Framespotting:

   Framespotting Laurence Matthews,Alison Matthews,2014-10-31 Look at it this way Everywhere we look framing affects how we see things Frames restrict our view keeping us from seeing the whole truth and subtly influencing our take on everything from deck chairs to democracy This upbeat punchy guide to framespotting will open your eyes and your mind Learn to notice frames and it s amazing what else you ll see fresh ideas how and why you re being hoodwinked and how you re part of the transition from growth to growing up Framespotting is empowering and liberating And you ll never look at sprinklers or economists the same way again   **Beyond the Cave** Peter Christian Vardy,2020-05-29 Truth is increasingly marginalized Powerful news interests social media and political orators all seem to point to the idea that the days of absolute Truth are past Religions have always claimed to stand for a transcendent dimension to reality and to the idea of an absolute claim to Truth but in the West religion has been and is declining in influence Fundamentalism is on the rise and this combined with relativism contributes to the current malaise Peter Vardy has a passionate commitment to helping people think about key issues deeply yet writes in a lucid and clear style In Beyond the Cave he explains why claims to absolute Truth have become severely eroded but he also charts a way forward   *Mental Penguins* Ivelin Sardamov,2017-05-26 Professor Ivelin Sardamov draws on key findings in neuroscience to explain the waning interest in and knowledge of complex social issues in the United States and around the world Attributing this trend primarily to the effects of information overload ubiquitous screens and constant access to the internet Sardamov argues that chronic over stimulation generated by the current sociotechnological environment fosters addictive tendencies in today s young people   **Universe Within** Melvin A. Felton,2022-02-25 Universe Within makes the case that the human brain is a physical model of the universe because of structural and dynamical similarities shared between the two systems based on the pictures emerging out of neuroscience and physics respectively The relationship between the human brain and the universe revealed by Melvin A Felton Jr might be the missing principle that leads to the theory of everything   Reframing Climate Change Shannon O'Lear,Simon Dalby,2015-07-24 Change the system not the climate is a common slogan of climate change activists Yet when this idea comes into the academic and policy realm it is easy to see how climate change discourse frequently asks the wrong questions Reframing Climate Change encourages social scientists policy makers and graduate students to critically consider how climate change is framed in scientific social and political spheres It proposes ecological geopolitics as a framework for understanding the extent to which climate change is a meaningful analytical focus as well as the ways in which it can be detrimental detracting attention from more productive lines of thought research and action The volume draws from multiple perspectives and disciplines to cover a broad scope of climate change Chapter topics range from climate science and security to climate justice and literacy Although these familiar concepts are widely used by scholars and policy makers they are discussed here as frequently problematic when used as lenses through which to study climate change Beyond merely

reviewing current trends within these different approaches to climate change the collection offers a thoughtful assessment of these approaches with an eye towards an overarching reconsideration of the current understanding of our relationship to climate change Reframing Climate Change is an essential resource for students policy makers and anyone interested in understanding more about this important topic Who decides what the priorities are Who benefits from these priorities and what kinds of systems or actions are justified or hindered The key contribution of the book is the outlining of ecological geopolitics as a different way of understanding human environment relationships including and beyond climate change issues

The Shape of Knowledge Benjamin Davies,2023-08-15 The Shape of Knowledge is the outcome of a meaningful experience that occurred in 2012 In it are developed the foundations of a new science of philosophy which promises to provide a solution to the disparity preventing our discourse from progress Through the language of the Western canon The Shape of Knowledge exposes the ubiquitous structure that conditions our capacity to reason the truth for our world Then through an investigation of the phenomenon of self reference in both the processes and products of thought this structure is shown to necessitate its own existence Underscoring it all is a principle of complementarity which arises as the modality of the rationalisation of paradox Experience is shown to be a relative process of making sense of the nonsensical nature of reality and the emergence of paraphilosophy is our means of reconciling the present war of opposites having now served its purpose with the nondual nature of self consciousness Paraphilosophy is not an idea to be believed it is the idea of the idea which is our creative spirit So this work is at root an inquiry into oneself   **Basics First** Sema Dube,Manu Dube,2017-10-27 Basics First introduces an innovative way of thinking about money Sema and Manu Dube argue that we do away with regulations allow people to travel wherever they want and trade freely Simple enough but trade will never be free if one party cannot walk away because to do so would threaten their survival This book aims to be a seed for a discussion where everyone can participate by showing that it could be possible to change our systems for the better if we focus on the basics first It is all about money About how we choose to define it   Bridge of Dreams Kevin Keating,2025-05-27 Some places are portals to a different world   Time To Tell Ronald Green,2018-11-30 Time seems to flash by when we are enjoying ourselves and slows to a crawl when we are bored Why Does time exist or is it an illusion Does it flow Is it linear How real are our memories When is now These are just some of the questions that Time To Tell asks in its foray into what time is for us what it does to us and for us and how we live and react to it in our daily lives Digging down to the roots of our lived experience in the world Time To Tell takes us through a journey replete with twists and turns and aha moments Challenging the obvious the book asks us to look anew at our perspective of what we naturally take for granted Rattling the comfort of instant satisfaction of reality shows celebrity worship and the self glorification of the I generation Ronald Green with panache and authority takes us on a journey that allows us a new way of looking at ourselves in the world and to act upon what we discover   **Unbelievable** Willie Van Peer,2023-06-30 The New Testament has had a profound impact on

Western society But what do we actually know about its evolution In what context did the texts originate Who was Jesus and how did he become the Son of God Were the four evangelists reliable witnesses Why are there so many inconsistencies and contradictions in the New Testament Unbelievable The Gospel Texts in Narrative Tradition and Historical Context explores the traditions and historical reality behind the New Testament shedding a whole new light on the biblical stories This book is aimed at interested readers who want to learn how the New Testament came into being and how it has moulded our societies Although it is based on sound scholarly research Unbelievable seeks primarily to appeal to a broad audience Its style and clear language enable the reader to gain insight into the historical and literary contexts from which these texts emerged and how they have shaped all Western cultures **Expanding Reality** Mario Beauregard,2021-11-26 In Expanding Reality neuroscientist Mario Beauregard presents the impressive body of scientific evidence that our familiar materialistic model of the world is locked into a sadly outdated 19th century philosophy Whether or not you agree with all his conclusions this courageous book will challenge you to rethink how we see ourselves and our world and may help usher in a new scientific revolution Bruce Greyson M D Carlson Professor Emeritus of Psychiatry Neurobehavioral Sciences Division of Perceptual Studies University of Virginia Health System Reality is much more than the physical world before us In Expanding Reality Mario Beauregard examines a variety of phenomena investigated by the most open minded and visionary scientists These phenomena provide the evidence that mind consciousness and spirit cannot be simply reduced to electrical and chemical activity in the brain **The Mysteries of Reality** Gayle Kimball,2021-03-26 Courageous scientists challenge the dominant paradigm of reality Why are they so brave and what does their research reveal What is reality Is there more than we know from our five senses Vanguard scientists believe there is more than we see so they formulate a non materialist paradigm that expands human potential to include mind and matter interaction Since going against the dominant worldview provokes opposition this book explores the personal backgrounds of the scientists to find out why they are so courageous We learn that there is another dimension that allows for enhanced abilities Based on interviews conducted by Gayle Kimball The Mysteries of Reality Dialogues with Visionary Scientists reports on the current research and personal characteristics of visionaries from around the world **The Daimon and the Soul of the West** Bernardo Kastrup,2025-08-26 Your life isn t has never been and will never be about you *Western Philosophy Made Easy* Dennis Waite,2018-07-27 Charting the history of Western thought from Socrates to Sartre from Epicureans to Existentialists Western Philosophy Made Easy offers a short readable historical summary of aspects of Western philosophy and key philosophers from Ancient Greece to the modern day with the emphasis on topics of direct relevance to our own lives <u>Brief Peeks Beyond</u> Bernardo Kastrup,2015-05-29 This book is a multi faceted exploration and critique of the human condition as it is presently manifested It addresses science and philosophy explores the underlying nature of reality the state of our society and culture the influence of the mainstream media the nature of free will and a number of other topics Each of these examinations contributes an angle to an emerging

idea gestalt that challenges present mainstream views and behaviors and offers a sane alternative The book is organized as a series of short and self contained essays most of which can be read in under one hour   *Prodigal* Don Jackson,2025-07-29 Leaving Church and Finding God   **The Bullet in the Pawpaw** Kim Hope,2020-02-28 Kim a na ve poorly educated English girl is enjoying the delights of London in the Swinging Sixties when a chance encounter takes her on a journey to South Africa Travelling as an actor with a touring Shakespeare company Kim is irrevocably drawn to the beloved country but her abhorrence of the oppressive system of apartheid forces her to return home This experience changes the direction of her life and now having achieved a longed for education she is on a mission to stop the spread of HIV She creates the Themba HIV AIDS Organisation in Johannesburg and recruits and trains young people from the townships to deliver a unique programme of interactive theatre workshops   *Now Is Not the Time* Brett Bowden,2024-11-26 Human beings have an overwhelming tendency to overemphasize the significance of the present without considering context or historical perspective For many here and now is as good as it gets we have steadily progressed from a savage past and all we have to look forward to is the great unknown But if our literature and cinema are anything to go by many are convinced that the future will indeed be dystopian At the same time arguments abound that living in the moment is a key to happiness and success However to privilege the present over the past or future Brett Bowden argues is to engage in tempocentrism More than a mere preoccupation with the present tempocentrism involves comparing and judging the past in relation to the present with the tendency to assume that the present isn t only materially and qualitatively different from the past but also superior to it often morally so Yet tempocentrism a mistaken belief in the unprecedented nature of events going on around us brings with it a skewed perspective loaded with bias and prejudice Requiring just as much ignorance and arrogance as Eurocentrism tempocentrism implies that the present is somehow superior to the past because we live in it now The point however is not to suggest that there is not something special about the present there might well be but now is not the time to decide whether it is more significant than previous moments or those still to come Depending on the issue or event in question the time for that is later possibly hundreds or thousands of years later   **The Deceptive Brain** Robert L. Taylor,2021-10-29 Preposterous as it sounds we are not who we seem to be Not even close At the heart of this misperception is our deep seated conviction of free choice Based on emerging neurobehavioral science findings The Deceptive Brain makes the case for human experience as a narrative illusion an executive summary of sorts that emerges from an incredibly complex brain The Deceptive Brain drills down on what this finding means for the way we blame and punish and presents a bold alternative approach to criminal justice based on blameless responsibility   **Hiding in Plain Sight** Serghei Sadohin,2024-07-26 Hiding in Plain Sight is a captivating exploration of the intricate relationship between language and the concealed order of human existence Drawing on existentialist philosophy literature poetry etymology and historical analysis it delves into the hidden significance of everyday words and the powerful impact they have on our understanding of the world and our place within it Journey into the

heart of language to reveal its power in shaping our existence and perception of reality
