AECon 2020 Saefurrohman, Malim Muhammad, Heri Nurdiyanto, 2021-08-19 The 6th Asia Pacific Education and Science Conference AECON 2020 was conducted on 19-20 December 2020 at Universitas Muhammadiyah Purwokerto Purwokerto Indonesia. The theme of AECON 2020 is Empowering Human Development Through Science and Education. The goals of AECON 2020 is to establish a paradigm that emphasizes on the development of integrated education and science through the integration of different life skills in order to improve the quality of human development in education and science around Asia Pacific nations particularly Indonesia.

Teaching and Learning of Fluid Mechanics Ashwin Vaidya, 2020-12-02 This book contains research on the pedagogical aspects of fluid mechanics and includes case studies, lesson plans, articles on historical aspects of fluid mechanics and novel and interesting experiments and theoretical calculations that convey complex ideas in creative ways. The current volume showcases the teaching practices of fluid dynamicists from different disciplines ranging from mathematics, physics, mechanical engineering and environmental engineering to chemical engineering. The suitability of these articles ranges from early undergraduate to graduate level courses and can be read by faculty and students alike. We hope this collection will encourage cross disciplinary pedagogical practices and give students a glimpse of the wide range of applications of fluid dynamics.

Teaching with Classroom Response Systems Derek Bruff, 2009-10-22 There is a need in the higher education arena for a book that responds to the need for using technology in a classroom of tech savvy students. This book is filled with illustrative examples of questions and teaching activities that use classroom response systems from a variety of disciplines with a discipline index. The book also incorporates results from research on the effectiveness of the technology for teaching. Written for instructional designers and redesigners as well as faculty across disciplines. A must read for anyone interested in interactive teaching and the use of clickers. This book draws on the experiences of countless instructors across a wide range of disciplines to provide both novice and experienced teachers with practical advice on how to make classes more fun and more effective. Eric Mazur, Balkanski Professor of Physics and Applied Physics, Harvard University and author Peer Instruction: A User's Manual. Those who come to this book needing practical advice on using clickers in the classroom will be richly rewarded with case studies, a refreshing historical perspective and much pedagogical ingenuity. Those who seek a deep thoughtful examination of strategies for active learning will find that here as well in abundance. Dr. Bruff achieves a marvelous synthesis of the pragmatic and the philosophical that will be useful far beyond the life span of any single technology. Gardner Campbell, Director, Academy for Teaching and Learning and Associate Professor of Literature, Media and Learning, Honors College, Baylor University.

Conceptual Electromagnetics Branislav M. Notaroš, 2017-07-06 This is a textbook on electromagnetic fields and waves completely based on conceptual understanding of electromagnetics. The text provides operational knowledge and firm grasp of electromagnetic fundamentals aimed toward practical engineering applications by combining fundamental theory and a unique and comprehensive

collection of as many as 888 conceptual questions and problems in electromagnetics Conceptual questions are designed to strongly enforce and enhance both the theoretical concepts and understanding and problem solving techniques and skills in electromagnetics

Proceedings of the National Science Foundation Workshop on the Role of Faculty from the Scientific Disciplines in the Undergraduate Education of Future Science and Mathematics Teachers ,1993

Evaluating Teaching and Learning David Kember,Paul Ginns,2012-03-12 Every semester colleges and universities ask students to complete innumerable course and teaching evaluation questionnaires to evaluate the learning and teaching in courses they have taken For many universities it is a requirement that all courses be evaluated every semester The laudable rationale is that the feedback provided will enable instructors to improve their teaching and the curriculum thus enhancing the quality of student learning In spite of this there is little evidence that it does improve the quality of teaching and learning Ratings only improve if the instruments and the presentation of results are sufficiently diagnostic to identify potential improvements and there is effective counselling Evaluating Teaching and Learning explains how evaluation can be more effective in enhancing the quality of teaching and learning and introduces broader and more diverse forms of evaluation This guide explains how to develop questionnaires and protocols which are valid reliable and diagnostic It also contains proven instruments that have undergone appropriate testing procedures together with a substantial item bank The book looks at the specific national frameworks for the evaluation of teaching in use in the USA UK and Australia It caters for diverse methodologies both quantitative and qualitative and offers solutions that allow evaluation at a wide range of levels from classrooms to programmes to departments and entire institutions With detail on all aspects of the main evaluation techniques and instruments the authors show how effective evaluation can make use of a variety of approaches and combine them into an effective project With a companion website which has listings of the questionnaires and item bank this book will be of interest to those concerned with organising and conducting evaluation in a college university faculty or department It will also appeal to those engaged in the scholarship of teaching and learning

Assessment in Game-Based Learning Dirk Ifenthaler,Deniz Eseryel,Xun Ge,2012-06-13 The capabilities and possibilities of emerging game based learning technologies bring about a new perspective of learning and instruction This in turn necessitates alternative ways to assess the kinds of learning that is taking place in the virtual worlds or informal settings accordingly aligning learning and assessment is the core for creating a favorable and effective learning environment The edited volume will cover the current state of research methodology assessment and technology of game based learning There will be contributions from international distinguished researchers which will present innovative work in the areas of educational psychology educational diagnostics educational technology and learning sciences The edited volume will be divided into four major parts

Chemistry Education Javier García-Martínez,Elena Serrano-Torregrosa,2015-05-04 Winner of the CHOICE Outstanding Academic Title 2017 Award This comprehensive collection of top level contributions provides a thorough review of the vibrant field of chemistry education

Highly experienced chemistry professors and education experts cover the latest developments in chemistry learning and teaching as well as the pivotal role of chemistry for shaping a more sustainable future Adopting a practice oriented approach the current challenges and opportunities posed by chemistry education are critically discussed highlighting the pitfalls that can occur in teaching chemistry and how to circumvent them The main topics discussed include best practices project based education blended learning and the role of technology including e learning and science visualization Hands on recommendations on how to optimally implement innovative strategies of teaching chemistry at university and high school levels make this book an essential resource for anybody interested in either teaching or learning chemistry more effectively from experience chemistry professors to secondary school teachers from educators with no formal training in didactics to frustrated chemistry students

Sociocognitive Foundations of Educational Measurement Robert J.

Mislevy,2018-04-09 Several key developments challenge the field of educational measurement today demands for tests at larger scales with higher stakes an improved understanding of how people develop capabilities and new technologies for interactive digital assessments Sociocognitive Foundations of Educational Measurement integrates new developments in educational measurement and educational psychology in order to provide researchers testing professionals and students with an innovative sociocognitive perspective on assessment This comprehensive volume begins with a broad explanation of the sociocognitive perspective and the foundations of assessment then provides a series of focused applications to major topics such as assessment arguments validity fairness interactive assessment and a conception of measurement in educational assessment Classical test theory item response theory categorical models mixture models cognitive diagnosis models and Bayesian networks are explored from the resulting perspective Ideal for specialists in these areas graduate students developers and scholars in both educational measurement and fields that contribute to a sociocognitive perspective this book consolidates nearly a decade of research into a fresh perspective on educational measurement

Chatgpt and Other Generative AI Tools Jochen Kuhn,Stefan Küchemann,Knut Neumann, Martina Rau,2025-02-17 In the past ten years applications of generative artificial intelligence GAI have found rapidly growing use in medicine science and daily life Large language models LLMs opened up new avenues in particular for education LLMs have been used to create interactive educational content for students stimulate their curiosity generate code explanations and develop assessment questions Additionally LLMs been applied for language practice anxiety alleviation and feedback provision In higher education LLMs have shown potential for assisting in medical exam preparation and clinical decision making In school education LLMs can help teachers with automated evaluation of student responses and respective adaptive feedback More recently LLM based applications such as chatGPT have been used to generate teaching materials or assessment tasks across different subjects The fields understanding of the effects of the use of LLM based applications in classroom teaching however is still in its infancy GAI tools may help solving a range of tasks in education in particular with respect to teachers and students and

teachers efforts to generate content However it is critical that teachers and students do not overly rely on GAI generated solutions but instead critically assess each solution Students should furthermore not use GAI tools to avoid investing relevant mental effort to create mental models or more broadly build up competencies **Rasch Measurement** Myint Swe

Khine,2020-01-01 This book focuses on the use of the Rasch measurement model in validation studies and in analyzing the psychometric properties of a variety of test instruments questionnaires and scales in international contexts It broadly examines the development and application of Rasch modeling providing in depth analyses of the properties of various scales used in the fields of education and humanities and social sciences research The book includes exemplary works on educational research and practices that highlight recent and innovative applications as well as theoretical and practical aspects of Rasch modeling Readers will find it helpful to understand the latest approaches to Rasch measurement in educational research as well as practices for future studies and quantitative research This book provides a diverse set of perspectives on Rasch models from scholars across the globe The volume is both theoretical and applied The first section of the book provides an overview of Rasch modeling and explains the theoretical and conceptual framework underlying the Rasch model The remainder of the book highlights multiple applications of the Rasch model within educational assessment as well as several examples of how Rasch modeling can be used for validation studies This volume showcases the wide variety of ways in which Rasch modeling can be applied to assessment data to provide insights into students achievement and learning and to improve instruction Betsy McCoach University of Connecticut USA A well written collection of articles Grouped by the theoretical and applied aspects of Rasch measurement each chapter in this edited volume makes notable contributions to knowledge and practice Written by leading scholars in the field these chapters were written in a clear succinct and assertive manner providing readers with up to date information analyses and debates This book should be found in the core collection of emerging researchers and established scholars in educational measurement Timothy Teo Murdoch University Australia

Qualitative Inquiry in Geoscience Education Research Anthony D. Feig,Alison Stokes,2011 **Characterizing Expert and Novice Differences in Problem Solving in Heat Transfer** Sarah Elizabeth Parikh,2011 This research investigates adaptive expertise through the analysis of written open ended questions The open ended questions were given to experts advanced graduate students and to novices undergraduates taking an introductory heat transfer course Analysis of the experts responses to these questions indicated that experts make qualifying statements in their responses a newly identified characteristic of expertise Analysis of the novices responses indicates areas for future work in research and teaching Additionally the wording of the open ended questions appears to be important the responses to questions that asked participants to choose an outcome showed greater differences between the expert and novice participants than questions that asked participants to explain how or why something happens *Medical Education in Pulmonary, Critical Care, and Sleep Medicine* Patricia A. Kritek,Jeremy B. Richards,2019-05-14 This is a book for clinician educators It offers modern

evidence based practices to use in teaching learners at a range of levels with an emphasis on concrete strategies that teachers can implement in their own clinical practices as well as in small and large group settings Medical education is rapidly changing with emerging evidence on best practices and a proliferation of new technologies As strategies for effectively teaching medical learners evolve it is important to understand the implications for Pulmonary Critical Care and Sleep Medicine PCCM This text is structured to allow easy access to the reader Chapters are organized around level of learner e g medical student to PCCM fellow to practicing physicians as well as the location of teaching Given the variety of clinical settings in which PCCM physicians teach specific consideration of best practices broad changes in curricular design and pedagogy are considered in different clinical contexts Each chapter begins with a focus on why the topic is important for clinician educators A review of the available evidence and relevant medical education theory about the topic follows with examples from specific studies that provide insight into best practices regarding the concepts and topics discussed in the chapter For chapters focusing on learners different environments are considered and similarly if the focus is on the learning environment attention is paid to the approach to different learners Each chapter ends with a summary of the primary points from the chapter and concrete examples of how clinician teachers can put the concepts discussed in the chapter into practice This is an ideal guide for educators in pulmonary critical care and sleep medicine

Tools for Teaching Barbara Gross Davis, 2009-07-17 This is the long awaited update on the bestselling book that offers a practical accessible reference manual for faculty in any discipline This new edition contains up to date information on technology as well as expanding on the ideas and strategies presented in the first edition It includes more than sixty one chapters designed to improve the teaching of beginning mid career or senior faculty members The topics cover both traditional tasks of teaching as well as broader concerns such as diversity and inclusion in the classroom and technology in educational settings

Games-To-Teach or Games-To-Learn Yam San Chee, 2015-08-18 The book presents a critical evaluation of current approaches related to the use of digital games in education The author identifies two competing paradigms that of games to teach and games to learn Arguing in favor of the latter the author advances the case for approaching game based learning through the theoretical lens of performance rooted in play and dialog to unlock the power of digital games for 21st century learning Drawing upon the author s research three concrete exemplars of game based learning curricula are described and discussed The challenge of advancing game based learning in education is addressed in the context of school reform Finally future prospects of and educational opportunities for game based learning are articulated Readers of the book will find the explication of performance theory applied to game based learning especially interesting This work constitutes the author s original theorization Readers will derive four main benefits 1 an explication of the difference between game based teaching and game based learning and why this difference is of critical importance 2 an exposition of the theory of game based learning as performance 3 concrete exemplars and research outcomes relating to three game based learning curricula that have been

empirically evaluated in schools and 4 an understanding of complex issues related to the human side of school change that must be effectively addressed to achieve take up of game based learning in schools

International Encyclopedia of Education ,2009-04-17 The field of education has experienced extraordinary technological societal and institutional change in recent years making it one of the most fascinating yet complex fields of study in social science Unequaled in its combination of authoritative scholarship and comprehensive coverage International Encyclopedia of Education Third Edition succeeds two highly successful previous editions 1985 1994 in aiming to encapsulate research in this vibrant field for the twenty first century reader Under development for five years this work encompasses over 1 000 articles across 24 individual areas of coverage and is expected to become the dominant resource in the field Education is a multidisciplinary and international field drawing on a wide range of social sciences and humanities disciplines and this new edition comprehensively matches this diversity The diverse background and multidisciplinary subject coverage of the Editorial Board ensure a balanced and objective academic framework with 1 500 contributors representing over 100 countries capturing a complete portrait of this evolving field A totally new work revamped with a wholly new editorial board structure and brand new list of meta sections and articles Developed by an international panel of editors and authors drawn from senior academia Web enhanced with supplementary multimedia audio and video files hotlinked to relevant references and sources for further study Incorporates ca 1 350 articles with timely coverage of such topics as technology and learning demography and social change globalization and adult learning to name a few Offers two content delivery options print and online the latter of which provides anytime anywhere access for multiple users and superior search functionality via ScienceDirect as well as multimedia content including audio and video files

This book constitutes the refereed proceedings of the 12th International Conference on Intelligent Tutoring Systems ITS 2014 held in Honolulu HI USA in June 2014. The 31 revised full papers, 45 short papers and 27 posters presented were carefully viewed and selected from 177 submissions. The specific theme of the ITS 2014 conference is Creating fertile soil for learning interactions. Besides that, the highly interdisciplinary ITS conferences bring together researchers in computer science, learning sciences, cognitive and educational psychology, sociology, cognitive science, artificial intelligence, machine learning, and linguistics. The papers are organized in topical sections on affect, multimodality and metacognition, collaborative learning, data mining and student behavior, dialogue and discourse, generating hints, scaffolds and questions, game-based learning and simulation, graphical representations and learning, student strategies and problem solving, scaling ITS and assessment.
