The Diary of Edmund Harrold, Wigmaker of Manchester 1712-15 Edmund Harrold,2008 This volume presents a fully referenced modern edition of the diary of the Manchester barber Edmund

Harrold covering the period 1712-1715. It is remarkable for its insights into his life and thoughts, laying open his struggles with alcohol, his attitudes to and frequency of marital sex, his reactions to the death of his three wives and 5 children, and his religious meditations upon these and other subjects. The diary also relates the ups and downs of his business and the day-to-day realities of life as a provincial barber. More than this, though, it is a frank and often anguished insight into the mind of an eighteenth-century man seeking to come to terms with himself, his god, and a changing society.

Written for distance education students in higher education worldwide, the book serves as a guide for students in the e-classroom in examining ethical theories and behaviour. A number of salient questions are addressed: What is ethical? What does ethical behaviour consist of in an e-classroom? What are violations of ethics in the e-classroom? The Practice of International and National Courts and the (De-)Fragmentation of International Law Ole Kristian

Fauchald, André Nollkaemper, 2014-10-01 In recent decades there has been a considerable growth in the activities of international tribunals and the establishment of new tribunals Furthermore supervisory bodies established to control compliance with treaty obligations have adopted decisions in an increasing number of cases National courts further add to the practice of adjudication of claims based on international law While this increasing practice of courts and supervisory bodies strengthens the adjudicatory process in international law it also poses challenges to the unity of international law Most of these courts operate within their own special regime functional regional or national and will primarily interpret and apply international law within the framework of that particular regime The role of domestic courts poses special challenges as the powers of such courts to give effect to international law as well as their actual practice in applying such law largely will be determined by national law At the same time both international and national courts have recognised that they do not operate in isolation from the larger international legal system and have found various ways to counteract the process of fragmentation that may result from their jurisdictional limitations This book explores how international and national courts can and do mitigate fragmentation of international law It contains case studies from international regimes including the WTO the IMF investment arbitration and the ECtHR and from various national jurisdictions including Japan Norway Switzerland and the UK providing a basis for conclusions to be drawn in the final chapter

Stalin's Defectors Mark Edele, 2017-06-23 Stalin's Defectors is the first systematic study of the phenomenon of frontline surrender to the Germans in the Soviet Union's Great Patriotic War against the Nazis in 1941-1945 No other Allied army in the Second World War had such a large share of defectors among its prisoners of war Based on a broad range of sources this volume investigates the extent the context the scenarios the reasons the aftermath and the historiography of frontline defection It shows that the most widespread sentiments animating attempts to cross the frontline was a wish to survive this war Disgruntlement with Stalin's socialism was also prevalent among those who chose to give up and hand themselves over to the enemy While politics thus played a prominent role in pushing people to commit treason few desired to fight on the side of the enemy Hence while the phenomenon of frontline defection tells us much about the lack of

popularity of Stalin's regime it does not prove that the majority of the population was ready for resistance let alone collaboration Both sides of a long standing debate between those who equate all Soviet captives with defectors and those who attempt to downplay the phenomenon then over stress their argument Instead more recent research on the moods of both the occupied and the unoccupied Soviet population shows that the majority understood its own interest in opposition to both Hitler's and Stalin's regime The findings of Mark Edele in this study support such an interpretation *The Advocate*
