at your fingertips      **Environmental Risk Assessment and Management from a Landscape Perspective** Lawrence A. Kapustka, Wayne G. Landis, 2010-07-15 An important guide to assessing and managing the environment from a landscape perspective Ecological relationships are nested within the landscape Identifying the relevant spatial and temporal scales is critical for an effective understanding of ecological functions that human societies depend upon Moreover human encroachment into natural areas or changes in climate can alter spatial relationships which in turn can negatively affect vital plant and wildlife patterns and weaken economic structures needed to sustain human societies This book is the first to combine multiple disciplines into one cohesive strategy to study these crucial connections and looks toward building a social paradigm that embraces the dynamics of ecological systems This book Integrates landscape ecology environmental risk assessment valuation of ecological goods and services and environmental management decision processes into one single source Includes chapters on quantitative measures Bayesian modeling economic analysis and sustainable landscapes Covers marine forest agricultural and pharmaceutical risk assessment Has a chapter on predicting climate change risk to ecosystems Has a companion ftp site with color graphics animations and risk assessment tools With material that is accessible across all knowledge levels Environmental Risk Assessment and Management from a Landscape Perspective moves beyond looking solely at chemical contaminants to diagnose environmental threats and aims to accomplish practical risk assessment in a manner that supports long term sustainable management      Assessment and Management of Environmental Risks Igor Linkov, José Palma-Oliveira, 2012-12-06 Managing environmental contamination requires decision makers to weigh existing risks against the potential effects of implementing environmental policies considering both the benefits and disruptions that may result from different actions The NATO Advanced Research Workshop in Lisbon was an important step in the development and application of cost efficient methods of risk assessment especially within the constraints of a budget The goal of the workshop was to evaluate the potential for risk assessment to serve as a unified and unifying technique in addressing a wide range of environmental problems Papers presented in this book discuss issues ranging from specific and local studies specific site ecosystem pollutant to global decision and management frameworks watersheds regions integration of multiple pollutants and stressors they develop a range of approaches starting from specific methods to widely applied public policies Figure 1 The papers show that the use of risk assessment can provide the scientific basis for environmentally sound and cost efficient policies strategies and solutions to our environmental challenges The organization of the Proceedings reflects sessions and discussions during the workshop The papers in the introductory Chapter summarize the positions of Drs Glenn Suter EPA and Jim Wilson Resources for the Future regarding whether the use of often expensive risk assessments in developing countries can be justified given evolving regulatory institutions and limited resources      *Environmental Risk Assessment* Ian Lerche, Walter Glaesser, 2007-04-03 The world is a dirty place and getting dirtier all the time The reasons for this ever increasing lack of cleanliness are not hard to find being basically caused by the

actions of the six billion people who inhabit the planet The needs of the people for air water food housing clothing heating materials oil gas minerals metals chemicals and so forth have over the centuries given rise to a variety of environmental problems that have been exacerbated or been newly created by the industrialization of the world the increase in population and the increase in longevity of the population The costs of cleaning even fractions of the known environmental problems are truly enormous as detailed in the volume *Environmental Risk Analysis I* Lerche and E Paleologos 2001 McGraw Hill The chances of causing new environmental problems and their associated costs of clean up are equally challenging in terms of anthropogenic influences and also of the natural environmental problems that can be triggered by humanity This volume discusses many examples of environmental problems that have occurred and that are still ongoing The volume also considers the effects in terms of sickness and death of fractions of the population of the planet caused by such environmental problems
