Thorstein Veblen David Riesman, This is a brilliant and unconventional study of one of the most challenging figures in modern social and economic thought David Riesman has chosen a deliberately personal method of exposition and evaluation and he is by no means a disciple He says of Veblen I find him more often interesting than attractive more often pungent than wise By approaching Veblen subjectively and in a critical spirit Riesman has arrived at an estimate of the man that is objective and balanced Veblen s ideas and attitudes are carefully examined with particular attention to his conviction that the instinct of workmanship was the constructive element in life and to his fundamental principle of idle curiosity Veblen is seen as a man with a passionate moral sense whose method was irony coupled with research Riesman makes the interesting point that the author of The Theory of the Leisure Class was episodically a passionate even revolutionary reformer in contrast to a career primarily as an intellectual skeptic Riesman looks behind the ideas searching for their origins in Veblen s life with the result that one finishes the book with a genuine sense of the strange man who is its subject Riesman concludes that Thorstein Veblen is important not so much for his specific contribution to economic thought as for his stance toward the economy and his fellow economists For us today Riesman adds Veblen s great value inheres in his way of seeing The new introduction by Mestrovic provides an appreciation of Riesman no less than Veblen David Riesman is the Henry Ford II Professor Emeritus of Social Sciences at Harvard University He has also taught at the University of Chicago and Johns Hopkins University Among his most important books are The Lonely Crowd Faces in the Crowd Individualism Reconsidered and Constraint and Variety in American Education His collection Abundance for What confirms his place as the foremost sociologist of education in the modern era Stjepan G Mestrovic is a senior social theorist in his own right He is currently located at Texas A M University

Active Teaching and Learning Strategies Rock Moore, Michelle A. Moore, 2004 Active Teaching and Active Learning Strategies Creating a Blueprint for Success is the cumulative result of a year of reflecting asking and listening to questions and comments that many have concerning the education of our youth The book's genesis however started many years ago as the state of California along with many other states embraced a standards based accountability system This accountability has now been coupled with the recent addition of The No Child Left Behind Legislation In a real sense we are entering both the best and worst of times I say this because of the effects of high stakes testing and the requirement that all students reach high levels of proficiency which admittedly are very lofty goals For this to be realized changes will be required in teaching and assessment as well as a more concentrated focus on student learning The instructional design introduced in this book advocates four components academic social collaborative contextual and cognitive developmental These components work in tandem with Active Teaching and Learning Strategies Combined they form a student responsive instructional methodology which optimizes student success and academic achievement We wanted to create a book that demonstrated to those of us in the field of education the value of looking at academic standards with data about our students and reflecting on how this information should influence our choices concerning instructional practices and our perceptions about the students that we are entrusted with The focus of this endeavor is to see all students achieve and succeed and to keep passion and compassion at the heart of all that we do It is the premise of this book that the difference between effective and outstanding teachers are that outstanding teachers care know how to utilize data practice active teaching strategies and promote the active learning of students Together these characteristics became the design and course of action that Created a Blueprint for Success
