Introduction to the Foundations of Education Arthur K. Ellis, John J. Cogan, Kenneth R. Howey, 1986 Economic Foundations of Education Álvaro Choi, 2023-03-23 This volume introduces the economics as a foundational discipline in education It provides economists and non economists with an accessible grounding in the key concepts and recent developments in the field The book deals with such themes as human capital theory and its alternatives the monetary and non monetary benefits of education the education production function equity in education and the evaluation of education policies In this volume students researchers and policymakers will find an entry point into the way economists think about educational questions and readers will deepen their understanding of the field with state of the art reviews of the main topics

that are at the heart of the education field today. About the Educational Foundations series: Education as an academic field taught at universities around the world emerged from a range of older foundational disciplines. The Educational Foundations series comprises six volumes each covering one of the foundational disciplines of philosophy, history, sociology, policy studies, economics, and law. This is the first reference work to provide an authoritative and up-to-date account of all six disciplines, showing how each field's ideas, methods, theories, and approaches can contribute to research and practice in education today. The six volumes cover the same set of key topics within education, which also form the chapter titles: Mapping the Field, Purposes of Education, Curriculum, Schools and Education Systems, Learning and Human Development, Teaching and Teacher Education, Assessment and Evaluation. This structure allows readers to study the volumes in isolation by discipline or laterally by topic and facilitates a comparative thematic reading of chapters across the volumes. Throughout the series, attention is paid to how the disciplines comprising the educational foundations speak to social justice concerns such as gender and racial equality.

[Foundations of Education](#) Christopher J. Lucas, 1984 **Introduction to the Foundations of American Education** James Allen Johnson, 1994 Companion vol to Foundations of American education readings [Educational Foundations](#), 1918 *The Foundations of Modern Education* Elmer Harrison Wilds, Kenneth V. Lottich, 1970 [Exploring Education](#) Alan R. Sadovnik, Peter Cookson, Jr., Susan Semel, Ryan Coughlan, 2017-10-10 This much anticipated fifth edition of Exploring Education offers an alternative to traditional foundations texts by combining a point of view analysis with primary source readings. Pre and in-service teachers will find a solid introduction to the foundations disciplines: history, philosophy, politics, and sociology of education and their application to educational issues including school organization and teaching, curriculum and pedagogic practices, education and inequality, and school reform and improvement. This edition features substantive updates including additions to the discussion of neo-liberal educational policy, recent debates about teacher diversity, updated data and research, and new selections of historical and contemporary readings. At a time when foundations of education are marginalized in many teacher education programs and teacher education reform pushes scripted approaches to curriculum and instruction, Exploring Education helps teachers to think critically about the what and why behind the most pressing issues in contemporary education.
