Eisinger, 1988 The Rise of the Entrepreneurial State charts the development of state and local government initiatives to influence the market and strengthen economic development policies This trend marked a decisive break from governments traditionally small role in the affairs of private industry that defined the relationship between the public and private sector for the first half of the twentieth century The turn to state and local government intervention signaled a change in subnational politics that in many ways transcended partisan politics regional distinctions and racial alliances Eisinger s meticulous research uncovers state and local governments transition from supply side to demand side strategies of market creation He shows that instead of

relying solely on the supply side strategies of tax breaks and other incentives to encourage business relocation some governments promoted innovation and the creation of new business approaches *Local Economic and Employment Development (LEED) Entrepreneurship and Local Economic Development Programme and Policy Recommendations* OECD,2003-03-11 This book examines the principal routes through which enterprise creation can have a positive impact on local economies Local Economic and Employment Development (LEED) Entrepreneurship and Local Economic Development Alistair Nolan,Organisation for Economic Co-operation and Development,2003-03-28 There is a widespread growth of policies to encourage the development of new enterprises and entrepreneurship however there have been relatively few studies on the relationship between these policies and local economic development This book fills that gap It covers three thematic areas strategy finance and programmed design makes recommendations to help the design of entrepreneurship programmes and describes the research that should be undertaken to improve the understanding of key policy issues *Entrepreneurship and Regional Economic Development* Henri L. **Local Economic and Employment Development (LEED)**

**Entrepreneurship A Catalyst for Urban Regeneration** OECD,2004-12-14 Entrepreneurship and urban regeneration policy have traditionally been treated as separate fields This volume is one of the first to focus explicitly on the links between the two examining how policy can help regenerate inner cities and other areas of urban distress

Entrepreneurship, Social Capital and Governance Charlie Karlsson,Börje Johansson,Roger Stough,2012-01-01 This book highlights the role of

entrepreneurship social capital and governance for regional economic development In recent decades many researchers have claimed that entrepreneurship is the most critical factor in sustaining regional economic growth However most entrepreneurship research is undertaken without considering the fundamental importance of the regional context Other research has emphasized the role of social capital but there are substantial problems in empirically relating measures of social capital to regional economic development The expert contributors to this work highlight the role of governance in regional growth an area that has so far been relatively under researched underpinning their findings with new theoretical and empirical evidence They conclude that the relationship between entrepreneurship social capital and governance in factors affecting regional economic development are complex and interdependent and that to influence these factors and the relationship between them policymakers must have a long term perspective and be both patient and persistent in their efforts This enlightening book will be of great interest to academics students and researchers across a range of fields including regional science regional economics economic geography regional planning public policy entrepreneurship political science and economic sociology Policymakers involved in regional policymaking from national down to regional and local levels will also find the book to be an illuminating read
