

BPH 3010 Concepts in Epidemiology

Study Guide

Winter 2021

1. Define "epidemiology."

Epidemiology is the study of distribution and determinants of health and disease, morbidity, injuries, disabilities, and mortality in populations. The study focuses on controlling health issues in populations and causality.

Example: food poisoning at restaurants when chipotle had an outbreak or when foods are recalled. Tracking down how many people are affected and where it began. Or studying if vaping causes lung cancer for teens later in their life.

2. What the difference between morbidity and mortality?

Morbidity: illnesses caused by a specific disease or health condition

Mortality: the number of deaths (could look at deaths for various cases pertaining to one issue, for example how many people die from lung cancer)

3. What is the difference between description and analysis in epidemiology?

Descriptive epidemiology looks at the 5 W's (what, who, where, when, and why/how), based off person, place, and time. It focuses on characterizing the amount of distribution of health and disease within populations.

What: health issue of concern

Who: person/population affected or at risk

Where: place

When: time

Why/how: cause, risk factors, and modes of transmission

Analysis epidemiology focuses more on analyzing data and is part of the scientific method. Concerned for with cause and effect or why + how. Epidemiologists use

Foundations Of Epidemiology Paper:

Foundations of Epidemiology Marit L. Bovbjerg, 2020-10 *Foundations of Epidemiology* is an open access introductory epidemiology text intended for students and practitioners in public or allied health fields. It covers epidemiologic thinking, causality, incidence and prevalence, public health surveillance, epidemiologic study designs and why we care about which one is used, measures of association, random error and bias, confounding and effect modification and screening. Concepts are illustrated with numerous examples drawn from contemporary and historical public health issues. *The Official Program* American Public Health Association. Annual Meeting, 1981. *Collected Papers of the Mayo Clinic and the Mayo Foundation* Mayo Clinic, 1919. *Professional Practice for Foundation Doctors* Judy McKimm, Kirsty Forrest, 2011-07-01. This book is designed to support trainee doctors during the Foundation Stage of postgraduate training including preparation and application for Specialty Training posts and covers the generic non clinical aspects of postgraduate education, training and professional development. It shows trainees how the generic skills fit into professional practice and development and how the knowledge base provided by the book underpins professional practice. The book will assist the development of the knowledge, skills and competences required for good medical practice and uses case studies, activities and policy examples to illustrate key learning points.
