Fractal Rainbow Beyond Our Universe:

The Fractal Rainbow David Piñana, 2015-12-14 The current mainstream in cosmological physics proposes a unique universe that started with the Big bang approx 13 700 million years ago and it continues expanding isotropically This mainstream universe seems to be limited by both scale spectra in its upper level approx 10^{27} m by Our Universe external shape boundary or at least by the Observable Universe one and on the other hand on its lower level approx 10^{-35} m by the Planck scale size And we humans are in the middle at intermediate levels spectra between these scale size limits This book intends to show a new conception of the Universe The scale size relativity This article proposes that the universe is composed of many more scale size spectra upper and lower than the currently recognized limits possibly over 10^{1000} m and below 10^{-1000} m And for every level spectra there would be different physical concepts and laws emergents although they could be linked by common underlying laws and concepts And we humans are not in the middle We are just in a random level within this broad spectrum scale size This proposal approach might be a very important advance in explaining certain physical concepts that are currently not entirely clear Dark Energy and Matter Uncertainty Principle the dual nature of the particles particle wave etc It is an interesting and entertaining disclosure treatise on cosmology which allows the reader to know the current state of the art on the cosmological forefront and also it shows a new way of understanding the Universe very different from what we know to date The author is based on its own reflections and proposals as well as on studies and writings of other authors and cosmologists that deal with similar and related concepts and proposals

The Fractal Rainbow David Fornos, 2015-12-15 The current mainstream in cosmological physics proposes a unique universe that started with the Big bang approx 13 700 million years ago and it continues expanding isotropically This mainstream universe seems to be limited by both scale spectra in its upper level approx 10^{27} m by Our Universe external shape boundary or at least by the Observable Universe one and on the other hand on its lower level approx 10^{-35} m by the Planck scale size And we humans are in the middle at intermediate levels spectra between these scale size limits This book intends to show a new conception of the Universe The scale size relativity This article proposes that the universe is composed of many more scale size spectra upper and lower than the currently recognized limits possibly over 10^{1000} m and below 10^{-1000} m And for every level spectra there would be different physical concepts and laws emergents although they could be linked by common underlying laws and concepts And we humans are not in the middle We are just in a random level within this broad spectrum scale size This proposal approach if it is true and it can be proved might be a very important advance in explaining certain physical concepts that are currently not entirely clear Dark Energy and Matter Uncertainty Principle the dual nature of the particles particle wave etc It is more a disclosure treatise on science interesting and entertaining which allows the reader to know the current situation of the cosmological forefront but also it shows a new concept or way of understanding the Universe very different from what is understood in today The author is based on own reflections as well as studies and

writings of other authors and cosmologists that deal with similar and related concepts and proposals The Fractal Self
John L. Culliney, David Jones, 2017-07-31 Our universe science reveals began in utter simplicity then evolved into burgeoning complexity Starting with subatomic particles dissimilar entities formed associations binding bonding growing branching catalyzing cooperating as self joined other following universal laws with names such as gravity chemical attraction and natural selection Ultimately life arose in a world of dynamic organic chemistry and complexity exploded with wondrous new potential Fast forward to human evolution and a tension that had existed for billions of years now played out in an unprecedented arena of conscious calculation and cultural diversity Cooperation interleaving with competition intimacy oscillating with integrity we dwell in a world where yin meets yang in human affairs on many levels In *The Fractal Self* John Culliney and David Jones uncover surprising intersections between science and philosophy Connecting evidence from evolutionary science with early insights of Daoist and Buddhist thinkers among others they maintain that sagely behavior envisioned in these ancient traditions represents a pinnacle of human achievement emerging out of our evolutionary heritage They identify an archetype the fractal self a person in any walk of life who cultivates a cooperative spirit A fractal self is a sage in training who joins others in common cause leads from within and achieves personal satisfaction in coordinating smooth performance of the group team or institution in which he or she is embedded Fractal selves commonly operate with dedication and compassionate practice in the service of human society or in conserving our planet But the competitive side of human nature is susceptible to greed and aggression Self aggrandizement dictatorial power and ego driven enforcement of will are the goals of those following a self serving path individuals the authors identify as antisages Terrorist leaders are an especially murderous breed but aggrandizers can be found throughout business religion educational institutions and governments Humanity has reached an existential tipping point will the horizon already in view expand with cooperative progress toward godlike emergent opportunities or contract in the thrall of corrupt oligarchs and tribal animosities We have brought ourselves to a chaotic edge between immense promise and existential danger and are even now making our greatest choice *Fiction in the Quantum Universe* Susan Strehle, 2000-11-09 In this outstanding book Susan Strehle argues that a new fiction has developed from the influence of modern physics She calls this new fiction actualism and within that framework she offers a critical analysis of major novels by Thomas Pynchon Robert Coover William Gaddis John Barth Margaret Atwood and Donald Barthelme According to Strehle the actualists balance attention to questions of art with an engaged meditation on the external actual world While these actualist novels diverge markedly from realistic practice Strehle claims that they do so in order to reflect more acutely what we now understand as real Reality is no longer realistic in the new physical or quantum universe reality is discontinuous energetic relative statistical subjectively seen and uncertainly known all terms taken from new physics Actualist fiction is characterized by incompletions indeterminacy and open endings unsatisfying to the readerly wish for fulfilled promises and completed patterns Gravity's Rainbow for example ends not with a

period but with a dash Strehle argues that such innovations in narrative reflect on twentieth century history politics science and discourse

Beyond Infinity Eugenia Cheng, 2017-03-28 How one powerful concept reveals the biggest and smallest mathematical truths How big is the universe How many numbers are there And is infinity 1 is the same as 1 infinity Such questions occur to young children and our greatest minds And they are all the same question What is infinity In *Beyond Infinity* Eugenia Cheng takes us on a staggering journey from elemental math to its loftiest abstractions Along the way she considers how to use a chessboard to plan a worldwide dinner party how to make a chicken sandwich sandwich and how to create infinite cookies from a finite ball of dough *Beyond Infinity* shows how one little symbol holds the biggest idea of all

Orbs and Beyond John Pickering, Katie Hall, 2015-03-27 This the second book in the *Beyond Trilogy* expands on John and Katie s experiences and photographs of the orb phenomena covered in their first book It reveals astounding new photographs and opens up exciting new questions about the whole nature of paranormal phenomena in general John and Katie s photographs of orbs angels and other apparitions have brought them into worldwide contact with other experiencers and researchers it is from this basis that they now take a major step beyond the visible photographable phenomena and current New Age notions about orbs to reveal new insights about the paranormal Could it be that orbs are the indicators of a wider beyond reality Is the symbology of orbs as images of oneness drawing our attention to the most important orb of all the orb of Earth on which we all live Their ongoing photographs personal experiences and the amazing synchronistic events they found themselves part of reveal a conscious purposeful phenomena that can interact with us as individuals whoever and wherever we are This inevitably leads to a spiritual perspective that crosses all religious and cultural boundaries helping us to see that this one blue orb of Earth on which we all live is greater than all that divides us *Orbs Beyond* is the vital visual link between *Beyond Photography* and the forthcoming *Beyond Reality*

Pattern Theory Rachel H. Ellaway, 2024-12-30 *Pattern Theory* is a groundbreaking exploration of the concept of pattern across a range of disciplines including science neuroscience psychology and social sciences This book examines the meaning and implications of pattern presenting a comprehensive body of theory that unifies concepts of form order and regularity and connects them to memory and perception By challenging existing orthodoxies and linking evidence from brain and mind function it outlines a robust theoretical framework around pattern searching and matching pattern activation and the continuity of pattern nexuses This in depth study of pattern theory and pattern thinking delves into the cognitive basis of patterns their impact on reasoning and learning and the social and collaborative nature of pattern recognition expression and representation It also addresses philosophical issues and implications surrounding shared pattern thinking and introduces a broad conceptual basis for pattern inquiry providing a range of questions and methodologies for applying pattern theory The book culminates in a manifesto for pattern theory and its application in

pattern inquiry offering 50 key principles that can be applied across various settings Researchers scholars and practitioners are encouraged to explore and critique this unified theory as a lens for examining social and cognitive phenomena Ideal for academics and professionals seeking to challenge their understanding of the connections between mind and society as well as for those looking to deepen their understanding of pattern as a cognitive phenomenon as a theoretical lens and as a meta methodology for inquiry this text provides a substantive foundation for ongoing development and application of pattern science across multiple fields

The Fifth Element Salah-Eddin Gherbi, 2025-07-29 Unifying spirit and matter This book is an invitation to bridge science with consciousness The discoveries and knowledge from ancient civilizations throughout the ages have indicated to us the existence of a fifth element the ether The constant swirling superfluid that pervades all spaces timelines and dimensions We have all potentially felt the existence or presence of ether However further exploration and scientific investigation could significantly increase the potential practical applications of the ether ultimately benefiting humankind on all levels of life Amongst the historical physical evidence of the ether are the famous spirals carved on the stones of numerous sacred sites all over the World Many examples from antiquity are presented accompanied by beautiful illustrations to help readers connect the dots of the mystery of our sacred primordial fire which is both within and without Although the human mind has long attempted to separate all things forces and nations it is now time to reintegrate this element and consider it as the whole itself beyond the illusion of disconnection This numerical universe revealed in Glastonbury and deciphered from crop circles ancient measurements astronomy musical harmony mathematics and physics offers a new understanding of the fifth element also known as the ether This book presents a unified theory of science metaphysics and the philosophy of divine nature and geometry It encodes harmonic numbers from the Bible folklore and ancient scriptures revealing a unique template that unites the microcosm and macrocosm Note on Format and Accessibility This eBook preserves the original layout and illustrations by using high resolution images for each page As a result the text and diagrams appear exactly as they do in the print edition However because the content is embedded as images features like text resizing highlighting and screen reader accessibility may be limited For the best experience we recommend reading in portrait orientation on a full screen device

Vipassana Meditation and Ayahuasca C. Clinton Sidle, 2024-12-24 Reveals how the author a long time Buddhist practitioner found ayahuasca to be a remarkable catalyst on his spiritual path ultimately reinvigorating his own practice Explores the ayahuasca ceremony process in depth detailing the author's multi session experience in Peru and best practices when taking ayahuasca Offers an introduction to Tibetan Buddhist practice including a guided instruction to four progressive techniques of Shamata Vipassana meditation Over the last several decades serious study of Tibetan Buddhism and the use of Ayahuasca as an agent for spiritual growth have both become widespread in the West Though the two traditions originate in widely different parts of the world both are effective in working with the ego and creating a genuine spiritual opening Uniting these two paths C Clinton Sidle takes readers through his own journey as a long time but sometimes struggling Buddhist practitioner whose sojourn to Peru for a series of Ayahuasca ceremonies provided an invaluable shift in his own spiritual approach Sidle reveals how Ayahuasca was a remarkable catalyst in pointing out his self deception and psycho emotional obstacles which ultimately revitalized his practice and authentic presence in his daily life But as the author points out although a skillful means and a useful aid Ayahuasca is not a complete path on its own Introducing the calm mindfulness of Shamata Vipassana meditation as a sustainable developmental path to support and integrate the awakenings catalyzed by Ayahuasca Sidle emphasizes the complementary nature of both his work in Peru and his longer term studies in Buddhism He describes his own challenges with spiritual self deception and stagnation not uncommon on the Buddhist path shares how he integrated the lessons of his Ayahuasca experiences into his Buddhist practice and offers readers a methodical and guided introduction to four progressive techniques of Shamata Vipassana meditation Whether readers are long term seekers or novices this book can provide a singular means of aligning and reinvigorating the spiritual path toward an awakened life

This Land Margaret Blanchard, Moore Blanchard Margaret Moore Blanchard, 2010-04 Out of the women's movement of the 1980's and 90's emerged small groups of women who purchased land together usually in the country sometimes in the wilderness This Land with its blend of fiction memoir poetry and essay describes and reflects upon one such venture eight women who bought 50 acres of Adirondack forestland in which they camped and built shelters then more abiding homes From diverse backgrounds they shared the American dream of a place for us a place where they could find both sanctuary and adventure solidarity and solitude change and support These survivors of 60's and 70's ferment and activism anticipated the challenges of group living but coming from cities they had no idea how much they would be changed by their encounters with the nature which surrounded them its storms and vistas animal visits tree energies and powers of water fire stars lightning For each of the eight women these meetings with natural others provided discoveries which helped them chart the whole of their lives while guiding them toward paths of environmental guardianship This is a story about how place shapes friendship and friendship informs place The Book of Light Michael Sharp, 2006 The Book of Light shows you the complete
