Climate Change-Resilient Agriculture and Agroforestry Paula Castro, Anabela Marisa Azul, Walter Leal Filho, Ulisses M. Azeiteiro, 2019-01-24 This book collects wide ranging contributions such as case studies reviews reports on technological developments outputs of research studies and examples of successful projects presenting current knowledge and raising awareness to help the agriculture and forestry sectors find solutions for mitigating climate variability and adapting to change

It brings the topic of ecosystem services closer to education and learning as targeted by the Framework Convention on Climate Change and the Paris Agreement the 2030 Agenda for Sustainable Development and the EU Biodiversity Strategy to 2020 Climate change and its impacts on agriculture and agroforestry have been observed across the world during the last 50 years Increasing temperatures droughts biotic stresses and the impacts of extreme events have continuously decreased agroforestry systems resilience to the effects of climate change As such there is a need to adapt farming and agroforestry systems so as to make them better able to handle ever changing climate conditions and to preserve habitats and ecosystems services

Hydrostructural Pedology Erik Braudeau, Amjad T. Assi, Rabi H. Mohtar, 2016-06-17 This book presents an in depth guide to the subject matter and main points of hydrostructural pedology as theorized for the first time The authors focus on the underlying concepts the purpose and role this field plays within agroenvironmental sciences It is divided into two parts Part 1 presents the theory behind hydrostructural pedology The systemic approach applied to the soil is presented showing how this leads to the thermodynamic formulation of water in the soil's organized medium and to the systemic modeling of soil water coupling in natural or anthropic organizations Part 2 presents the methodology to complement the first part In it the authors determine the hydrostructural characteristics of the pedostructure characteristic parameters of equilibrium state equations and the hydrostructural functioning of the soil

Modeling for Sustainable Management in Agriculture, Food and the Environment George Vrontzos, Yiannis Ampatzidis, Basil Manos, Panos M. Pardalos, 2021-12-23 Recent developments in computer science data mining and big data analytics have resulted in new operational frameworks in agriculture food and the environment which in fact share a strong link between them A key challenge for researchers is to extract new data patterns and utilize them in decision making Managers policy makers and practitioners have to be aware of these methodologies in order to establish efficient and effective working groups for the tasks to be resolved The book reviews the complexity of the interrelationship between agriculture food production and processing and environmental issues It also highlights the prospects of modeling in various cases of problem solving in these sectors and reviews the new and future challenges Consumer awareness in food production and processing practices is continually increasing and the necessity for advanced behavioural tools follows the same trend Furthermore the value chain management challenge is becoming one of the most crucial tasks due to the increased importance of new parameters like the origin of products its environmental footprint and the enhancement of local production etc The book addresses these topics in a holistic approach merging modeling with advanced marketing practices in a coherent and innovative manner being an effective tool in a continuously demanding world
