Medicinal Chemistry - I Miss Preeti Kumari, Dr. T. Deborah Paripuranam, Mr. Avinash Bajpai, Dr. Samba Siva Rao Bodavula, Mr. Yogesh Matta, The main emphasis of medicinal chemistry a fast growing field at the interface of chemistry and biology is the design development and optimization of pharmacological agents Understanding the molecular mechanisms underpinning therapeutic interventions and drug development is more important than ever in today's environment Medicinal Chemistry I has been designed with this idea in mind This book aims to provide professionals researchers and students with an introduction to the fundamental ideas of medicinal chemistry It goes over the fundamentals of drug action drug design and the several steps that go into taking a therapeutic substance from the lab to the patient The way the material is organized offers a methodical approach that makes difficult subjects understandable to novices while catering to more experienced readers needs This volume's chapters concentrate on important topics including the structure activity relationship SAR how enzymes and receptors affect drug operation and how physicochemical characteristics affect drug behavior The goal of each chapter is to provide a link between medicinal chemistry's theoretical underpinnings and their real world uses in drug development A lot of effort has gone into ensuring that this book's material is both up to date with pharmaceutical research trends and rigorously scientific Case studies examples and illustrations have been used to make learning interesting and to show how the ideas being addressed have practical applications It Is our goal that Medicinal Chemistry will prove to be a useful tool for both experts looking to brush up on their expertise in the area and students just starting out in medicinal chemistry We also urge readers to approach the topic with an open mind and a willingness to learn more about the enormous influence that chemistry has on medicine and health We are grateful to all who have helped make this book possible especially our students colleagues and the publishing team whose efforts have been invaluable

Synthesis and modification of bicyclo[1.1.1]pentyl sulfides Robin Bär, 2020-05-11 Bicyclo 1 1 1 pentanes BCPs gained interest in material sciences and as non classical bioisosteres for para substituted benzenes alkynes and tert butyl groups in drug design The synthesis of BCPs is still challenging and limits their application Starting from the strained 1 1 1 propellane there have been many contributions using CC and CN bond formations to obtain BCPs The CS bond formation has been rarely used and not systematically investigated Therefore this thesis aimed at the development of methods to obtain BCP sulfides and related structures from 1 1 1 propellane The obtained BCP sulfides were oxidized and iminated to obtain BCP sulfoxides and sulfoximines These modifications to tune parameters like the polarity are important for a successful application of the structural motif in drug design The final aim of this thesis was the synthesis and application of a bench stable BCP building block to facilitate the use in medicinal chemistry and other fields A facile and scalable four step route to sodium BCP sulfinate was developed to deliver the product in good yield and purity The sulfinate was applied in the synthesis of BCP sulfones sulfoxides a sulfinamide and sulfonamides
