

Falcon® HR

Traffic Safety RADAR

The reliable choice for hand-held Directional K-Band RADAR.

High Performance

- Directional Doppler RADAR system for target identification
- Digital Signal Processing (DSP) for tracking multiple targets
- TruTrak™ VSS interface, with dash mount option, allows automatic mode switching between moving and stationary modes eliminating patrol shadowing and combining errors (moving option)
- Supports tracking history after target lock with "Track through lock"
- Smart Patrol Search rejects inaccurate patrol speeds
- Displays fastest target quicker than leading competitor

Low Power

- FCC Type 15 device
- Long battery life and low transmitted power

Easy to Read

- LCD non-multiplexed display for improved readability in direct sunlight
- LED backlight for night time operation
- Simple push button user interface
- Auto self-test with every locked target

Operational Configurations

- Upgradeable to moving operation with IR or wired remote
- Moving same lane option
- Handle on or pod mount for moving operation
- Interchangeable accessories with the Falcon family including battery handle and pod mount
- Narrow 12° beam width for improved targeting
- NHTSA Conforming Products List

Easily readable in direct sunlight

High performance, low power

Moving operation available

Directional K-band

Falcon Hr Radar User Manual:

Handbook of Defence Electronics and Optronics Anil K. Maini, 2018-07-23 Handbook of Defence Electronics and Optronics Anil K Maini Former Director Laser Science and Technology Centre India First complete reference on defence electronics and optronics Fundamentals Technologies and Systems This book provides a complete account of defence electronics and optronics The content is broadly divided into three categories topics specific to defence electronics topics relevant to defence optronics and topics that have both electronics and optronics counterparts The book covers each of the topics in their entirety from fundamentals to advanced concepts military systems in use and related technologies thereby leading the reader logically from the operational basics of military systems to involved technologies and battlefield deployment and applications Key features Covers fundamentals operational aspects involved technologies and application potential of a large cross section of military systems Discusses emerging technology trends and development and deployment status of next generation military systems wherever applicable in each category of military systems Amply illustrated with approximately 1000 diagrams and photographs and around 30 tables Includes salient features technologies and deployment aspects of hundreds of military systems including military radios ground and surveillance radars laser range finder and target designators night visions devices EW and EO jammers laser guided munitions and military communications equipment and satellites Handbook of Defence Electronics and Optronics is an essential guide for graduate students R D scientists engineers engaged in manufacturing defence equipment and professionals handling the operation and maintenance of these systems in the Armed Forces **Air Force** ,1945 Vols 41 no 11 v 42 no 5 include Space digest v 1 2 no 5 Nov 1958 May 1959 **Airman's Information Manual** ,1976 **A Hard Fought Ship** John A Rodgaard, 2024-06-30 Here is the exhaustive and exhilarating story of HMS Venomous one of sixty seven V W destroyers built at the end of the Great War that were to play a key role in the struggle to keep the sea lanes open in the Atlantic Home Waters and the Mediterranean during the following war Her story was perhaps the most memorable of all her class When war broke out she was to find herself in the front line as the German blitzkrieg swept across Europe in 1940 and the V Ws made high speed dashes across the Channel to bring troops and civilians back from Calais Boulogne and Dunkirk and prepared for the expected invasion Later that year she and her sister ships escorted the Atlantic convoys which supplied our Russian allies with the weapons to halt the German advance She returned to the Mediterranean and took part in Operation Pedestal to save Malta and as the allies prepared for the landings in North Africa she was ordered to escort the destroyer depot ship HMS Hecla to the invasion beaches When Hecla was torpedoed off the coast off Morocco Venomous fought the attacking U boat and rescued 500 survivors She escorted convoys along the coast of North Africa including the first through convoy from Gibraltar to Alexandria and she joined the invasion force to Sicily during Operation Husky In October 1943 she returned to Britain for a major refit at Falmouth when she was converted to an air target ship for training Barracuda torpedo bombers based at

Douglas Isle of Man and then after being transferred to the east coast she was nearly lost in a hurricane before being sent to Kristiansand to accept the surrender of German naval forces. *Venomous* and her sister ships were all scrapped after the War but her extraordinary career during which she fought without cessation is brought to life in this rousing and beautifully told ship biography a fitting memorial to the V Ws and the men who served in them. I would rate this as being in the same class as *The Cruel Sea* for a picture of small ship life in World War Two. *The Naval Review* A portrayal of life on a wartime destroyer with a depth and insight that is possible unequalled by any previously published work. *Warship Annual* This book is outstanding for its detailed insight into the life on not just a single destroyer but by extension life at sea aboard and Royal Navy destroyer *The Northern Mariner*. A Hard Fought Ship is a vivid portrait of a fighting vessel and the men who operated her. *Warships International Fleet Review* Highly recommended to both naval historians and the general public. *Mariner's Mirror* It is an exemplary ship biography where a detailed narrative of the destroyer's exploits are brought to life by a wealth of first hand accounts. *Navy News* This book is a detailed and thrilling account of the life of a typical V W class destroyer. *Sea Breezes*

On the Wing David E. Alexander, 2015-09-02 Ask anybody what superpower they wished to possess and odds are the answer just might be the ability to fly. What is it about soaring through the air held up by the power of one's own body that has captivated humans for so long? David Alexander examines the evolution of flight in the only four animals to have evolved this ability: insects, pterosaurs, birds, and bats. With an accessible writing style grounded in rigorous research, Alexander breaks new ground in a field that has previously been confined to specialists. While birds have received the majority of attention from flight researchers, Alexander pays equal attention to all four groups of flyers, something that no other book on the subject has done before now. In a streamlined and captivating way, David Alexander demonstrates the links between the tiny 2 mm thrip and the enormous albatross with the 12 foot wingspan used to cross oceans. The book delves into the fossil record of flyers enough to satisfy the budding paleontologist while also pleasing ornithologists and entomologists alike with its treatment of animal behavior, flapping mechanisms, and wing origin theory. Alexander uses relatable examples to draw in readers even without a natural interest in birds, bees, and bats. He takes something that is so off limits and unfamiliar to humans, the act of flying, and puts it in the context of experiences that many readers can relate to. Alexander guides readers through the anomalies of the flying world: hovering hummingbirds, unexpected gliders, squirrels, for instance, and the flyers that went extinct, pterosaurs. Alexander also delves into wing origin theory and explores whether birds entered the skies from the trees down as gliders or from the ground up as runners, and uses the latest fossil evidence to present readers with an answer.

Summary Technical Report of NDRC United States. Office of Scientific Research and Development. National Defense Research Committee, 1946

The ATL-98 Carvair William Patrick Dean, 2008-09-18 The ATL 98 Carvair is a truly unusual aircraft. Converted from 19 C 54 World War II transport planes and two DC 4 airliners into a small fleet of air ferries by Aviation Traders of Southend, England, the Carvair allowed commercial air passengers to accompany their automobiles

onboard the aircraft The planes were dispersed throughout the world operating for 75 airlines and transporting cars royalty rock groups refugees whales rockets military vehicles gold and even nuclear material After more than 45 years two Carvairs were in 2008 still in service This comprehensive history of the ATL 98 Carvair begins with corporate histories and profiles of key players including William Patterson Donald Douglas and Freddie Laker Four chapters illustrate the evolution of the car ferry as a viable aircraft the history of Aviation Traders engineering details incorporated into the Carvair s production and major Carvair operators Chapters on each of the fleet s 21 planes provide individual histories and anecdotes Seven appendices provide several kinds of data and the book is fully indexed *Coast Guard Miscellaneous* United States.
