process that begins early in a child's life. Reading by all accounts is more than decoding symbols on a page. While this is one component of the reading process, it is important for teacher candidates to see a broader, more complete picture of reading. Given the role that reading plays in the elementary school curriculum, it is imperative that teachers have a well-developed understanding of the reading process and what it means to be a teacher of readers. *Literate Lives: Teaching Reading and Writing in the Elementary Classroom* covers the major theories and application strategies of the reading process as well as current debates in the field using a unique framework that builds upon the following themes: believing that literacy is based in social, cultural, and historical contexts; assuming an inquiry stance; being problem posers and wondering why; using *Kidwatching* (Goodman, 1985) as an assessment tool to make informed instructional decisions; recognizing and using the multiple literacies that children bring to the classroom; and lingering and reflecting on one's decisions in light of what one knows and believes.
