

**FPSI's Test Preparation Manual (TPM)
9th Edition with PST Items for
Entry-Level Firefighters Order Form**

DO NOT attempt to prepare for this exam with previous editions of our TPM.
Doing so will result in a low test score.

The entry-level firefighter written test consists of two components: a reading ability component and a cognitive ability component. The reading ability component will account for 74% of the total written test weight. All of the test items in the reading ability component will come directly from the Test Preparation Manual (TPM). The TPM 9th Edition consists of five chapters describing information needed to succeed as an entry-level firefighter. Candidates typically study the Test Preparation Manual for 3 to 6 weeks and then take a multiple-choice test measuring their retention of the material in the Manual. Additionally, the general cognitive ability component will account for 26% of the total test weight (e.g., general math items, word problems, etc.). There is no study manual for the cognitive ability component of this test. Given that 74% of the total test weight will be measured by items taken directly from the TPM, the more familiar the candidate is with the TPM, the higher their score will be on the test. Purchase of the 9th Edition TPM is strongly advised.

TPM PRACTICE TEST (Optional):

The TPM Practice Test contains 50 questions that are similar to those in the actual TPM Test. The Practice Test consists of several questions from each of the five chapters covered in the TPM. This Practice Test is intended to measure the candidates' reading ability skills, not their cognitive ability skills. The answer key for the TPM Practice Test is also included.
