**Footprints Through Avebury** Michael W. Pitts,1985      *Footprints Through Avebury* Michael W. Pitts,1989

**Footprints Through Avebury** ,2003      **Prehistoric Avebury** Aubrey Burl,2002-01-01 This magnificent book is a fascinating account of the prehistoric stone circles at Avebury which not only II date from an earlier era but are also larger than the more famous sarsen stone circle of Stonehenge Written by a leading archaeologist the book considers every aspect of Avebury s history and construction and discusses the probable purpose of these massive structures in the process creating a vivid and moving picture of their creators a primitive people whose lives were brief savage and fearful      *Footprints Through Avebury* Mike Pitts,1985      *The Presented Past* B. L. Molyneux,P. G. Stone,2003-09-02 The Presented Past is concerned with the differences between the comparatively static well understood way in which the past is presented in schools museums and at historic sites compared to the approaches currently being explored in contemporary archaeology It challenges the all too frequent representation of the past as something finished understood and objective rather than something that is constructed and therefore open to co existing interpretations and constant re interpretation Central to the book is the belief that the presentation of the past in school curricula and in museum and site interpretations will benefit from a greater use of non documentary sources derived from archaeological study and oral histories The book suggests that a view of the past incorporating a larger body of evidence and a wider variety of understanding will help to invigorate the way history is taught The Presented Past will be of interest to teachers archaeologists cultural resource managers in fact anyone who is concerned with how the past is presented      **John Aubrey & Stone Circles** Aubrey Burl,2010-10-15 The career of eminent archaeologist John Aubrey and his revolutionary work on stone circles      **Museums and Archaeology** Robin Skeates,2022-06-19 Museums and Archaeology brings together a wide but carefully chosen selection of literature from around the world that connects museums and archaeology Part of the successful Leicester Readers in Museum Studies series it provides a combination of issue and practice based perspectives As such it is a volume not only for students and researchers from a range of disciplines interested in museum gallery and heritage studies including public archaeology and cultural resource management CRM but also the wide range of professionals and volunteers in the museum and heritage sector who work with archaeological collections The volume s balance of theory and practice and its thematic and geographical breadth is explored and explained in an extended introduction which situates the readings in the context of the extensive literature on museum archaeology highlighting the many tensions that exist between idealistic principles and real life practice and the debates that surround these In addition to this section introductions and the seminal pieces themselves provide a comprehensive and contextualised resource on the interplay of museums and archaeology      *Footprints of the Past* William Henry Abdullah Quilliam,1907      **English Heritage Book of Avebury** Caroline Malone,1989 This is an illustrated survey of one of Britain s most important archaeological sites As well as the Avebury stone circle it includes other

important neolithic monuments the Great Henge East and West Kennet Long Barrows the Sanctuary and the Avenue and Silbury Hill     The Royal Winged Son of Stonehenge and Avebury Morien O. Morgan,1901     The Galaxy on Earth Richard Leviton,2002 A new program synthesizing Eastern and Western approaches to getting well and maintaining health Unified Fitness includes numerous illustrations and photos allowing the reader to fully utilize this unique program of physical psychological and immunological fitness Copyright Libri GmbH All rights reserved     *The Wiltshire Archaeological and Natural History Magazine* ,2001     Making One's Way in the World Martin Bell,2020-02-28 The book draws on the evidence of landscape archaeology palaeoenvironmental studies ethnohistory and animal tracking to address the neglected topic of how we identify and interpret past patterns of movement in the landscape It challenges the pessimism of previous generations which regarded prehistoric routes such as hollow ways as generally undatable The premise is that archaeologists tend to focus on sites while neglecting the patterns of habitual movement that made them part of living landscapes Evidence of past movement is considered in a multi scalar way from the individual footprint to the long distance path including the traces created in vegetation by animal and human movement It is argued that routes may be perpetuated over long timescales creating landscape structures which influence the activities of subsequent generations In other instances radical changes of axes of communication and landscape structures provide evidence of upheaval and social change Palaeoenvironmental and ethnohistorical evidence from the American North West coast sets the scene with evidence for the effects of burning animal movement faeces deposition and transplantation which can create readable routes along which are favoured resources Evidence from European hunter gatherer sites hints at similar practices of niche construction on a range of spatial scales On a local scale footprints help to establish axes of movement the locations of lost settlements and activity areas Wood trackways likewise provide evidence of favoured patterns of movement and past settlement location Among early farming communities alignments of burial mounds enclosure entrances and other monuments indicate axes of communication From the middle Bronze Age in Europe there is more clearly defined evidence of trackways flanked by ditches and fields Landscape scale survey and excavation enables the dating of trackways using spatial relationships with dated features and many examples indicate long term continuity of routeways Where fields flank routeways a range of methods including scientific approaches provide dates Prehistorians have often assumed that Ridgeways provided the main axes of early movement but there is little evidence for their early origins and rather better evidence for early routes crossing topography and providing connections between different environmental zones The book concludes with a case study of the Weald of South East England which demonstrates that some axes of cross topographic movement used as droveways and generally considered as early medieval can be shown to be of prehistoric origin One reason that dryland routes have proved difficult to recognise is that insufficient attention has been paid to the parts played by riverine and maritime longer distance communication It is argued that understanding the origins of the paths we use today contributes to appreciation of the

distinctive qualities of landscapes Appreciation will help to bring about effective strategies for conservation of mutual benefit to people and wildlife by maintaining and enhancing corridors of connectivity between different landscape zones including fragmented nature reserves and valued places In these ways an understanding of past routeways can contribute to sustainable landscapes communities and quality of life      *The Ecological Footprint of Tourism* Dimitrios A.

Parpairis,Dimitrios G. Lagos,2021-04-01 This book can be considered as a unique addition to the fields of social and environmental sciences It adopts a methodological approach in calculating the Ecological Footprint of Tourism TEF through a specific case study related to the hospitality sector in Greece The book provides useful insights on the TEF as an environmental and sustainability indicator within the ongoing energy transition and under the pressures exercised by climate change and mass tourism models It introduces the reader to the concepts of ecological footprint climate change sustainable development and renewable energy governance and their role in shaping 21st century tourism This work will be of interest to students academics and researchers engaged with tourism energy and environmental management as well as various tourism stakeholders as it details how to measure environmental impact and promote sustainability in tourism through the utilization of the Ecological Footprint      *Seeing History* Hilda Kean,Sally J. Morgan,Paul Martin,2000 In recent years Public History

the engagement with history now has grown in Britain Visits to heritage sites museums and galleries are packed with enthusiasts In this collection the contributors write about history as part of a living present which is re created contested and challenged The starting points are places people and images the writers encounter in their everyday lives They have a commitment to those whose lives are still excluded from historical practice and their essays blur the boundaries between history art culture and everyday life      *Scottish Archaeological Review* ,1984      **World Prehistory: The Basics** Brian M.

Fagan,Nadia Durrani,2021-11-29 World Prehistory The Basics tells the compelling story of human prehistory from our African origins to the spectacular pre industrial civilizations and cities of the more recent past Written in a non technical style by two archaeologists and experienced writers about the past the story begins with human origins in Africa some 6 million years ago and the spread of our remote ancestors across the Old World Then we return to Africa and describe the emergence of Homo sapiens modern humans over 300 000 years ago then much later their permanent settlement of Europe Eurasia Asia and the Americas From hunters and foragers we turn to the origins of farming and animal domestication in different parts of the world after about 11 000 years ago and show how these new economies changed human existence dramatically Five chapters tell the stories of the great pre industrial civilizations that emerged after 5000 years before present in the Old World and the Americas their strengths volatility and weaknesses These chapters describe powerful rulers and their ideologies also the lives of non elites The narratives chronicle the rise and fall of civilizations and the devastating effects of long droughts on many of them The closing chapter poses a question Why is world prehistory important in the modern world What does it tell us about ourselves Providing a simple but entertaining and stimulating account of the

prehistoric past from human origins to today from a global perspective World Prehistory The Basics is the ideal guide to the story of our early human past and its relevance to the modern world      **British Civilization** John Oakland, 2015-12-22 The eighth edition of this highly praised textbook has been substantially updated and revised to provide students of British studies with the perfect introduction to Britain its country and people politics and government education economy media arts and religion It includes discussion of recent developments and areas of topical interest in British society such as immigration the recession devolution and the Scottish Referendum and Britain s relationships with the US and the EU coverage of the 2015 general election and its implications for the future new full colour illustrations exercises and questions to stimulate class discussion insights into the attitudes of British people today towards important issues updated suggestions for further reading and useful websites Supported by a fully updated companion website found at [www.routledge.com/cw/oakland](http://www.routledge.com/cw/oakland) featuring further exercises quiz questions an interactive timeline links to relevant articles and videos online and tutor guidance British Civilization is a vital introduction to the crucial and complex identities of Britain past and present

*Exploring the Occult and Paranormal in West Africa* Josephat Obi Oguejiofor, Tobias Wendl, 2012 The point of departure for this book is a phenomenon which is often referred to as the return of the religious a recent but apparently ubiquitous phenomenon which does not fit the modernist axiom of secularization neither in the developed nor the developing worlds In Africa the last two decades have witnessed a remarkable and steady increase in the spread and reinforcement of occult and paranormal phenomena The reports on these developments are not restricted to specific countries or areas they cover the whole continent and surface in the most diverse images media stories and rumors The credence accorded to them has become an important factor that shapes social relationships in everyday life economic and political actions medical decisions and religious adherence Series African Studies Afrikanische Studien Vol 47
