*Research Methods for Massage and Holistic Therapies* Glenn Hymel, 2005-09-23 This comprehensive resource covers a broad array of research strategies available to massage therapists to give them the tools they need to be knowledgeable readers of research literature as well as active researchers. The primary focus of the book is on the quantitative aspect of research that encompasses the principal types of studies most extensively used in the various health care professions, specifically massage therapy. Extensive coverage is also given to the qualitative and integrative research categories that are progressively gaining recognition among researchers in various health science disciplines and professions. Accommodates the March 2003 mandate from the Commission on Massage Therapy Accreditation (COMTA) that massage therapy schools incorporate into their curricula provisions to ensure a research literate profession. Examples and techniques for interpreting research guide practitioners and students to be knowledgeable readers of massage therapy research, allowing application to practice. Relies heavily on concept maps, flowcharts, tables, and illustrations, and excerpts of published studies to augment the book's narrative development of topics by providing pictorial displays and summaries of the material. Literature based and hypothetical research examples, illustrations from several manual therapy professions employing therapeutic massage, make the material pertinent to real life settings. An introductory section at the beginning of each chapter reviews the material covered in the previous chapter and how it relates to the new material. Chapter coverage spans the quantitative, qualitative, and integrative research categories, and affiliated research strategies and methods are considered in detail. Review summary tables give an overview of the

narrative development of topics Boxes provide the essential features of a given topic Relies on multiple examples of possible research scenarios and illustrative excerpts from the published research literature Content is cross referenced for use with the Massage Therapy Foundation s Massage Therapy Research Curriculum Kit to provide both instructors and students in the 6 15 and 24 hour options levels an extensively developed resource in one place Each chapter includes recommended web sites and software application packages for further information

### **Critical Thinking in Clinical Research** Felipe

Fregni, Ben M.W. Illigens, 2018-03-13 One of the most crucial skills a clinician scientist or student can learn is to create, conduct and interpret the conclusions of a clinical study Critical Thinking in Clinical Research teaches these fundamentals in four distinct sections called units the first unit focuses on issues surrounding the design of a study such as population, question, selection, randomization and blinding Unit 2 presents statistical methods such as analyzing data collected how to present and discuss the data concisely the third unit covers practical aspects such as methodology, organizational considerations, principles of trial conduct and reporting and the final unit delves into study designs providing the advantages and drawbacks of each design style Each chapter begins with a short introduction followed by a hypothetical case that challenges the reader to make decisions to consider pros and cons of specific approaches and to evaluate options based on specific conditions Knowing how to critically read and understand scientific papers and to collect, analyze and interpret research data which they in turn can then present in their own scientific manuscript makes this book the perfect resource for anyone looking to contribute to the wealth of scientific and medical inquiry
