Portrait and Place Giulia Paoletti, 2024-03-05 A richly illustrated history of photography in one of the epicenters of African modernity When the daguerreotype first arrived in sub Saharan Africa in the early nineteenth century local kingdoms still held power in Senegal and the French presence was limited to trading outposts along the coast The pioneers of photography in Senegal worked within across and beyond the borders of colonial empire expanding the medium s possibilities and contributing to a global visual language Portrait and Place explores these unique encounters providing an in depth and nuanced look at the images made at the intersection of Black Atlantic Islamic and African cultures Giulia Paoletti takes readers on a visual journey from the 1840s when the oldest surviving daguerreotype from West Africa was made to the 1960s when photography became the most popular medium as Senegal achieved its independence She discusses some of Africa s most celebrated modernists such as Mama Casset and also offers insights into lesser known photographers like Oumar Ka and once anonymous figures such as Macky Kane Paoletti examines both professional and amateur artists in genres ranging from portraiture to landscape and across media such as glass painting and lithography Featuring a wealth of breathtaking images published here for the first time Portrait and Place brings to life the important histories of photography on the African continent

Hybrid Photography Sara Hillnhuetter, Stefanie Klamm, Friedrich Tietjen, 2021-04-07 This book explores the territories where manual graphic photographic and digital techniques interfere and interlace in sciences and humanities It operates on the assumption that when photography was introduced it did not oust other methods of image production but rather became part of ever more specialized and sophisticated technologies of representation The epistemological break commonly set with the advent of photography since the nineteenth century has probably been triggered by photographic techniques but certainly owes much to the availability of a plethora of hybrid media media that influence the relation of sciences humanities and their methods and subjects This book will be of interest to scholars in art and visual culture photography and history of photography

Women and Photography

in Africa Darren Newbury, Lorena Rizzo, Kylie Thomas, 2020-10-26 This collection explores women's multifaceted historical and contemporary involvement in photography in Africa. The book offers new ways of thinking about the history of photography exploring through case studies the complex and historically specific articulations of gender and photography on the continent and attending to the challenge and potential of contemporary feminist and postcolonial engagements with the medium. The volume is organised in thematic sections that present the lives and work of historically significant yet overlooked women photographers as well as the work of acclaimed contemporary African women photographers such as Hla Ammar Fatoumata Diabat Lebohang Kganye and Zanele Muholi. The book offers critical reflections on the politics of gendered knowledge production and the production of racialised and gendered identities and alternative and subaltern subjectivities. Several chapters illuminate how contemporary African women photographers, collectors and curators are engaging with colonial photographic archives to contest stereotypical forms of representation and produce powerful counter histories. Raising critical questions about race, gender and the history of photography, the collection provides a model for interdisciplinary feminist approaches for scholars and students of art history, visual studies and African history. **Sensory Abilities of Cetaceans** Jeanette A. Thomas, Ronald A. Kastelein, 2013-11-11 This book evolved through the efforts of several organizations and the dedication of many individuals. In 1987 we received a request to propose a workshop topic for the Fifth International Theriological Congress (ITC) to be held in August 1989 in Rome, Italy. After looking up the meaning of the word theriological in the dictionary and discovering that it pertains to mammalian behavior, we decided a symposium on sensory abilities of whales and dolphins would be an interesting topic. The ITC convenes only every five years and has the distinction of being very well attended by scientists from around the world. We thought that hosting a workshop in conjunction with the ITC would attract a variety of international scientists that rarely have the opportunity to interact. Fortunately for all involved, our prediction was correct. The first two days of the workshop, 23-24 August 1989, were held in conjunction with the ITC and the nearly 1,000 attending scientists were able to view our posters and listen to lectures. The third day was limited to only about 65 invited scientists who were divided into topical working groups chaired by a rapporteur. *Musical Portraits* Joshua S. Walden, 2018 Joshua S. Walden's study of the genre of musical portraiture since 1945 focuses on significant composers of the period including Pierre Boulez, Morton Feldman, Philip Glass and György Ligeti. Grounding his exploration in key works, Walden uncovers contemporary understandings of music's capacity to depict identity and of intersections between music, literature, theater, film and the visual arts. young people and their transitions throughout their first year of high school deepening our understanding of how it is to be young and enter new institutional settings and how to understand the developmental dynamics of youth life It explores the everyday life of six young people as they enter high school and follows them closely as they encounter and try to make sense of the different standards values and demands that are built into the institutional setting of high school The chapters explore the entanglements of personal motive orientation interpersonal dynamics institutional values and demands as well as societal standards and how subtle negotiations of who one is and ought to be are interwoven into the fabrics of everyday life Hence the book explores variations on an institutional level as different high school environments along with variations on an interpersonal level insisting on a person environment reciprocity in the study of development Using cultural historical activity theory and ecological psychology derived from theorists including Bang Barker Wright Gibson Lewin Hedegaard Ilyenkov Stetsenko and Vygotsky Sofie Pedersen argues that developmental dynamics among young people cannot be reduced to individual nor social processes alone but are connected to institutional conditions and to concrete places By insisting on a wholeness approach to the understanding of youth development Pedersen reveals the developmental dynamics that unfold in

the everyday lives of young people and sheds new light on youth life dynamics including the challenges that young people face Cézanne Portraits John Elderfield, Mary Morton, Xavier Rey, 2017-11-28 Published in 2017 in Great Britain by National Portrait Gallery Publications London **Unfixed** Jennifer Bajorek, 2020-02-07 In *Unfixed* Jennifer Bajorek traces the relationship between photography and decolonial political imagination in Francophone west Africa in the years immediately leading up to and following independence from French colonial rule in 1960 Focusing on images created by photographers based in Senegal and Benin Bajorek draws on formal analyses of images and ethnographic fieldwork with photographers to show how photography not only reflected but also actively contributed to social and political change The proliferation of photographic imagery through studio portraiture bureaucratic ID cards political reportage and photojournalism magazines and more provided the means for west Africans to express their experiences shape public and political discourse and reimagine their world In delineating how west Africans embrace of photography was associated with and helped spur the democratization of political participation and the development of labor and liberation movements Bajorek tells a new history of photography in west Africa one that theorizes photography's capacity for doing decolonial work

A Prehistory of the Cloud Tung-Hui Hu, 2016-09-02

The militarized legacy of the digital cloud how the cloud grew out of older network technologies and politics We may imagine the digital cloud as placeless mute ethereal and unmediated Yet the reality of the cloud is embodied in thousands of massive data centers any one of which can use as much electricity as a midsized town Even all these data centers are only one small part of the cloud Behind that cloud shaped icon on our screens is a whole universe of technologies and cultural norms all working to keep us from noticing their existence In this book Tung Hui Hu examines the gap between the real and the virtual in our understanding of the cloud Hu shows that the cloud grew out of such older networks as railroad tracks sewer lines and television circuits He describes key moments in the prehistory of the cloud from the game Spacewar as exemplar of time sharing computers to Cold War bunkers that were later reused as data centers Countering the popular perception of a new

cloudlike political power that is dispersed and immaterial Hu argues that the cloud grafts digital technologies onto older ways of exerting power over a population But because we invest the cloud with cultural fantasies about security and participation we fail to recognize its militarized origins and ideology Moving between the materiality of the technology itself and its cultural rhetoric Hu s account offers a set of new tools for rethinking the contemporary digital environment
