The Locales Framework G. Fitzpatrick, 2013-06-29 So much technology works not by good design or by being a good fit to purpose but because people make it work because they have to for some reason. We humans are incredibly creative and resourceful when it comes to getting something done. There are numerous stories we could all tell of the ingenious workarounds we've developed to make something do what we want it to or the enormous amount of time we've spent trying to find out how to make some technology work as we want. e.g. trying to find out how to turn off auto-editing commands in a word processing package when all we want is for it to do what we tell it. A good example of this principle was what motivated me to switch from neural networks to the area of Computer-Supported Cooperative Work (CSCW) for my PhD research. I had undertaken a case study looking at the deployment of a multi-million-dollar health information system throughout a hospital network.

A Companion to Contemporary Art in a Global Framework Jane Chin Davidson, Amelia Jones, 2023-10-16 *A Companion to Contemporary Art in a Global Framework* explores the ways specialists and institutions in the fine arts, curation, cultural studies, and art history have attempted to situate art in a more global framework since the 1980s. Offering analyses of the successes and setbacks of these efforts to globalize the art world, this innovative volume presents a new and exciting way of considering art in its global contexts. Essays by an international panel of leading scholars and practicing artists assert that what we talk about as art is essentially a Western concept; thus, any attempts at understanding art in a global framework require a revising of established conceptual definitions. Organized into three sections, this work first reviews the history and theory of the visual arts since 1980 and introduces readers to the emerging area of scholarship that seeks to place contemporary art in a global framework. The second section traces the progression of recent developments in the art world, focusing on the historical and cultural contexts surrounding efforts to globalize the art world and the visual arts in particular. The final section addresses a wide range of key themes in contemporary art, such as the fundamental institutions and ontologies of art practice and the
