bear the travails and overcome some resistance because the spiritual world was on his side accompanied him encouraged him and led him with direct guidance. These received messages are also an essential and moving part of this book and are a special feature. It is astonishing as is the telling of the tale of the spiritual and material creation and the fact that Mother Earth is alive and is conscious. Our ancestors had not yet forgotten this. He also leads us through the destruction of the environment, climate changes and the increasing natural catastrophes. What have we done? At the same time he presents us with solution paths, gives us courage and hope in this dramatic turning point. It is not yet too late. Hence GAIA LEGACY is much more than a travel report and insight into the power points. It is one can say without exaggeration an incomparable book full of awakening and strength just as the fifteenth power source.

Financial Management in the Sport Industry Matthew T. Brown, Daniel A. Rascher, Mark S. Nagel, Chad D. McEvoy, 2016-12-15 Financial Management in the Sport Industry provides readers with an understanding of sport finance and the importance of sound financial management in the sport industry. It begins by covering finance basics and the tools and techniques of financial quantification using current industry examples to apply the principles of financial management to sport. It then goes beyond the basics to show how financial management works specifically in sport: how decisions are made to ensure wealth maximization. Discussions include debt and equity financing, capital budgeting, facility financing, economic impact, risk and return, time value of money and more. The final section focuses on sport finance in three sectors of the industry: public sector, sports, collegiate athletics and professional sport, providing in-depth analysis of financial management in each sector. Sidebars, case studies, concept checks and practice problems throughout provide practical applications of the material and enable thorough study and practice. The business of sport has changed dynamically since the publication of the first edition and this second edition reflects the impact of these changes on financial management in the sport industry. New to this edition are changes to reflect the global nature of sport with, for example, discussions of income tax rates in the Premier League, expanded material on the use of spreadsheets for financial calculations, a primer on accounting principles to help students interpret financial statements, a valuation case study assignment that takes students step by step through a valuation, a new stadium feasibility analysis using the efforts of the Oakland Raiders to obtain a new stadium, a new economic impact example focusing on the NBA All Star game and much more.

Capitalism Kate Bedford, 2019-09-26. Casinos are often used by political economists and popular commentators to think critically about capitalism. Bingo, an equal chance numbers game played in many parts of the world, is overlooked in these conversations about gambling and political economy. *Bingo Capitalism* challenges that omission by asking what bingo in England and Wales can teach us about capitalism and the regulation of everyday gambling economies. The book draws on official records of parliamentary debate, case law, regulations, and in-depth interviews with both bingo players and workers to offer the first socio-legal account of this globally significant and immensely popular pastime. It explores the legal and political history of bingo and how gender shapes and is shaped by diverse state rules on gambling. It also sheds light on the regulation of workers, players, products, places, and technologies. In so doing, it adds a vital new dimension to accounts of UK gambling law and regulation. Through *Bingo Capitalism*, Bedford makes a key theoretical contribution to our understanding of the relationship between gambling and political economy, showing the role of the state in supporting and then eclipsing environments where gambling played a key role as mutual aid. In centring the regulatory entanglement between vernacular play forms, self-organised membership activity, and corporate leisure experiences, she offers a fresh vision of gambling law from the everyday perspective of bingo. **Dual Markets** Ernesto U. Savona, Mark A.R. Kleiman, Francesco

Calderoni, 2017-11-14. This comprehensive volume analyzes dual markets for regulated substances and services and aims to provide a framework for their effective regulation. A dual market refers to the existence of both a legal and an illegal market for a regulated product or service, for example, prescription drugs. These regulations exist in various countries for a mix of public health, historical, political, and cultural reasons. Allowing the legal market to thrive while trying to eliminate the illegal market provides a unique challenge for governments and law enforcement. Broken down into nine main sections, the book studies comparative international policies for regulating these dual markets from a historical, legal, and cultural perspective. It includes an analysis of the markets for psychoactive substances that are illegal in most countries, such as marijuana, cocaine, opioids, and amphetamines; psychoactive substances which are legal in most countries and where consumption is widespread, such as alcohol and tobacco; and services that are generally regulated or illegal, such as sports betting, the sex trade, and gambling. For each of these nine types of markets, contributions focus on the relationship between regulation, the emerging

illegal market and the resulting overall access to these services This work aims to provide a comprehensive framework from a historical cultural and comparative international perspective It will be of interest to researchers in criminology and criminal justice particularly with an interest in organized crime as well as related fields such as sociology public policy international relations and public health

event Key British Enterprises, 1990 Routledge Handbook of Football Studies John Hughson, Kevin Moore, Ramón Spaaij, Joseph Maguire, 2016-10-04 Football is unquestionably the world's most popular and influential sport. There is no corner of the globe in which the game is not played or followed. More countries are affiliated to FIFA, football's governing body, than to the United Nations. The sport has therefore become an important component of our social, cultural, political, and economic life. The Routledge Handbook of Football Studies is a landmark work of reference going further than any other book in considering the historical and contemporary significance of football around the world. Written by a team of leading sport scholars, the book covers a broad range of disciplines from history, sociology, politics, and business to philosophy, law, and media studies. The central section of the book examines key themes and issues in football studies, such as the World Cup and international competition, governance and ownership, fandom and celebrity. The concluding section offers in-depth surveys of the culture and organisation of football in each of the regional confederations from UEFA to CONCACAF. This book will be fascinating reading for any serious football fan and an essential resource for advanced students or scholars undertaking research in football or sport studies and any practitioner or policy maker working in football.

Consumption, Cities and States Ann Brooks, Lionel Wee, 2015-03-01 Consumption, Cities and States examines the fascinating intersection of consumption, citizenship, and the state in a cross-section of global cities in Asia and the West. It focuses on a number of theoretical and empirical analyses developing and amplifying the intersection of consumption, citizenship, and the state in late modernity in relation to a range of cities, examining the concept of the global city as an aspirational category for cities in Asia and the West and considering case studies which highlight the intersection of consumption and the state. As Ann Brooks and Lionel Wee demonstrate, the interface between citizen status and consumer activity proves a crucial point of analysis in the light of the neoliberal assertion that individuals and institutions perform at their best within a free market economy.

Football in Neo-Liberal Times Peter Kennedy, David Kennedy, 2016-02-05 This book offers an original Marxist critique of the European football business. It argues that the Marxist account of the difference between profits and surplus value is crucial to an understanding of the fluid and contradictory nature of the commodification of football. Section one analyses the nature of modern professional football, and section two highlights attempts via government agency and football clubs to corral fans into ever greater identification with business logic aimed at breaking traditional social relations. Section three draws on a number of case studies across Europe to analyse how some fans are attempting to mount a counter-ideological response to the assault of neo-liberalism on the game.
