For Individual Rights Shayne Wissler, 2010-07-01 FOR INDIVIDUAL RIGHTS [www.forindividualrights.com](http://www.forindividualrights.com) Approachable by the general reader this is a must read book for every human being who wants to know their rights and have them respected and who embraces the ideal of a peaceful and prosperous future for humanity Inspired by the vision of John Locke the Founders of America and Issac Newton Shayne Wissler systematically and passionately presents his case for individual rights Part I begins with the irrefutable foundation of common experience and ends with the pinnacle revelation of how government can actually be based on the consent of the governed Just as Issac Newton s Three Laws of Motion describe the predictable actions of physical objects Shayne Wissler s Three Laws of Human Relations describe the peaceful actions of human beings in a sociopolitical context Part II unleashes a righteous fury of logic demolishing rights usurping ideas of all kinds Part III builds anew offering ideas for rescuing a culture from the vicious grasp of those who parasitically feed off of the rights of others This concise and powerful work builds on the best political ideas of the past and presents a new hope for the future

The purpose of this Introduction is to sketch our approach to the study of value morality and action and to show the place we assign it in the system of human knowledge

1 VALUE MORALITY AND ACTION FACT THEORY AND METATHEORY

We take it that all animals evaluate some things and some processes and that some of them learn the social behavior patterns we call moral principles and even act according to them at least some of the time An animal incapable of evaluating anything would be very short lived and a social animal that did not observe the accepted social behavior patterns would be punished These are facts about values morals and behavior patterns they are incorporated into the bodies of animals or the structure of social groups We distinguish then the facts of valuation morality and action from the study of such facts This study can be scientific philosophic or both wayan animal evaluates environmental A zoologist may investigate the or internal stimuli a social psychologist may examine the way children learn or fail to learn certain values and norms when placed in certain environments And a philosopher may study such descriptive or explan atory studies with a view to evaluating valuations moral norms or behavior patterns he may analyze the very concepts of value morals and action as well as their cognates or he may criticize or reconstruct value beliefs moral norms and action plans

*A Critical Analysis of the Efficacy of Law as a Tool to Achieve Gender Equality* Natalie Renée Persadie, 2012

Law is often perceived as an instrument that can effect social change While this might be so it must be complemented by the necessary financial and human resources to make the law effective Natalie Persadie explains that among developing countries such as Trinidad and Tobago the achievement of legal advances for women at either the international or national levels is particularly difficult where practical measures are not

subsequently implemented This is perhaps attributable to a lack of political will Important issues such as gender equality and domestic violence are not given priority and laws aimed at protecting women and promoting women s rights are ineffective scant or unenforced Gender justice can only be realized through a multilevel approach from above and more importantly from below as women have the potential to effect real national and international legal and institutional change to ensure gender equality at both levels

*Albany Law Journal* ,1899      **International Law and Islamic Law** MashoodA. Baderin,2017-07-05 The relationship between modern international law and Islamic law has raised many theoretical and practical questions that cannot be ignored in the contemporary study and understanding of both international law and Islamic law The significance and relevance of this relationship in both academic and practical terms especially after the terrorist attacks of 11 September 2001 is now well understood Recent international events in particular corroborate the need for a better understanding of the relationship between contemporary international law and Islamic law and how their interaction can be explored and improved to enhance modern international relations and international law The articles reproduced in this volume examine the issues of General Principles of International Law International Use of Force International Humanitarian Law International Terrorism International Protection of Diplomats International Environmental and Water Law Universality of Human Rights Women s Rights Rights of the Child Rights of Religious Minorities and State Practice The essays have been carefully selected to reflect as much as possible the different Islamic perspectives on each of these aspects of international law

*Ecclesia, a Second Series of Essays on Theological and Ecclesiastial Questions by Various Writers* Henry Robert Reynolds,1871      **Children and Violence** Bina D'Costa,2016-10-04 Children s diverse experiences during periods of conflict post conflict and peacetime reveal that their roles in society and political communities are complex Based on this premise this book suggests that understanding children s roles involves a critical analysis of where the child is situated within her his family within socio political networks and within the state Through examining various case studies in South Asia a region that is marked as much by its homogeneity as by its immense diversity the book observes that significant

tensions exist between universal and local approaches to childhood It reflects how the development of international and national discourses on children s rights and protection is relevant to children s everyday lives in situations of conflict *The Law Librarian* ,1887
