Entrepreneurial Ecosystem Perspectives From Emerging Economies:

Entrepreneurial Ecosystem Mathew J Manimala, Kishinchand Poornima Wasdani, 2015-02-09 Economic development is a priority for all nation states whether developing or developed. In recent times a few among the developing nations often referred to as the emerging economies have attracted the world's attention because of their fast pace of economic growth. While the similarities among these nations, for example the BRICS, in the pattern of their economic growth are highlighted and discussed, the differences are often glossed over. This book therefore attempts to present the diverse ways in which entrepreneurship is facilitated in emerging economies through a compilation of research papers from six different countries: India, China, Singapore, Hong Kong, Nigeria, and New Zealand, belonging to the class of emerging economies. The papers included in this book cover a variety of topics related to the creation and management of an entrepreneurial ecosystem, such as intercultural interactions, IPR issues, government policies for SMEs, social entrepreneurship, opportunity identification, green entrepreneurship, employee entrepreneurship, symbiotic ventures, and social capital. Social fluidity, mapping for reducing failure stigma, green awareness in the corporate world, and among entrepreneurs, venture capital for growth, immigrant entrepreneurs, entrepreneurial success, and life satisfaction among others. The contributions are supported by an introductory chapter that provides an integrative framework by unifying the diverse patterns of economic development in the different countries under various institutional inadequacies as a process of muddling through to development necessitated by the non-systematic development of the ecosystem for new venture creation. This book is indeed a must-read for those interested in understanding the process of entrepreneurship and economic development in emerging economies. **Entrepreneurship**

The first part, containing the introductory chapter, provides different perspectives on transnational entrepreneurship, returnee entrepreneurship, and their linkages with the internationalization process. The subsequent parts have chapters dealing with three sub themes of the subject: the internal factors, individual and firm level resources, the external factors, entrepreneurial ecosystem, and the process of organizational transformation and change, respectively, in the context of SME internationalization. Special issues and challenges being faced by SME entrepreneurs in emerging economies have been highlighted in this book, discussing key contemporary issues with regard to internationalization in the three dimensions outlined above. Further, the book explains how an entrepreneur can engineer the transformation of his/her organization into an international SME.
