An Integrated Framework for Assessing the Value of Community-Based Prevention Institute of Medicine, Board on Population Health and Public Health

Practice, Committee on Valuing Community-Based, Non-Clinical Prevention Policies and Wellness Strategies, 2012-12-29

During the past century the major causes of morbidity and mortality in the United States have shifted from those related to communicable diseases to those due to chronic diseases Just as the major causes of morbidity and mortality have changed so too has the understanding of health and what makes people healthy or ill Research has documented the importance of the social determinants of health for example socioeconomic status and education that affect health directly as well as through their impact on other health determinants such as risk factors Targeting interventions toward the conditions associated with today's challenges to living a healthy life requires an increased emphasis on the factors that affect the current cause of morbidity and mortality factors such as the social determinants of health Many community based prevention interventions target such conditions Community based prevention interventions offer three distinct strengths First because the intervention is implemented population wide it is inclusive and not dependent on access to a health care system Second by directing strategies at an entire population an intervention can reach individuals at all levels of risk And finally some lifestyle and behavioral risk factors are shaped by conditions not under an individual's control For example encouraging an individual to eat healthy food when none is accessible undermines the potential for successful behavioral change Community based prevention interventions can be designed to affect environmental and social conditions that are out of the reach of clinical services Four foundations the California Endowment the de Beaumont Foundation the W K Kellogg Foundation and the Robert Wood Johnson Foundation asked the Institute of Medicine to convene an expert committee to develop a framework for assessing the value of community based non clinical prevention policies and wellness strategies especially those targeting the prevention of long term chronic diseases The charge to the committee was to define community based non clinical prevention policy and wellness strategies define the value for community based non clinical prevention policies and wellness strategies and analyze current frameworks used to assess the value of community based non clinical prevention policies and wellness strategies including the methodologies and measures used and the short and long term impacts of such prevention policy and

wellness strategies on health care spending and public health An Integrated Framework for Assessing the Value of Community Based Prevention summarizes the committee's findings **Living Well with Chronic Illness** Institute of Medicine, Board on Population Health and Public Health Practice, Committee on Living Well with Chronic Disease: Public Health Action to Reduce Disability and Improve Functioning and Quality of Life, 2011-06-30 In the United States chronic diseases currently account for 70 percent of all deaths and close to 48 million Americans report a disability related to a chronic condition Today about one in four Americans have multiple diseases and the prevalence and burden of chronic disease in the elderly and racial ethnic minorities are notably disproportionate Chronic disease has now emerged as a major public health problem and it threatens not only population health but our social and economic welfare Living Well with Chronic Disease identifies the population based public health actions that can help reduce disability and improve functioning and quality of life among individuals who are at risk of developing a chronic disease and those with one or more diseases The book recommends that all major federally funded programmatic and research initiatives in health include an evaluation on health related quality of life and functional status Also the book recommends increasing support for implementation research on how to disseminate effective longterm lifestyle interventions in community based settings that improve living well with chronic disease Living Well with Chronic Disease uses three frameworks and considers diseases such as heart disease and stroke diabetes depression and respiratory problems The book's recommendations will inform policy makers concerned with health reform in public and private sectors and also managers of communitybased and public health intervention programs private and public research funders and patients living with one or more chronic conditions Jonas and Kovner's Health Care Delivery in the United States, 11th Edition James R.
