*Festival and Event Management in Nordic Countries* Tommy D. Andersson, Donald Getz, Reidar Johan

Mykletun, 2014-06-11 This book on events-related research marks a watershed in the development of a Nordic School of festival and event research. Each of the chapters presents a new and interesting approach to the study of events in terms of methods, perspectives or content. It is mostly rooted in management theory but also incorporating other perspectives that enhance our understanding of the phenomena. Implications for real-world applications in tourism, hospitality and community development are also at the fore. The scholarship is comprehensive, not focused on only tourism or economic aspects. Management theory, including stakeholder management, social networks and institutionalization processes, is being applied. Attention is being given to the multiple roles festivals and events play in society and to evaluation of their worth and impacts. Innovative methods are being developed to examine event experiences, innovation processes and success factors. There is now a critical mass of scholars in the Nordic countries that share a strong interest in event studies and they are engaged in collaborative research, making it an appealing and innovative region for other event students and researchers to visit. It can be expected that the Nordic school will take an increasingly important place in the development of event studies, which is now truly global in terms of scholarship and university degree programs. This book was originally published as a special issue of *Scandinavian Journal of Hospitality and Tourism*. *Event Impact* John Armbrrecht, Tommy D. Andersson, 2017-10-02

Events are increasingly used instrumentally to achieve goals of society such as cultural development, destination branding or economic development. Event impacts are however routinely measured from a purely economic perspective. *Event Impact* fills an important niche and a void in the literature on events by taking a holistic approach, incorporating issues like value creation, experiential value, value measurement, sustainability and impact assessment. It is one of the first books devoted to comprehensively dealing with the subject of event impacts, combining the ideas of an international group of academics to tackle an expanding area of research that cannot be met by the work of a single researcher. Methodological concepts such as triple impact assessment, cost-benefit analysis, travel cost method and Q-sort are combined, applied and tested in an event context, creating a unique book that broadens and deepens our knowledge about event impacts, theoretically, methodologically as well as empirically. This book was originally published as a special issue of the *Scandinavian Journal of Hospitality and Tourism*. **Routledge Handbook of Wine Tourism** Saurabh Kumar Dixit, 2022-11-25
