## I/A Series® Hardware 0 to 20 mA I/O Interface Module (FBM04)

The 0 to 20 mA Input/Output Interface Module contains four 20 mA dc analog input channels and four 20 mA dc analog output channels. Each input channel accepts an analog sensor input such as a 4 to 20 mA transmitter or a self-powered 20 mA source. Each output channel drives an external load and produces a 0 to 20 mA output. The module performs the signal conversion required to interface the electrical input/output signals from/to the field sensors.

This module executes the analog I/O application program. The configurable options for this program are Analog Input Resolution (on a per module basis), Fail-Safe Configuration (Hold/Fallback), Analog Output Fail-Safe Fallback Data, (on a per channel basis), Fieldbus Switching Enable and Fieldbus Switching Time.

An optional style of termination cable assembly is available which includes built-in busbars for each
